# AIR COOLING

## Intel LGA1200/1700 Installation

We have marked the parts required for installing the Intel LGA1200/1700 platform for you.

1x Intel Backplate

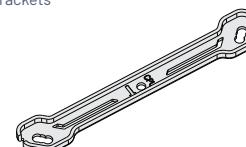

4x Intel / AMD Bolts

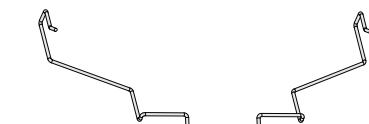

4x Nuts

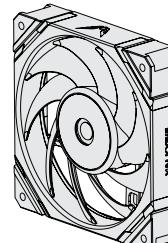

2x Intel Brackets

4x Fan Cable Clips

2x Fan

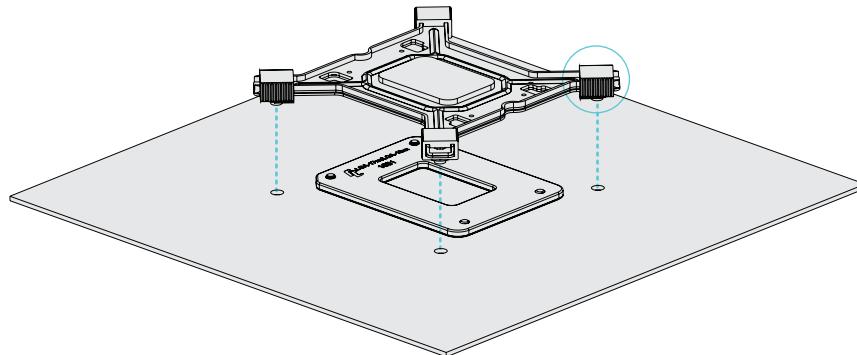

SL125  
1x Forward Curved Fan  
1x Backward Curved fan  
  
DL125  
2x Forward Curved Fan

**EN Step 1: Install bracket**

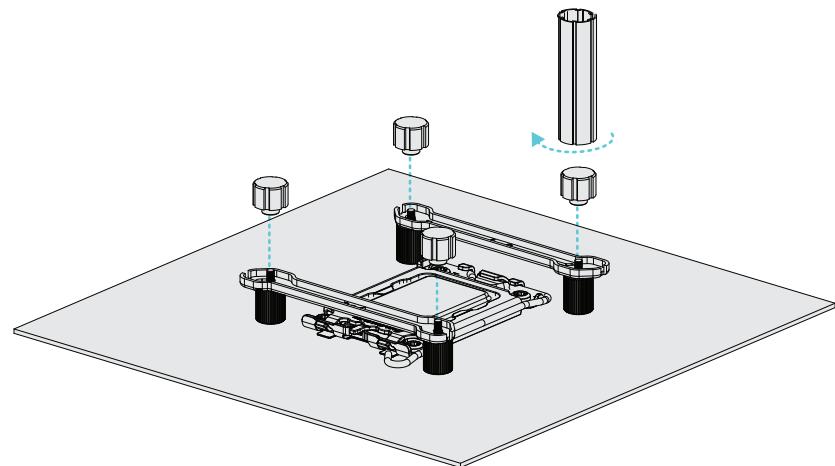

1. Align the backplate to the corresponding platform holes.
2. Install the backplate onto the back of the motherboard.

\* You may slide it to adjust for alignment with the corresponding platform holes.

\* Use the inner mounting hole position for 1200  
(115X) and the outer mounting hole position for 1700.

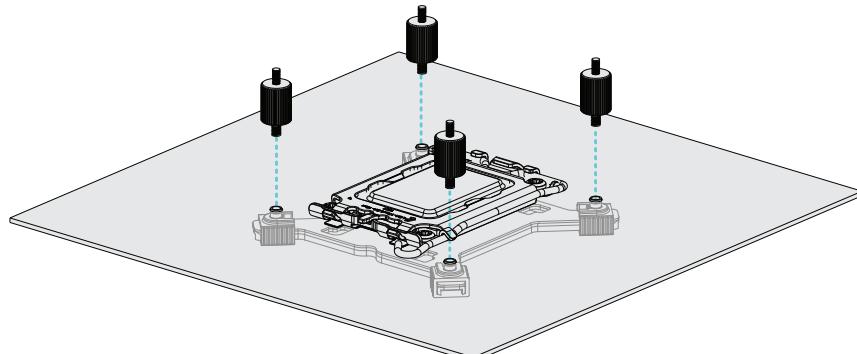

**Step 3: Install brackets**

Put the brackets onto the bolts and tighten them with nuts using a nut socket.

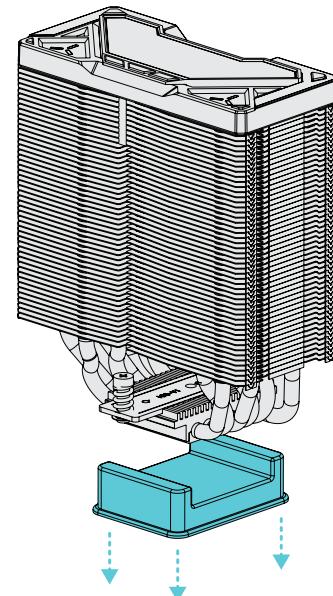

**Step 2: Install Screws**

Install INTEL/AMD bolts to the backplate.

\*The larger end of the screw faces down.

**Step 4: Remove the protective cover**

Take off the protective cover from the coldplate.

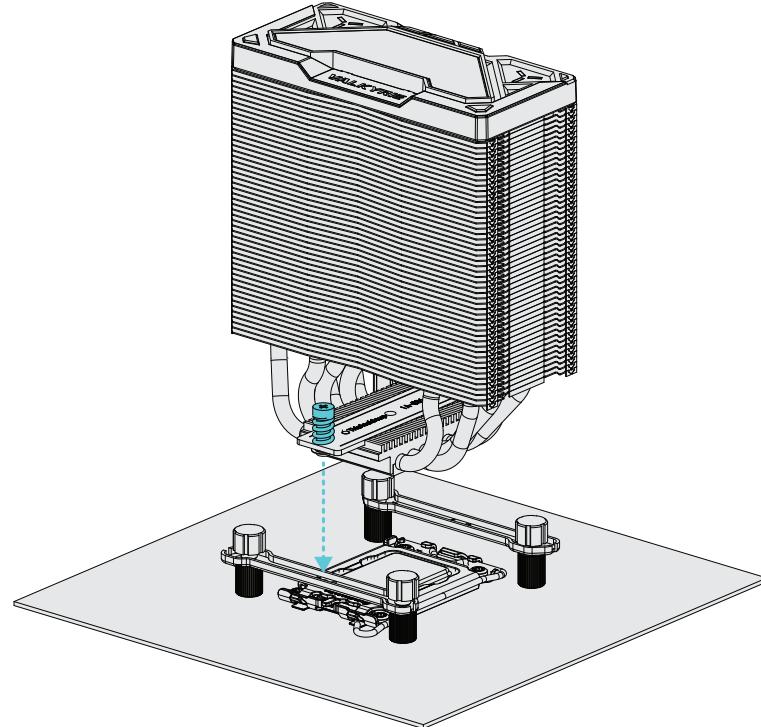

**EN Step 5: Install the cooler**

EN

Align the cooler to the holes and screw it onto the brackets.

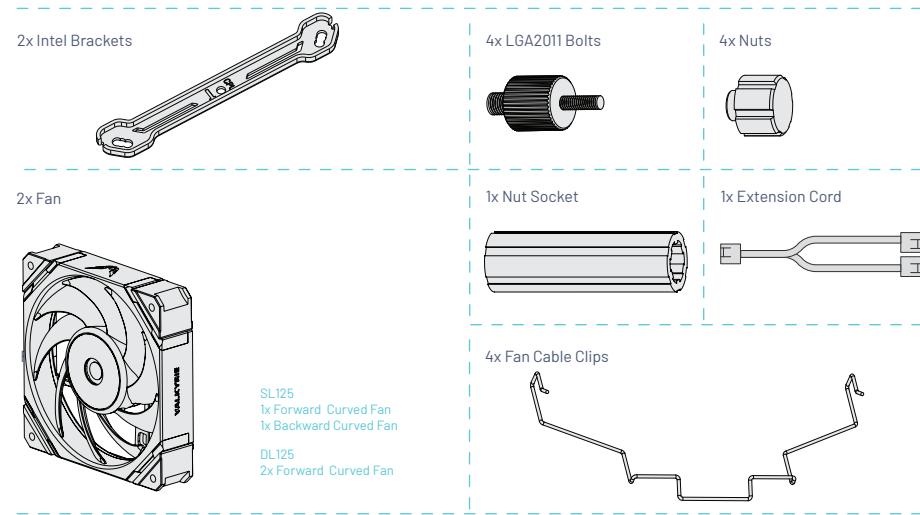

\*Use caution. DO NOT touch the thermally conductive silicone grease pre-applied on the bottom.

**Step 6: Complete installation**

Please refer to the Install Fan and Wiring for installing and connecting fans to the cooler.

# EN Intel LGA2011/2066 Installation

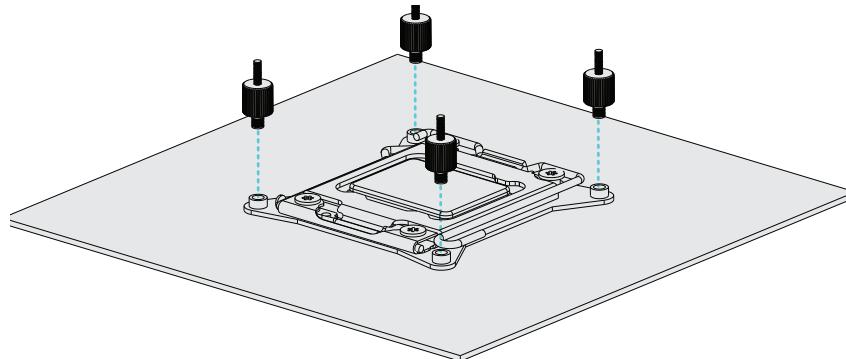

We have marked the parts required for installing the Intel LGA2011/2066 platform for you.

## Step 1: Install Screws

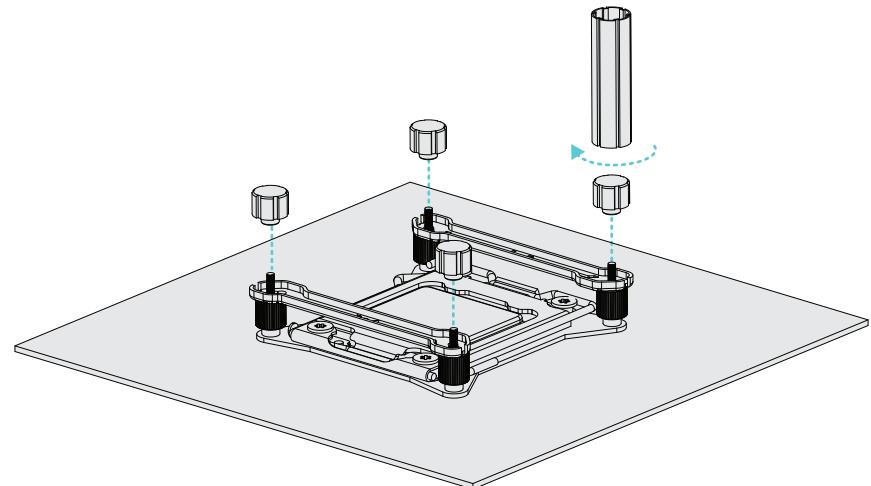

Install Intel LGA2011 bolts to the motherboard.

\*Make sure that the larger end of the screw faces down.

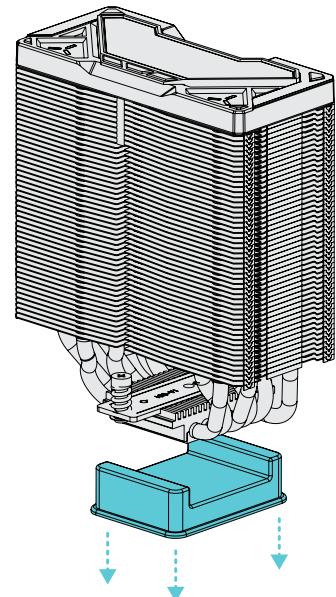

## Step 2: Install brackets

Put the brackets onto the bolts and tighten them with nuts using nut socket.

## Step 4: Remove the protective cover

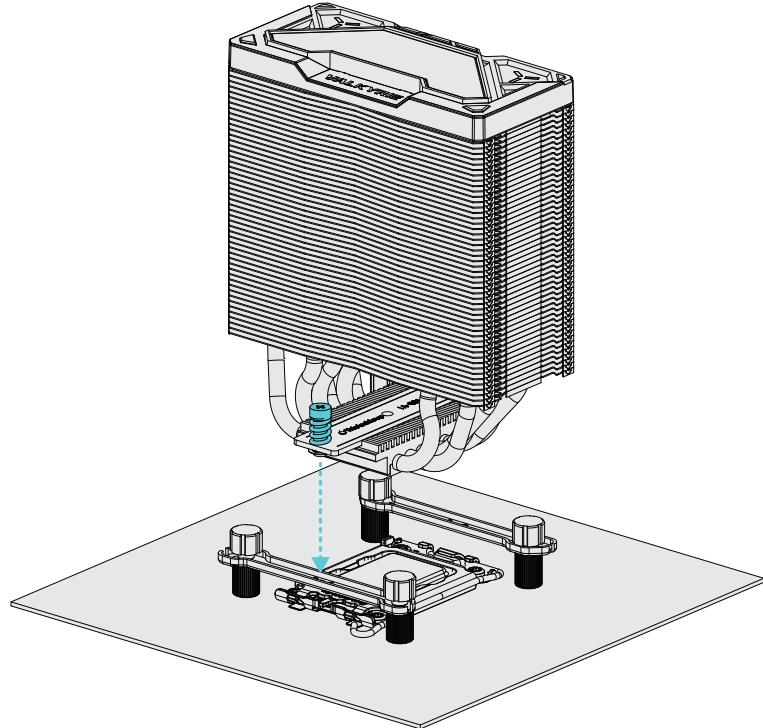

Take off the protective cover from the coldplate.

## Step 5: Install the cooler

Align the cooler to the holes and screw it onto the brackets.

\*Use caution. DO NOT touch the thermally conductive silicone grease pre-applied on the bottom.

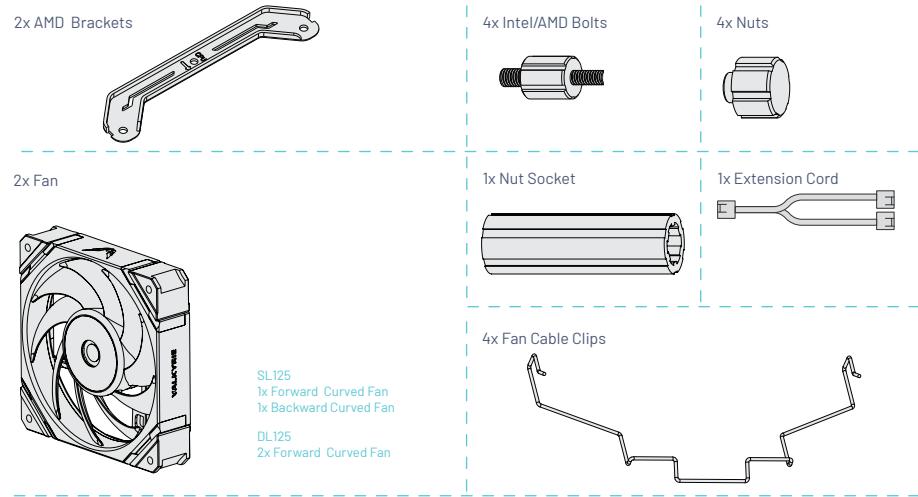

## Step 6: Complete installation

Please refer to the Install Fan and Wiring for installing and connecting fans to the cooler.

# EN AMD AM4/AM5 Installation

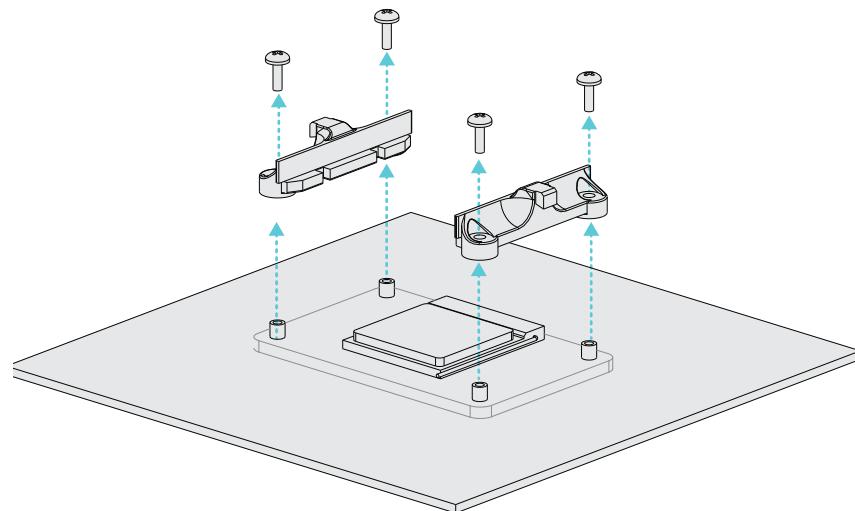

EN

We have marked the parts required for installing the AMD/AM4 platform for you.

## Step 1: Prepare the motherboard

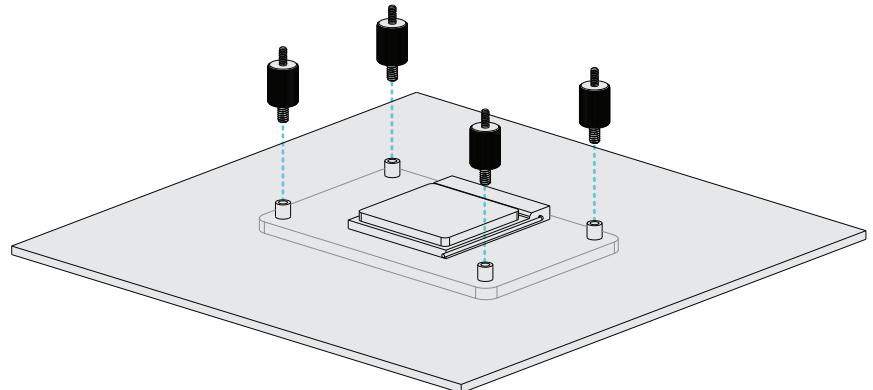

Screw out the 4 bolts. Remove the original bracket on the motherboard. Keep the original backplate.

## Step 2: Install Screws

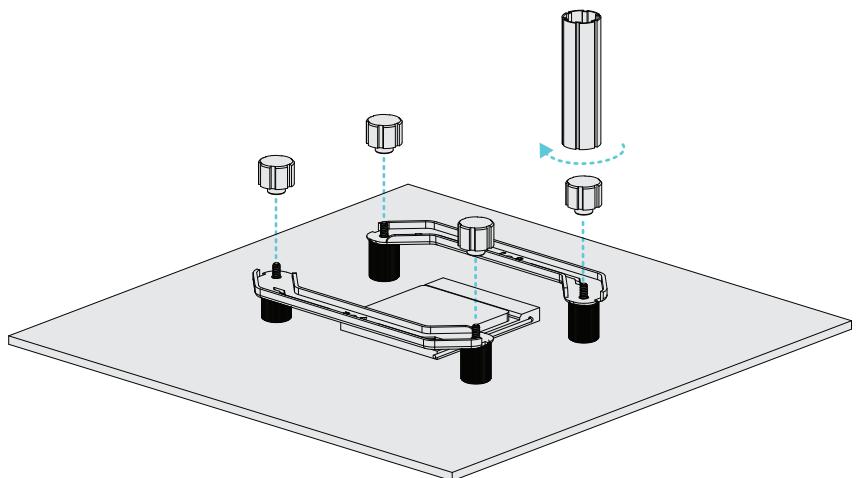

Install INTEL/AMD bolts to the backplate.

\*The larger end of the screw faces down.

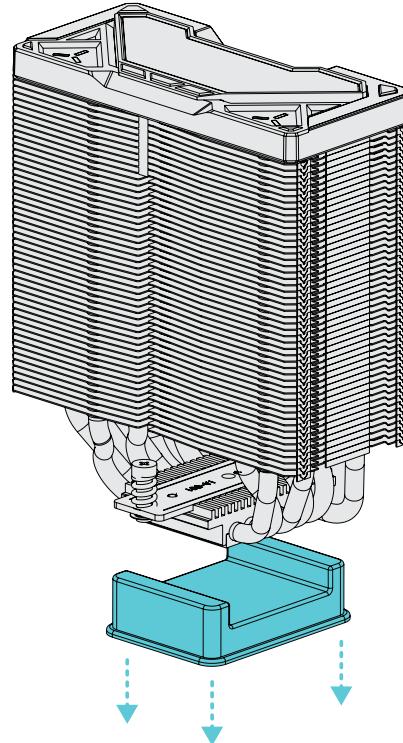

## Step 3: Install brackets

Put the brackets onto the bolts and tighten them with a nut using nut socket.

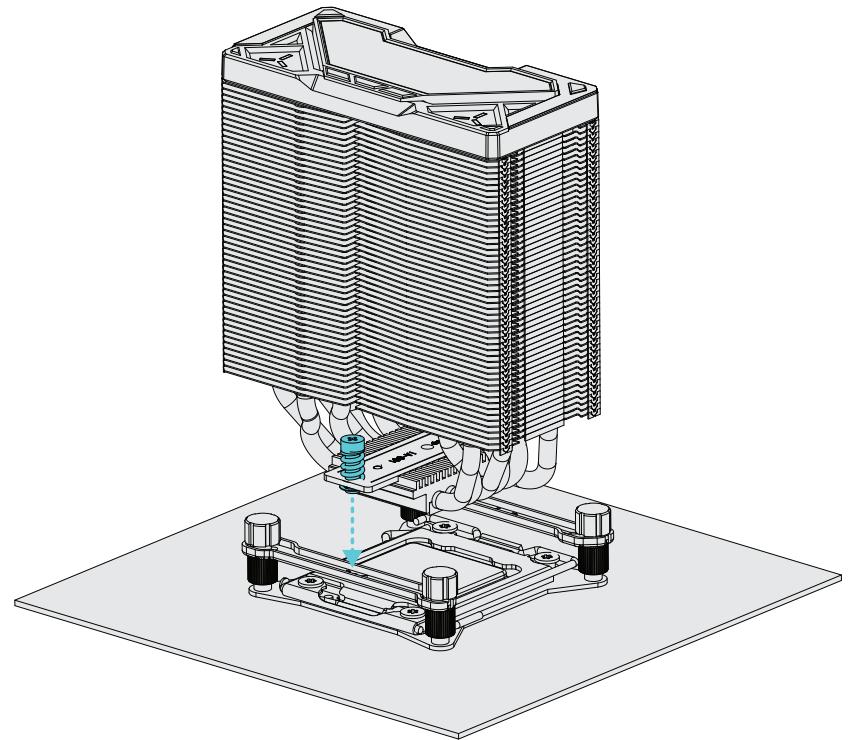

**EN Step 4: Remove the protective cover**

Take off the protective cover from the coldplate.

**Step 5: Install the cooler**

Align the cooler to the holes and screw it onto the brackets.

\*Use caution. DO NOT touch the thermally conductive silicone grease pre-applied on the bottom.

**Step 6: Complete installation**

Please refer to the Install Fan and Wiring for installing and connecting fans to the cooler.

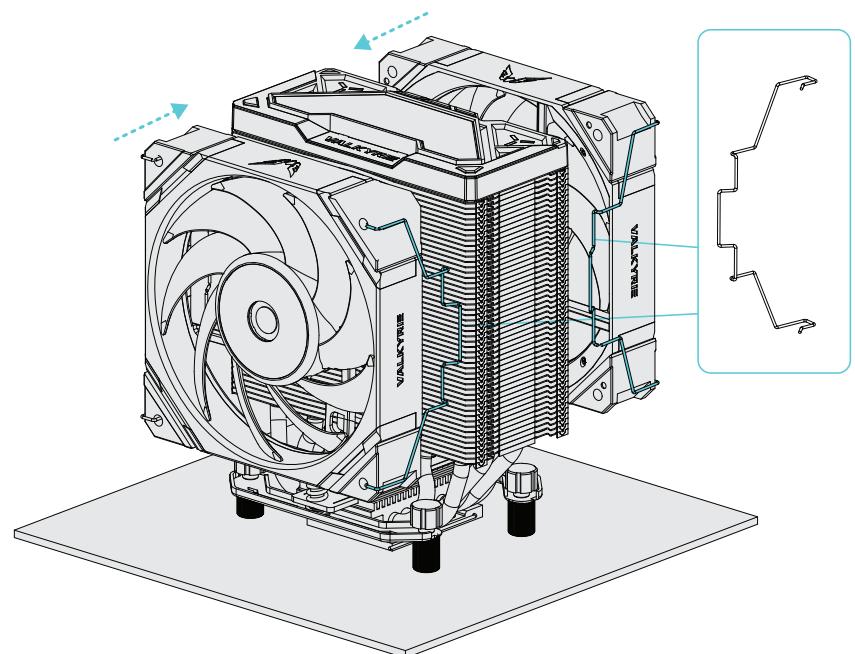

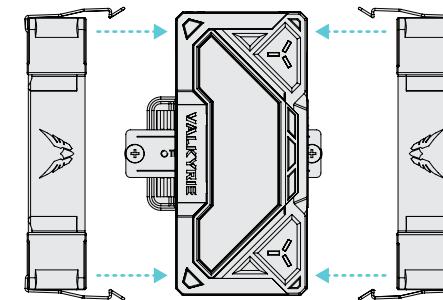

# SL 125 FAN INSTALL

## SL 125 Fan installation

Use the cable clips to secure the fan to the cooler.

\*SL1255 is a forward/backwards curved fan setup. Please pay attention to the fan's direction.

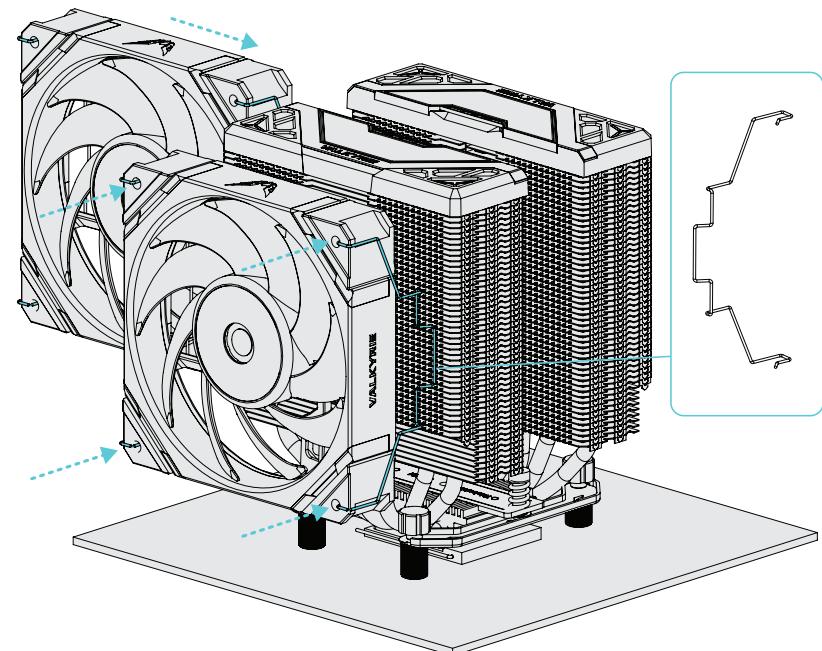

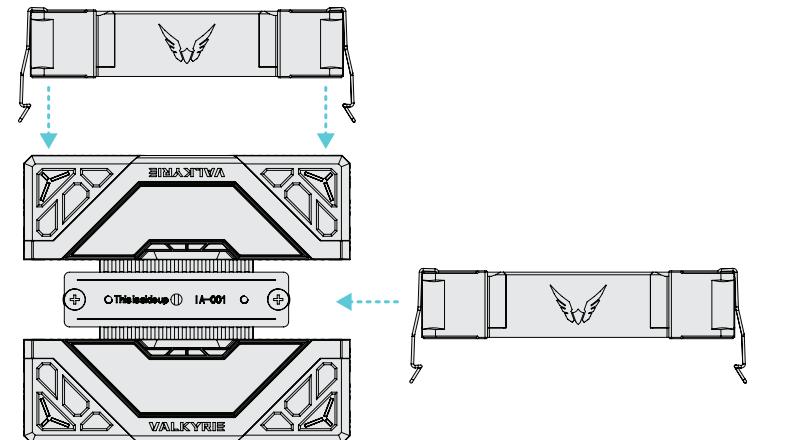

\*The fan logo (wing LOGO) should be as shown in the figure below.

# DL 125 FAN INSTALL

## DL 125 Fan installation

Use the cable clips to secure the fan to the cooler.  
DL125 is dual forward curved fan setup. Please pay attention to the fan's direction.  
\*The fan logo (wing LOGO) should be as shown in the figure below.

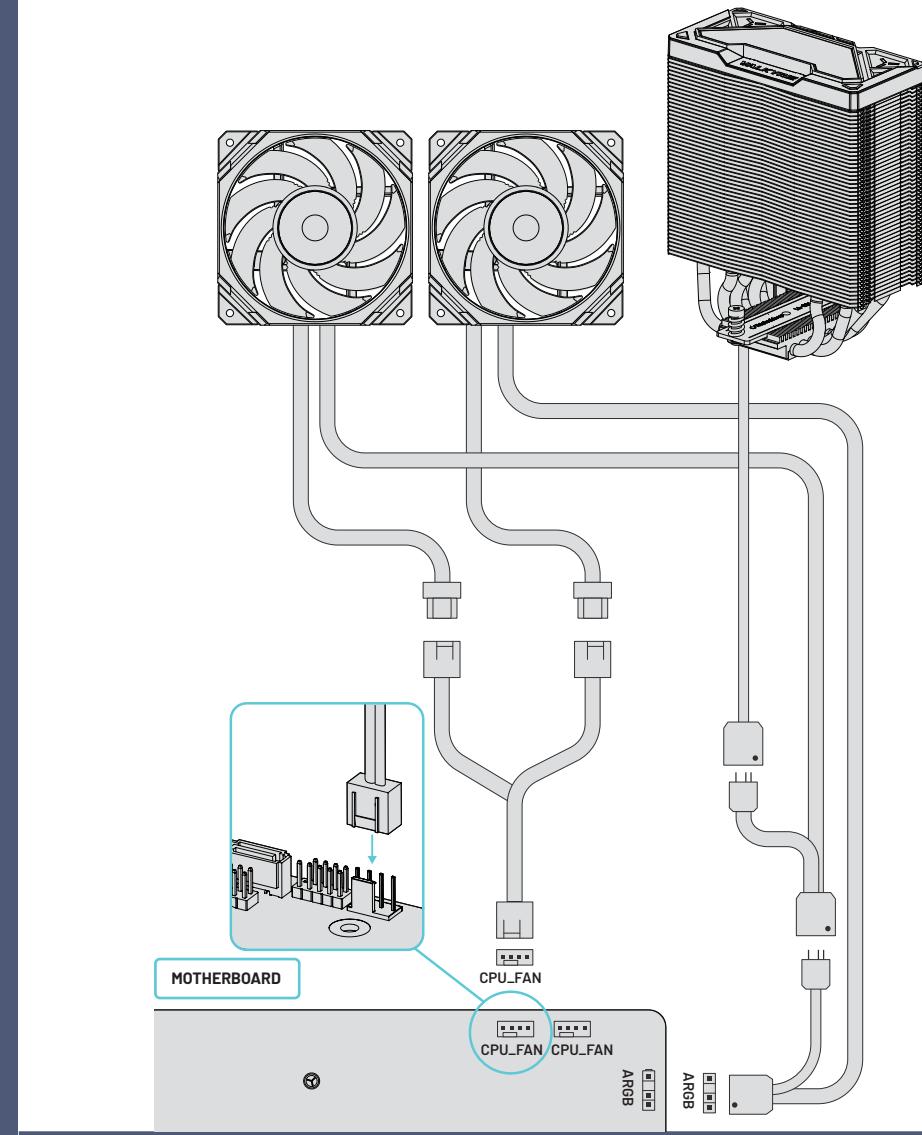

# WIRING

## Fan Wiring

1. Use the cables to connect the 4PIN fan cable to the CPU\_FAN header on the motherboard.

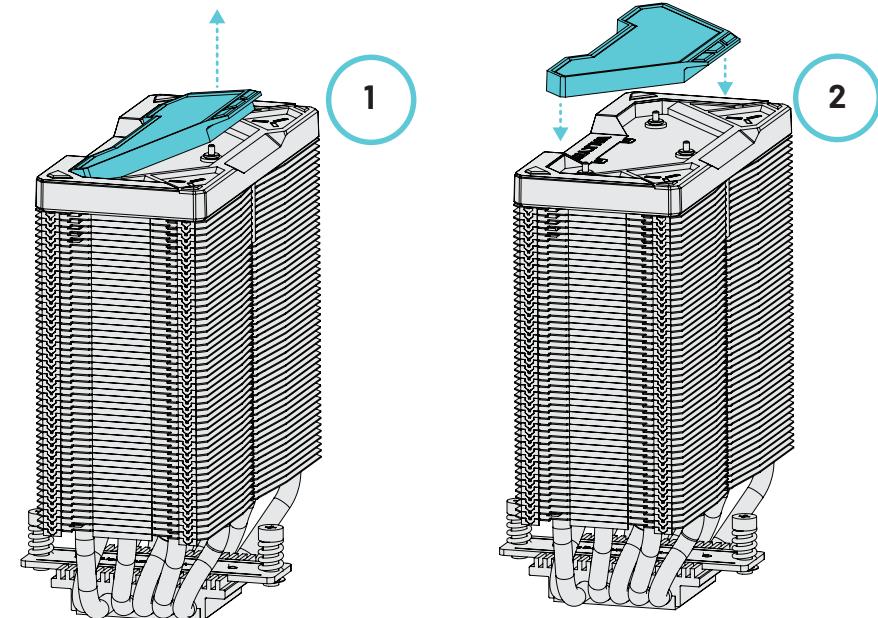

2. Please connect the A-RGB connector of the fans and main body to the 5V 3PIN A-RGB header on the motherboard as shown in the figure.

## Method of replacing of the upper cover

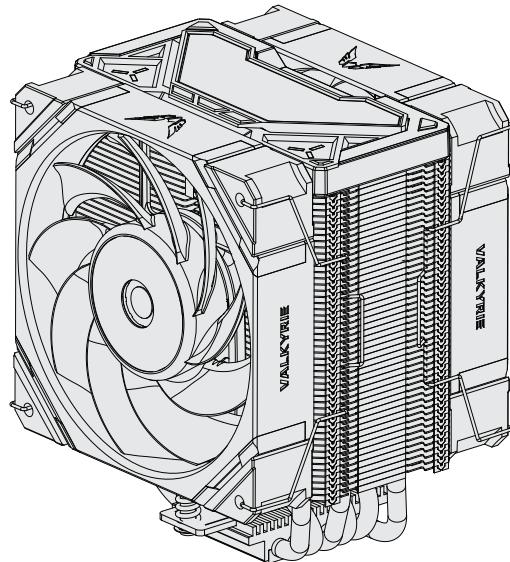

The cover can be removed and replaced with your favourite style.  
\*Make sure you start from the middle.

### TIPS

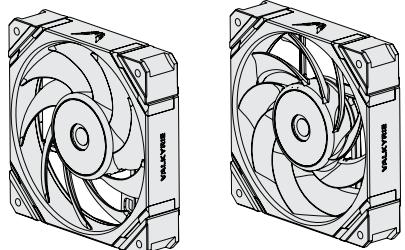

## DE Teileverzeichnis SL125

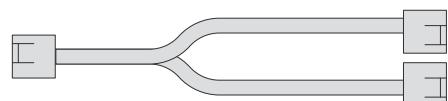

1x Luftkühlungseinheit

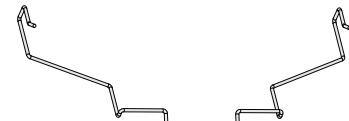

1x Forward Curved Fan  
1x Backward Curved Fan

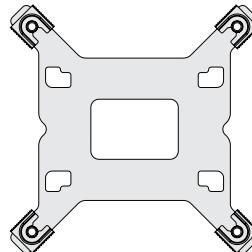

1x Extension Cord

4x Cable Clips

1x Intel-Rückwand

4x Intel-/AMD-Bolzen

4x Muttern

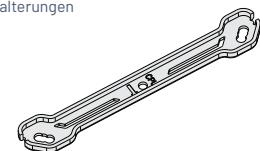

4x LGA2011-Bolzen

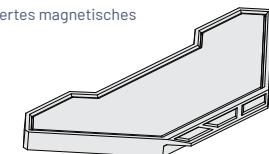

1x Mutternschlüssel

2x Intel-Halterungen

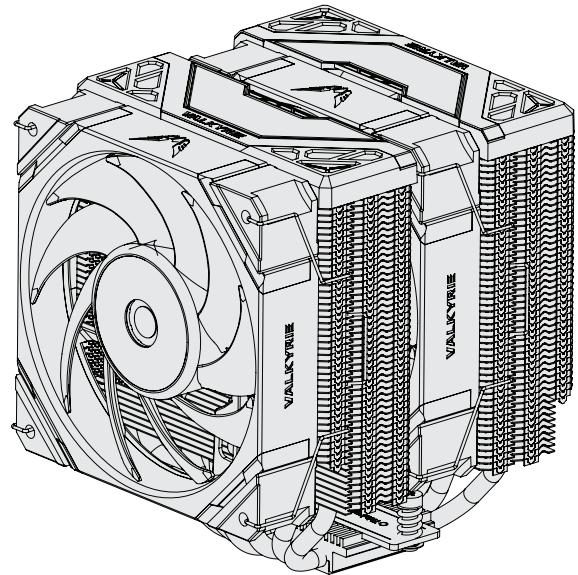

1x patentiertes magnetisches Silikonfett

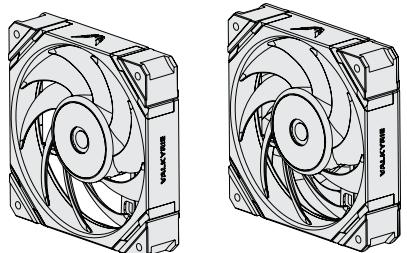

\*Überprüfen Sie die erhaltene Ware, um sicherzustellen, dass die Teile vollständig sind.

## DE Teileverzeichnis DL125

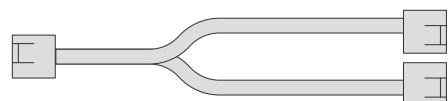

1x Luftkühlungseinheit

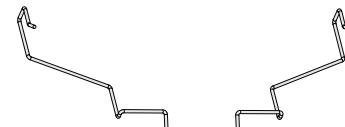

2x vorwärts gekrümmter Lüfter

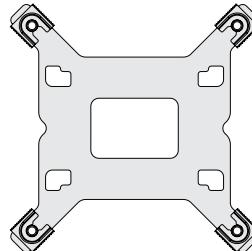

1x Verlängerungskabel

4x Lüfterkabelclips

1x Intel-Rückwand

4x Intel-/AMD-Bolzen

4x Muttern

4x LGA2011-Bolzen

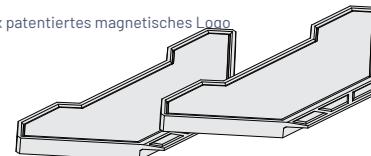

1x Mutternschlüssel

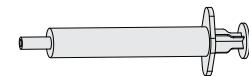

2x Intel-Halterungen

2x patentiertes magnetisches Logo

1x wärmeleitfähiges Silikonfett

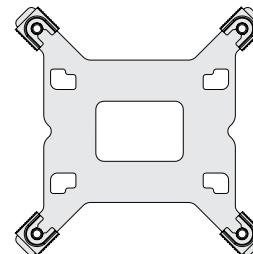

\*Überprüfen Sie die erhaltene Ware, um sicherzustellen, dass die Teile vollständig sind.

# LUFTKÜHLUNG

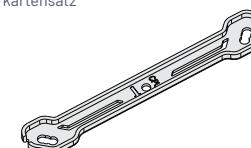

## Intel LGA1200/1700 Montage

Wir haben die für die Montage der Plattform Intel LGA1200/1700 erforderlichen Teile für Sie markiert.

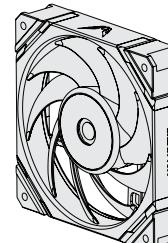

1x Intel-Rückwand

2x Intel-Halterungen  
Speicherkartensatz

2x Lüfter

SL125  
1x Vorwärts gekrümmter Lüfter  
1x Rückwärts gekrümmter Lüfter  
  
DL125  
2x Vorwärts gekrümmter Lüfter

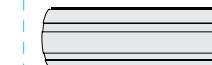

4x Intel / AMD Bolzen

4x Muttern

1x Mutternschlüssel

1x Verlängerungskabel

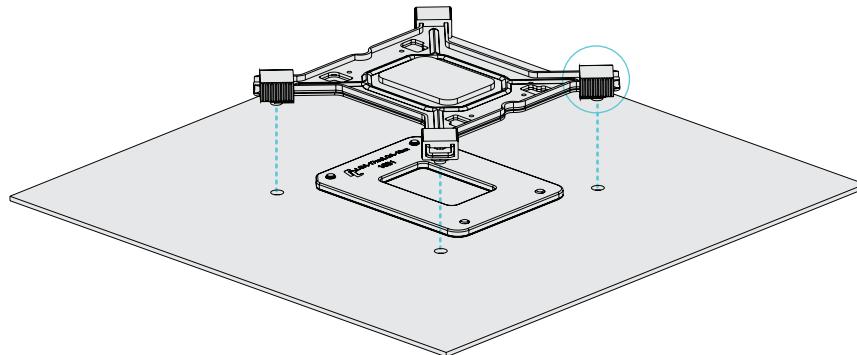

4x Lüfterkabelclips

## DE Schritt 1: Halterung montieren

1. Richten Sie die Rückwand an den entsprechenden Plattformlöchern aus.
  2. Montieren Sie die Rückwand auf der Rückseite der Hauptplatine.
- \* Sie können sie verschieben, um sie an die entsprechenden Löcher der Plattform anzupassen.

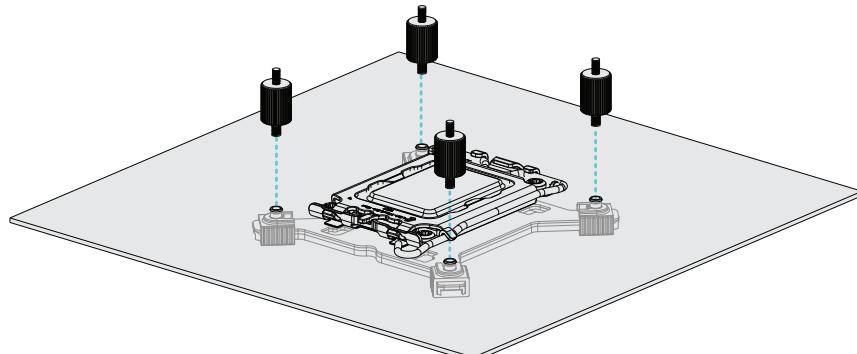

\* Verwenden Sie die innere Position der Montagebohrung für i200 (115X) und die äußere Position der Montagebohrung für i700.

## Schritt 2: Schrauben montieren

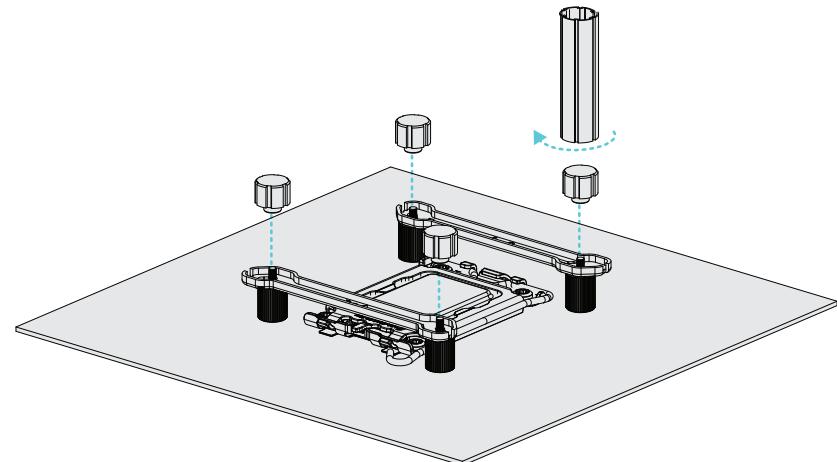

Montieren Sie die INTEL-/AMD-Schrauben an der Rückwand.

\*Das größere Ende der Schraube zeigt nach unten..

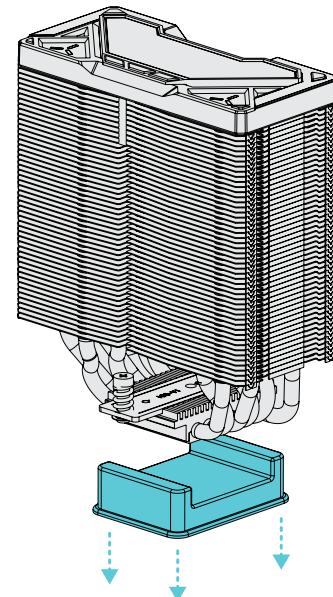

## Schritt 3: Halterungen montieren

Stecken Sie die Halterungen auf die Bolzen und ziehen Sie sie mit einem Mutternschlüssel fest.

## Schritt 4: Schutzabdeckung entfernen

Nehmen Sie die Schutzabdeckung von der Kühlplatte ab.

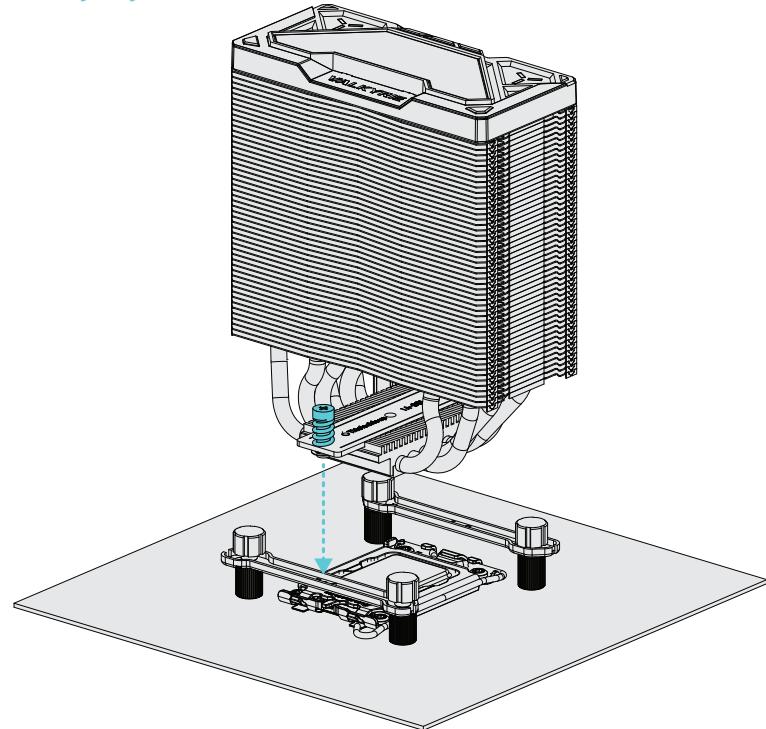

**DE Schritt 5: Kühler montieren**

DE

Richten Sie den Kühler an den Löchern aus und schrauben Sie ihn auf die Halterungen.

\*Vorsicht ist geboten. Berühren Sie NICHT das wärmeleitende Silikonfett, das bereits auf der Unterseite aufgetragen ist.

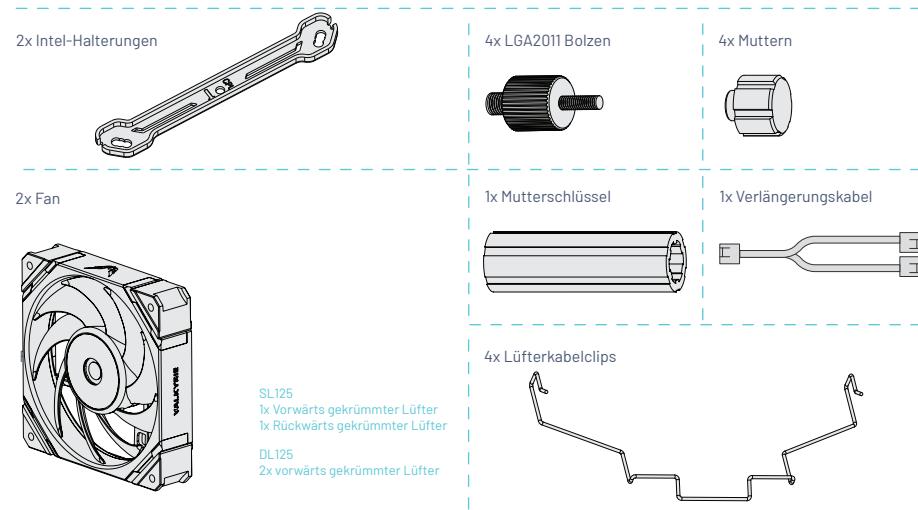

**Schritt 6: Montage abschließen**

Informationen zur Montage und zum Anschluss von Lüftern an den Kühler finden Sie im Abschnitt „Lüfter montieren und verkabeln“.

## DE Intel LGA2011/2066 Montage

DE

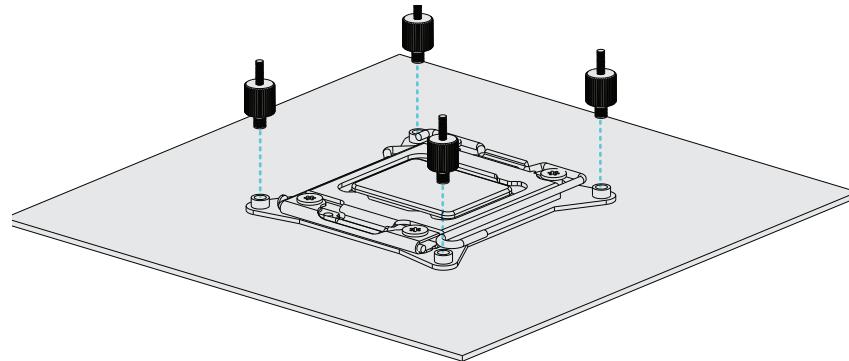

Wir haben die für die Montage der Intel LGA2011/2066 Plattform benötigten Teile für Sie markiert.

### Schritt 1: Schrauben montieren

Montieren Sie die Intel LGA2011-Schrauben auf der Hauptplatine.

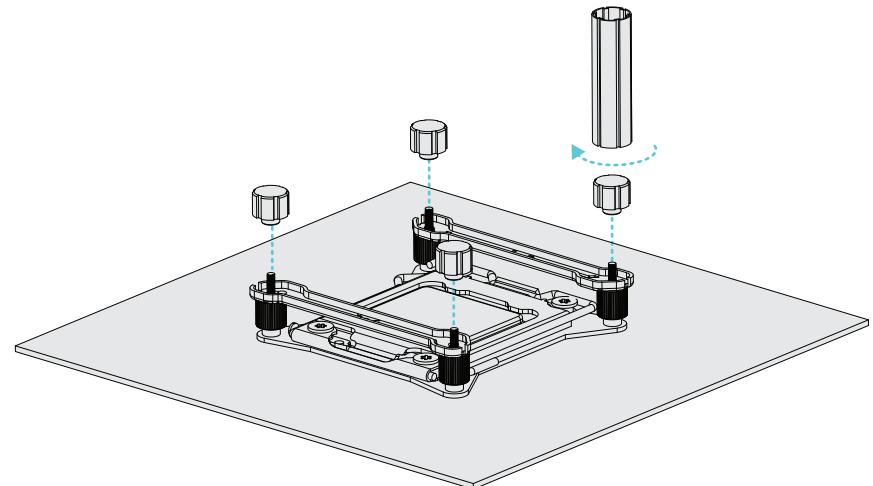

\*Achten Sie darauf, dass das größere Ende der Schraube nach unten zeigt.

### Schritt 2: Halterungen montieren

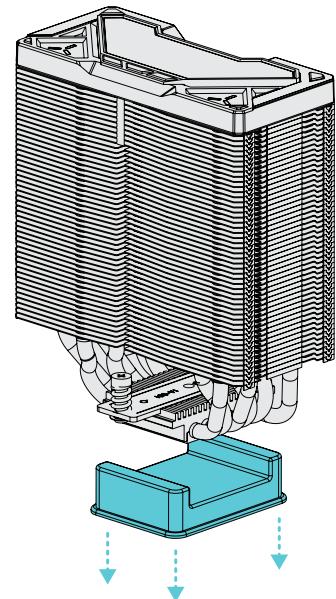

DE

Stecken Sie die Halterungen auf die Bolzen und ziehen Sie sie mit einem Mutternschlüssel fest.

### Schritt 3: Schutzabdeckung entfernen

Nehmen Sie die Schutzabdeckung von der Kühlplatte ab.

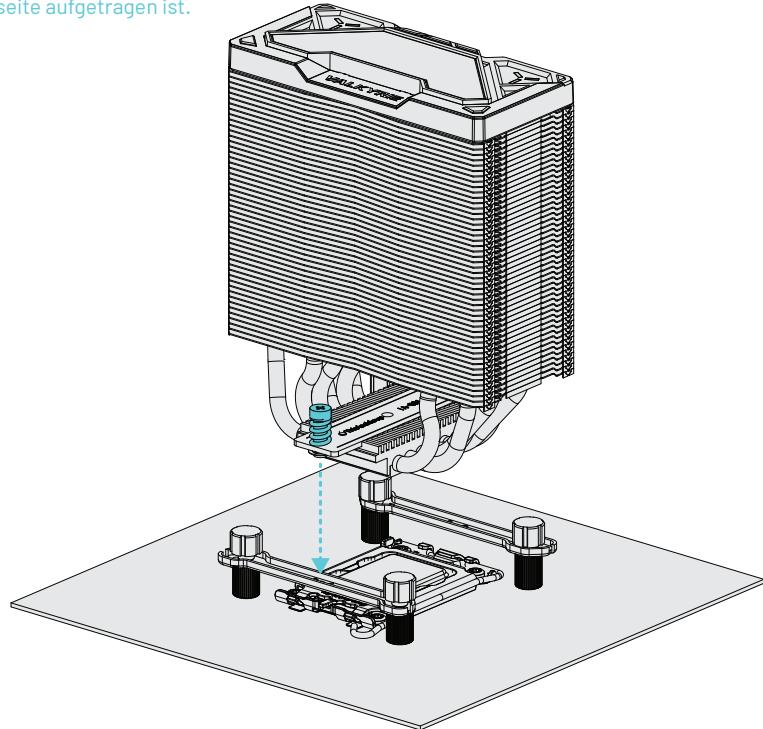

**DE Schritt 5: Kühler montieren**

DE

Richten Sie den Kühler an den Löchern aus und schrauben Sie ihn auf die Halterungen.

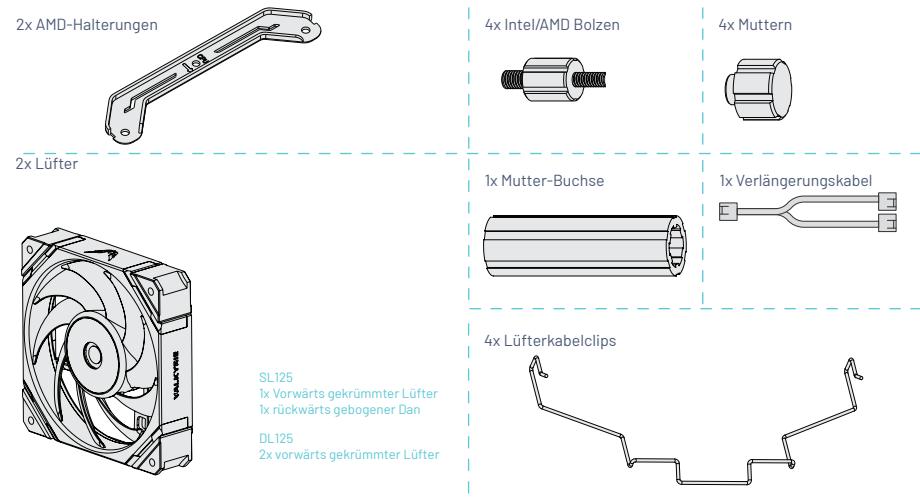

\*Vorsicht ist geboten. Berühren Sie NICHT das wärmeleitende Silikonfett, das bereits auf der Unterseite aufgetragen ist.

**Schritt 6: Montage abschließen**

Informationen zur Montage und zum Anschluss von Lüftern an den Kühler finden Sie im Abschnitt „Lüfter montieren und verkabeln“.

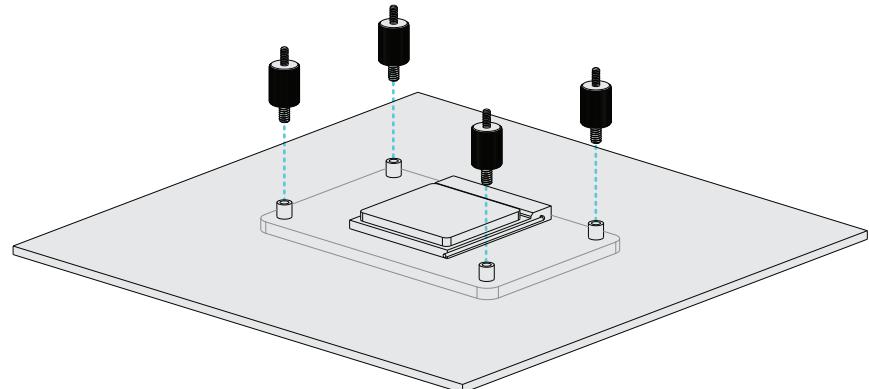

## DE AMD AM4/AM5 Montage

Wir haben die für die Montage der AMD/AM4-Plattform erforderlichen Teile für Sie markiert..

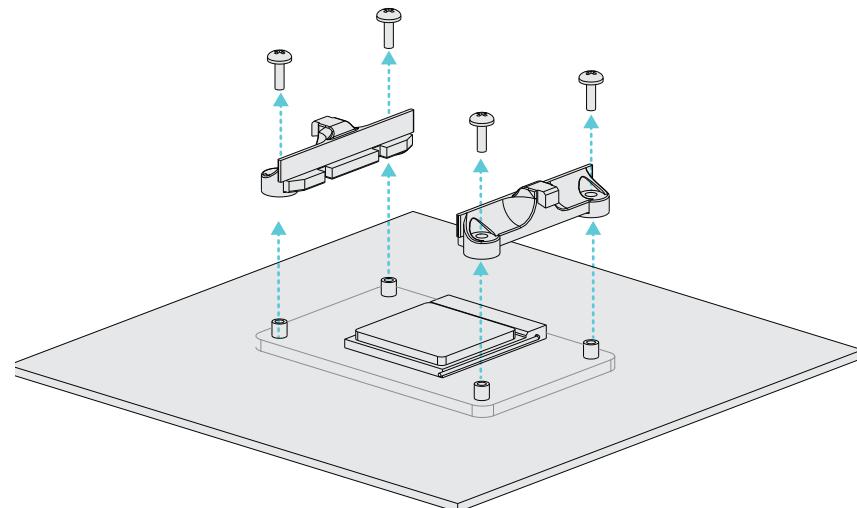

## Schritt 2: Schrauben montieren

Montieren Sie die INTEL-/AMD-Schrauben an der Rückwand.  
\*Das größere Ende der Schraube zeigt nach unten.

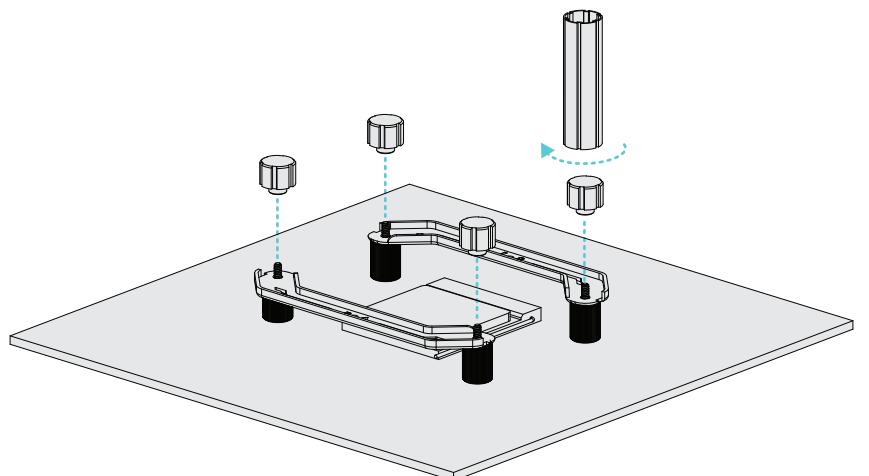

## Schritt 1: Hauptplatine vorbereiten

Lösen Sie die 4 Bolzen. Entfernen Sie die Originalhalterung auf der Hauptplatine. Bewahren Sie die Original-Rückwand auf.

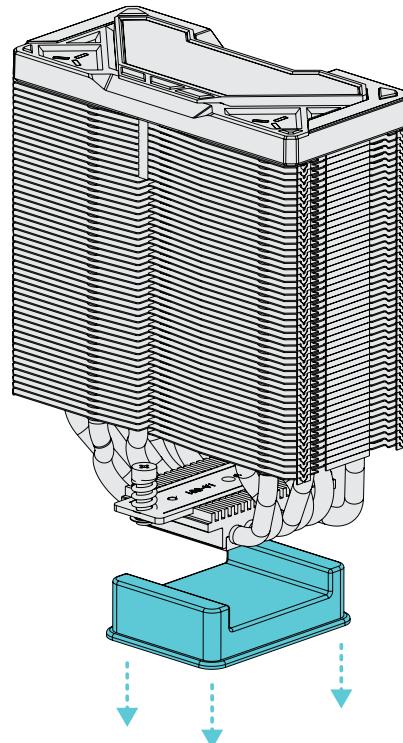

## Schritt 3: Halterungen montieren

Stecken Sie die Halterungen auf die Bolzen und ziehen Sie sie mit einem Mutternschlüssel fest.

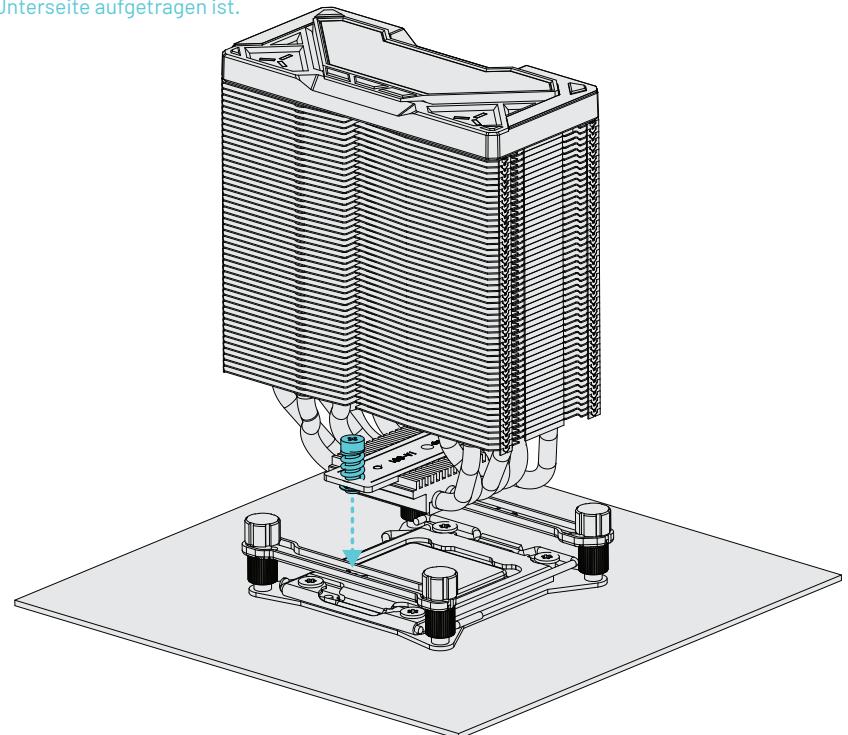

**DE Schritt 4: Schutzabdeckung entfernen**

Nehmen Sie die Schutzabdeckung von der Kühlplatte ab

**Schritt 5: Kühler montieren**

Richten Sie den Kühler an den Löchern aus und schrauben Sie ihn auf die Halterungen.

\*Vorsicht ist geboten. Berühren Sie NICHT das wärmeleitende Silikonfett, das bereits auf der Unterseite aufgetragen ist.

**Schritt 6: Vollständige Installation**

Informationen zur Installation und zum Anschluss von Lüftern an den Kühler finden Sie im Abschnitt Lüfter installieren und Verkabelung.

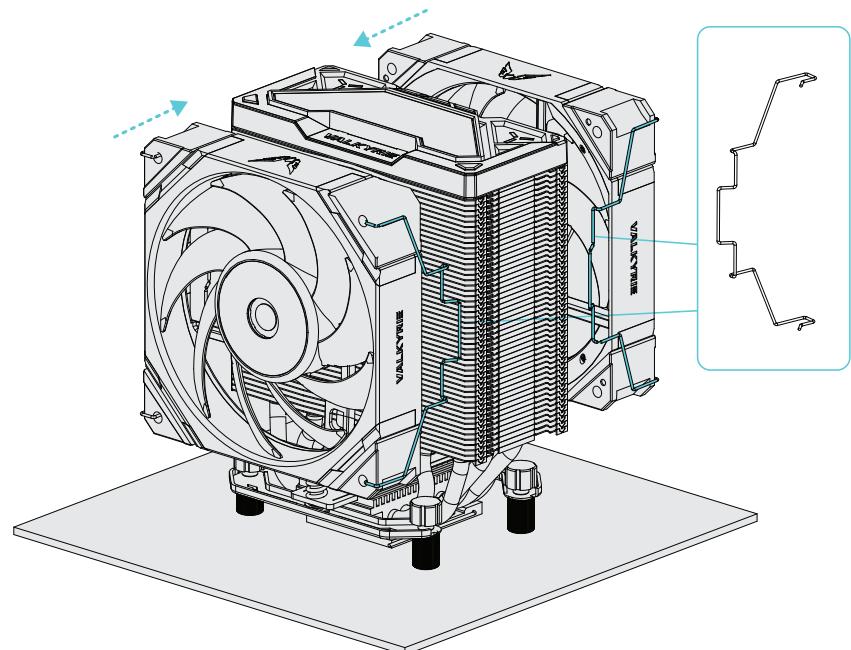

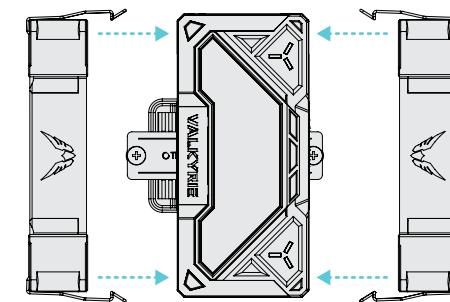

# SL125 LÜFTER MONTIEREN

## SL125 Lüftermontage

Verwenden Sie die Kabelklemmen, um den Lüfter am Kühler zu befestigen.

\*SL125 ist eine vorwärts/rückwärts gekrümmte Lüftereinstellung. Achten Sie bitte auf die Richtung des Lüfters.

\*Das Lüfterlogo (wing LOGO) sollte wie in der Abbildung unten dargestellt sein

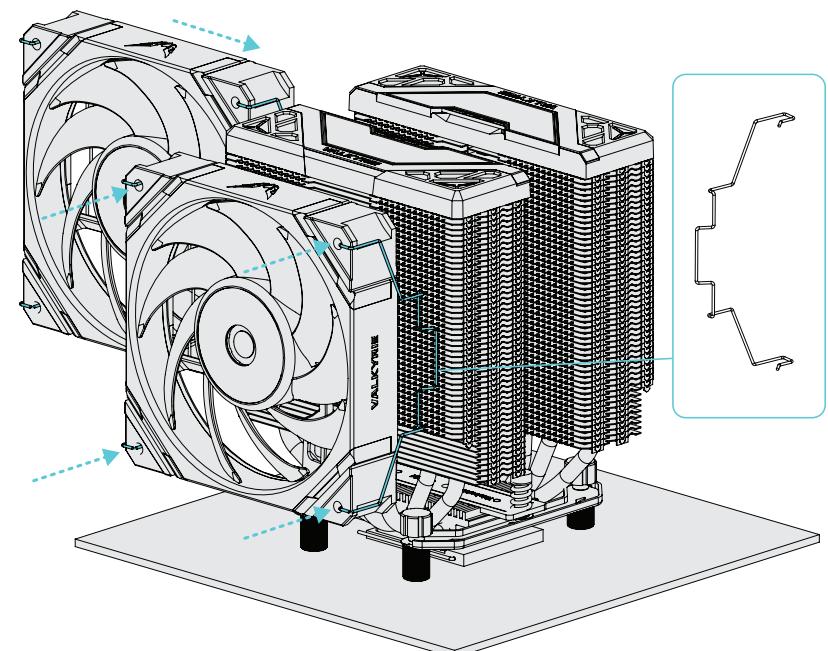

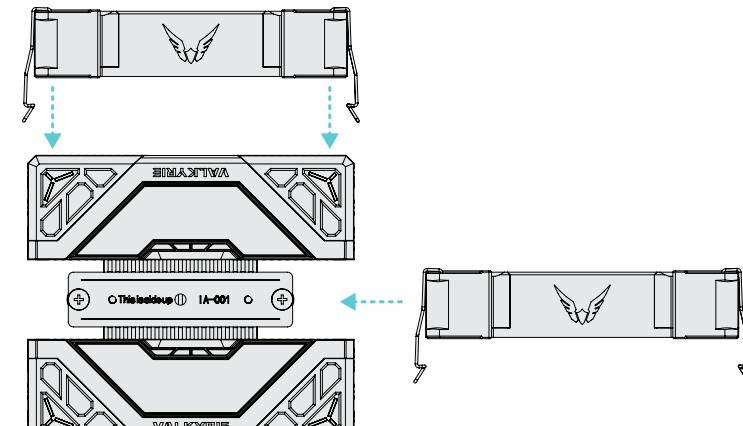

# DL125 LÜFTER MONTIEREN

## DL125 Lüftermontage

Verwenden Sie die Kabelklemmen, um den Lüfter am Kühler zu befestigen.

\*DL125 ist ein doppelter vorwärts gekrümmter Lüfter. Bitte achten Sie auf die Richtung des Lüfters.

\*Das Lüfterlogo (wing LOGO) sollte wie in der Abbildung unten dargestellt sein.

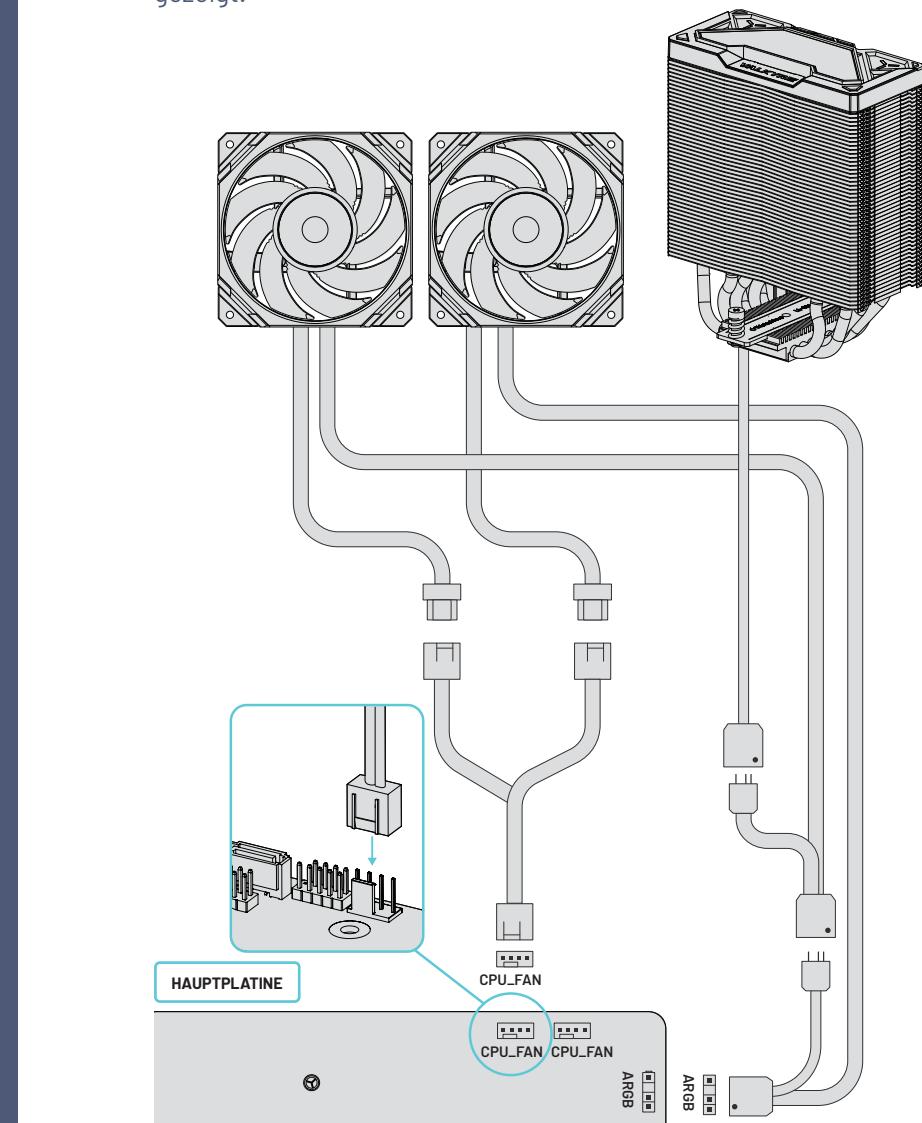

# ► VERKABELUNG ◀

## Lüfterverkabelung

1. Verwenden Sie die Kabel, um das 4PIN-Lüfterkabel mit dem CPU\_LÜFTER-Anschluss auf der Hauptplatine zu verbinden.

2. Verbinden Sie den A-RGB-Anschluss der Lüfter und des Hauptgehäuses mit dem 5V 3PIN A-RGB-Anschluss auf der Hauptplatine wie in der Abbildung gezeigt.

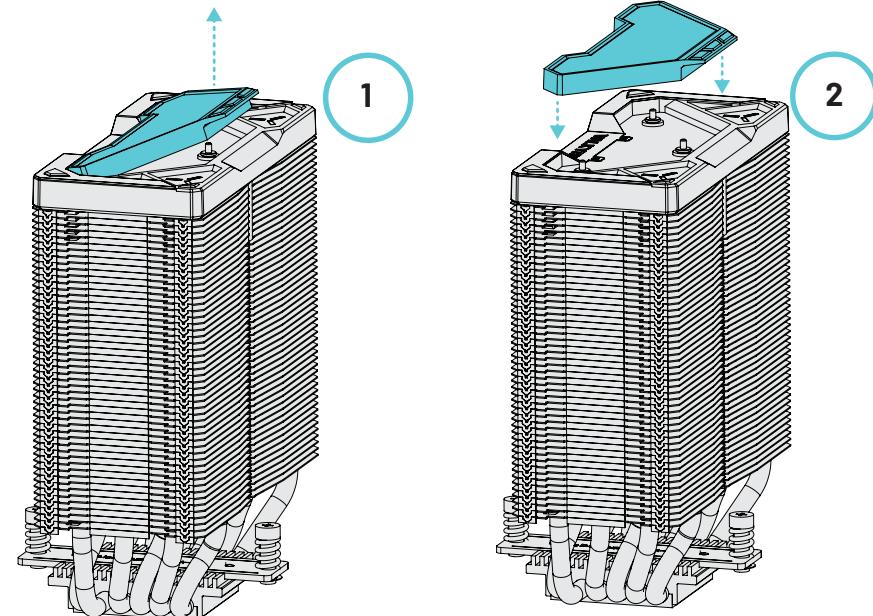

## Verfahren zum Ersetzen der oberen Abdeckung

Die Abdeckung kann abgenommen und durch Ihren Lieblingsstil ersetzt werden.

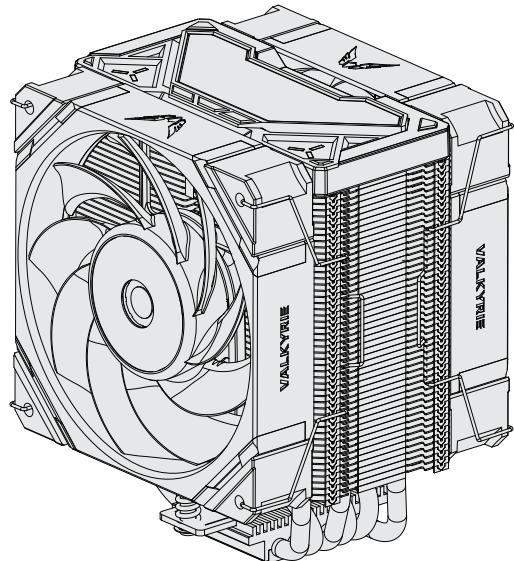

\*Fangen Sie in der Mitte an.

### TIPPS

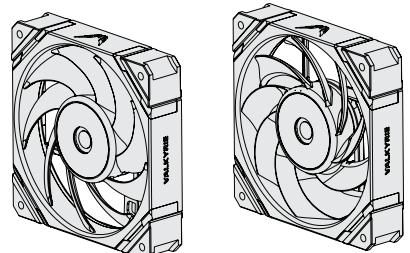

# FR Liste des pièces SL125

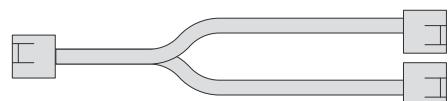

1x Unité de refroidissement par air

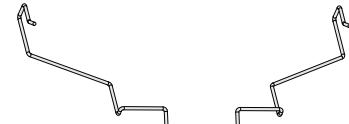

1x Ventilateur incurvé vers l'avant  
1x Ventilateur incurvé vers l'arrière

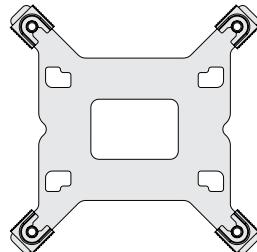

1x Rallonge

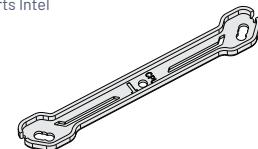

4x Attaches de câble de ventilateur

1x Plaque arrière Intel

2x Supports Intel

4x Boulons Intel / AMD

4x Écrous

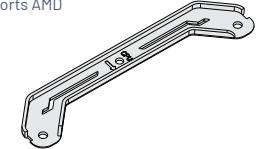

4x Boulons LGA2011

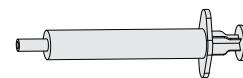

1x Nut Socket

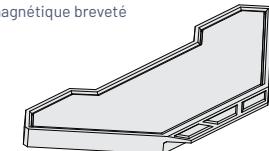

2x Supports AMD

1x Graisse silicone thermo-conductrice

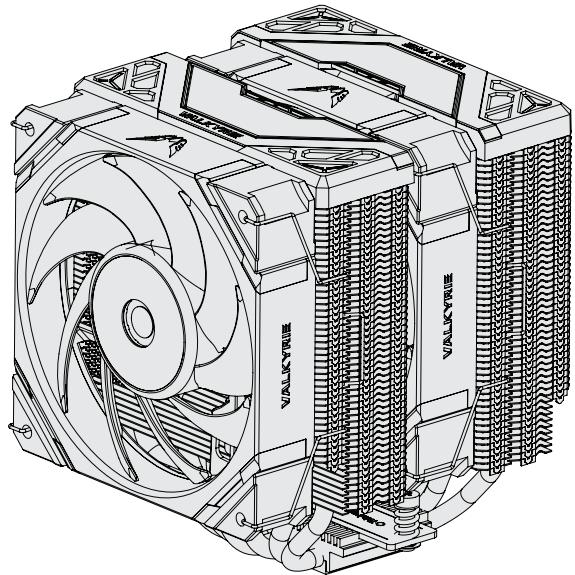

1x Logo magnétique breveté

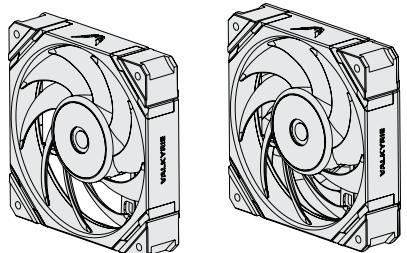

\*Veuillez vérifier les marchandises reçues pour vous assurer que les pièces sont complètes.

# FR Liste des pièces DL125

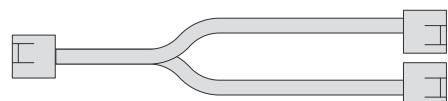

1x Unité de refroidissement par air

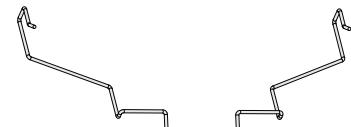

2x Ventilateurs incurvés vers l'avant

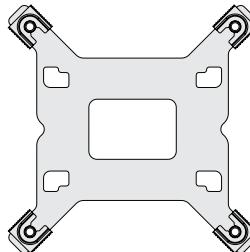

1x Rallonge

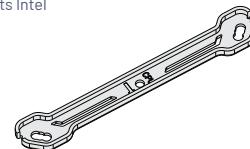

4x Attaches de câble de ventilateur

1x Plaque arrière Intel

2x Supports Intel

4x Boulons Intel / AMD

4x Écrous

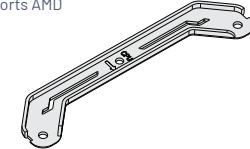

4x Boulons LGA2011

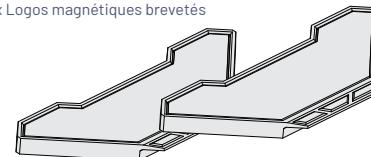

1x Douille à écrou

# ► REFROIDISSEMENT ◀ PAR AIR

## Installation de l'Intel LGA1200/1700

FR

Nous avons marqué les pièces nécessaires à l'installation de la plateforme Intel LGA1200/1700.

1x Plaque arrière Intel

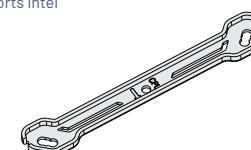

4x Boulons Intel / AMD

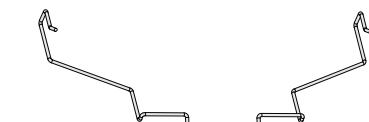

4x Écrous

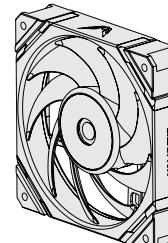

2x Supports Intel

4x Clips de câble de ventilateur

2x Ventilateurs

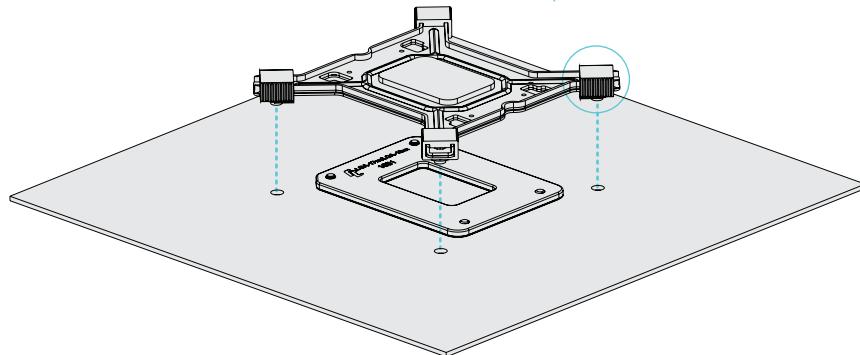

SL125  
1x Ventilateur courbé vers l'avant  
1x Ventilateur courbé vers l'arrière  
  
DL125  
2x Ventilateur courbé vers l'avant

## FR Étape 1 : Installer le support

1. Aligner la plaque arrière sur les trous de la plateforme correspondants.
  2. Installer la plaque arrière à l'arrière de la carte mère.
- \* Vous pouvez faire glisser pour ajuster l'alignement avec les trous de plateforme correspondants.

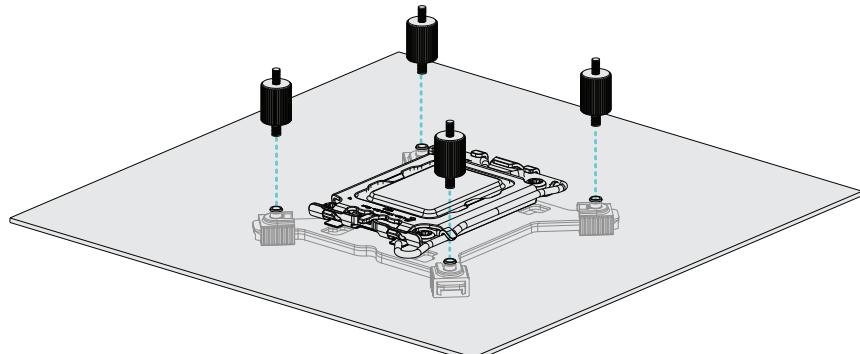

\* Utiliser la position du trou de montage intérieur pour 1200 (115X) et la position du trou de montage extérieur pour 1700.

## Étape 2 : Installer les vis

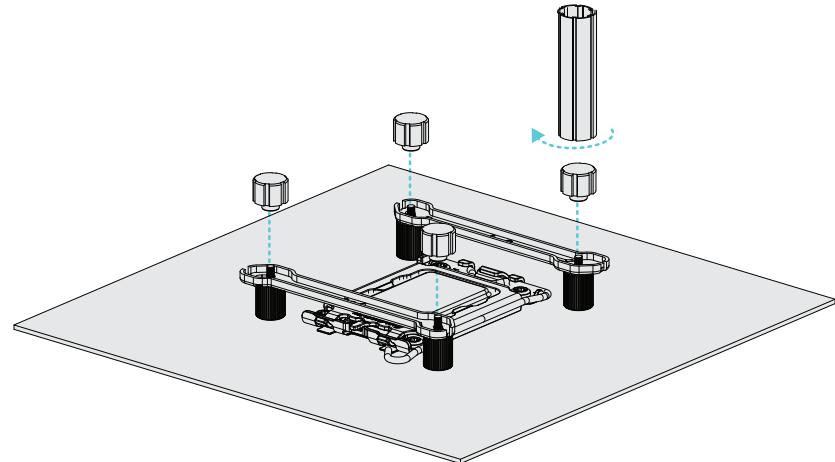

Installer les boulons INTEL/AMD sur la plaque arrière.

\*La plus grande extrémité de la vis est tournée vers le bas.

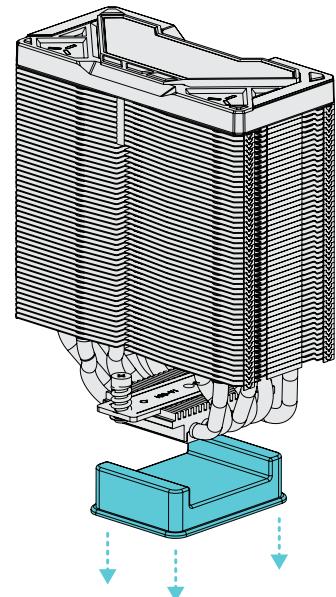

## Étape 3 : Installer les supports

Placer les supports sur les boulons et les serrer avec des écrous à l'aide d'une douille à écrou.

## Étape 4 : Retirer le couvercle de protection

Retirer le film de protection de la plaque froide.

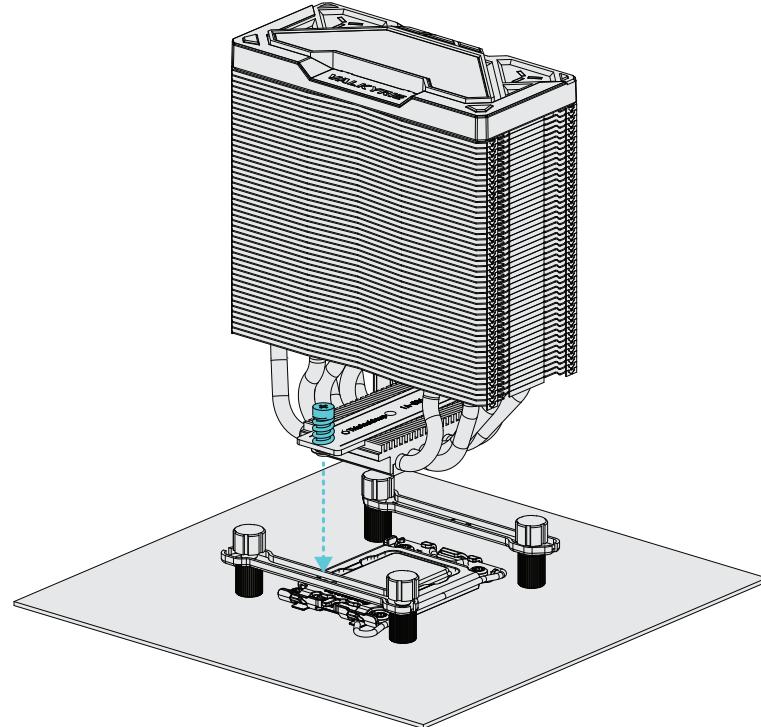

**FR Étape 5 : Installer le refroidisseur**

FR

Aligner le refroidisseur sur les trous et le visser sur les supports.

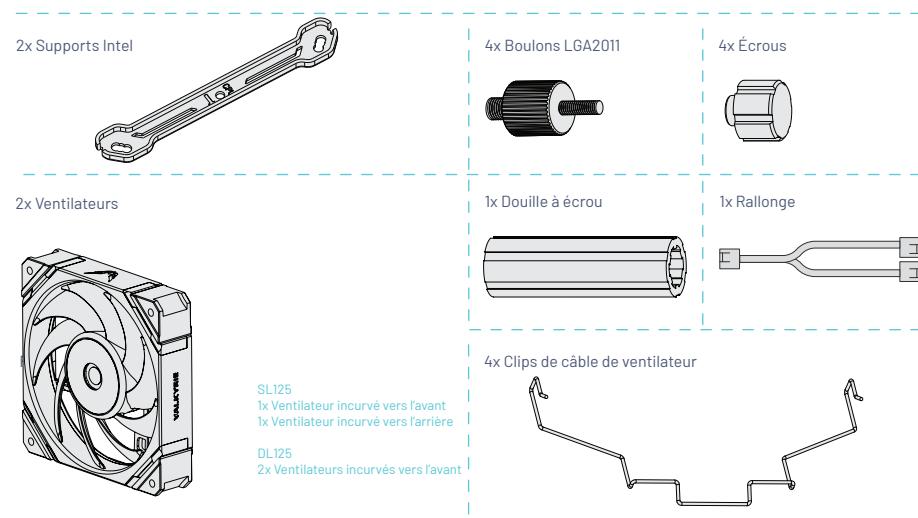

\*Soyez prudent. NE touchez PAS la graisse de silicone thermoconductrice pré-appliquée sur le fond.

**Étape 6 : Terminer l'installation**

Veuillez vous référer au document Installer le ventilateur et le câblage pour installer et connecter les ventilateurs au refroidisseur.

## FR Installation de l'Intel LGA2011/2066

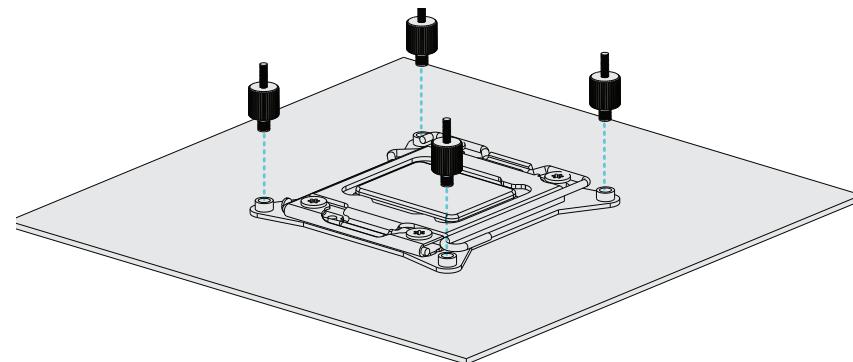

Nous avons marqué les pièces requises pour l'installation de la plateforme Intel LGA2011/2066.

### Étape 1 : Installer les vis

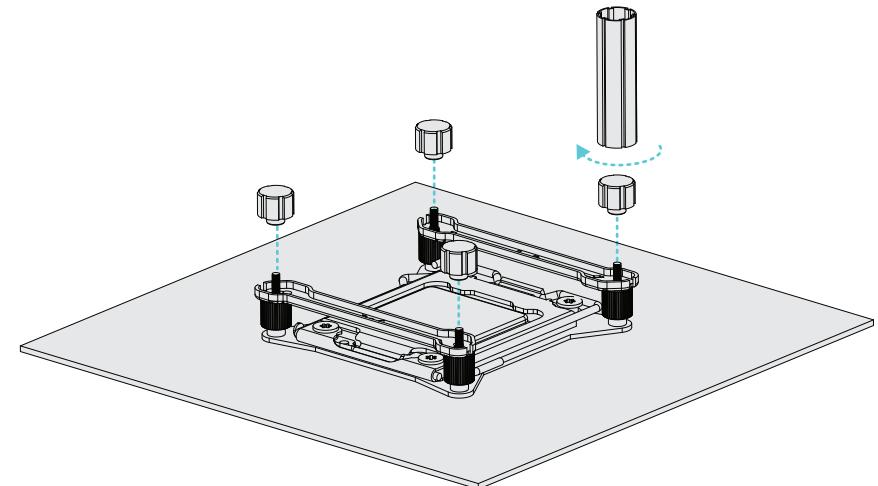

Installer les boulons Intel LGA2011 sur la carte mère.

\*La plus grande extrémité de la vis doit être tournée vers le bas.

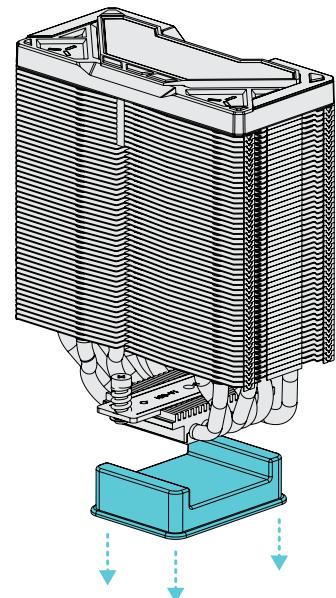

### Étape 2 : Installer les supports

Placer les supports sur les boulons et les serrer avec des écrous à l'aide d'une douille à écrou.

### Étape 3 : Retirer le film de protection

Retirer le film de protection de la plaque froide.

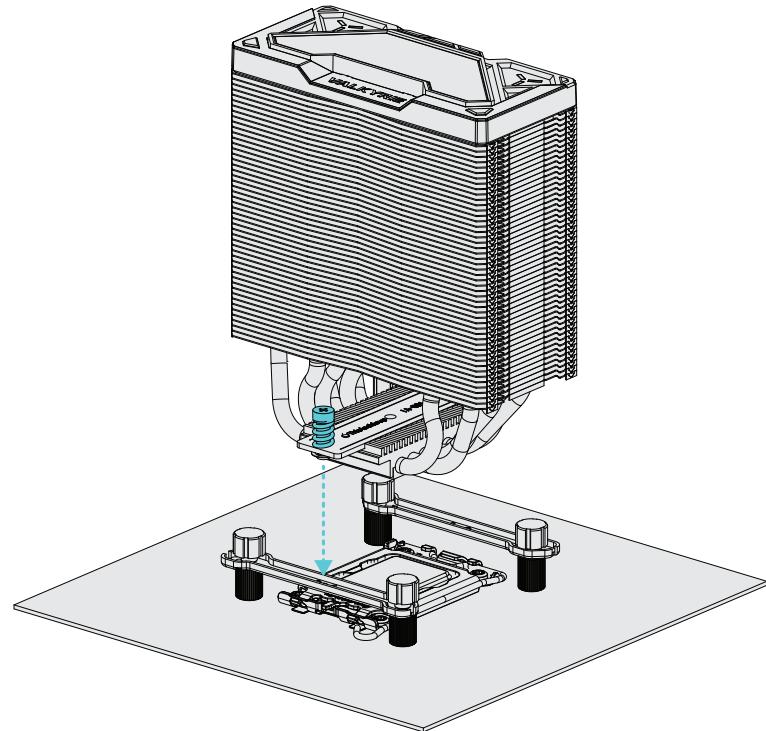

**FR Étape 5 : Installer le refroidisseur**

FR

Aligner le refroidisseur sur les trous et le visser sur les supports.

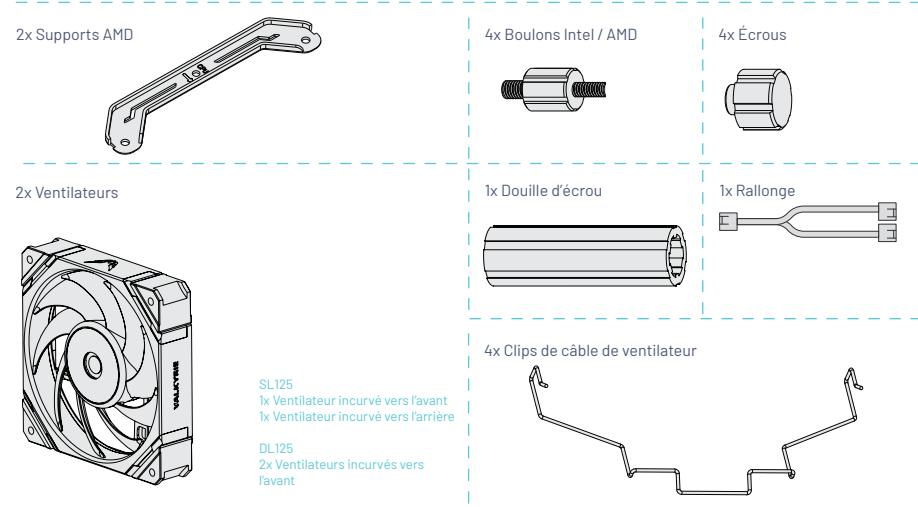

\*Soyez prudent. NE touchez PAS la graisse de silicone thermoconductrice pré-appliquée sur le fond.

**Étape 6 : Terminer l'installation**

Veuillez vous référer au document Installer le ventilateur et le câblage pour installer et connecter les ventilateurs au refroidisseur.

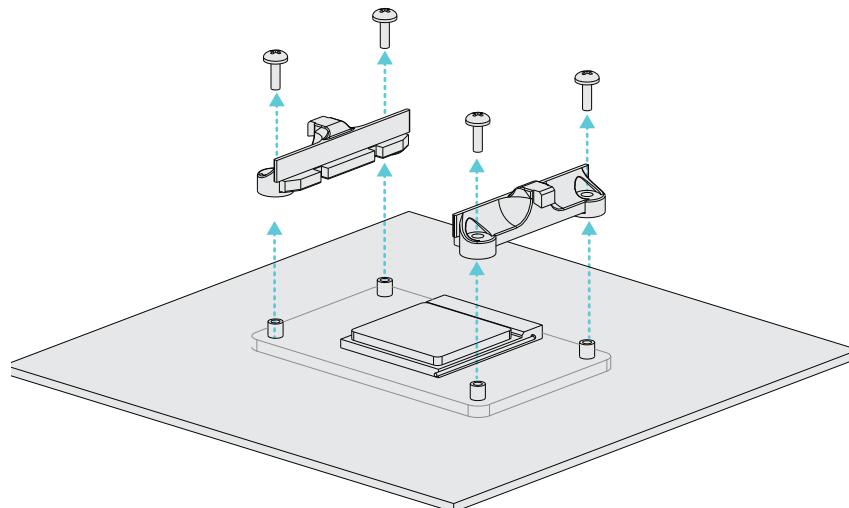

## FR Installation de l'AMD AM4/AM5

Nous avons marqué les pièces nécessaires à l'installation de la plateforme AMD/AM4 pour vous.

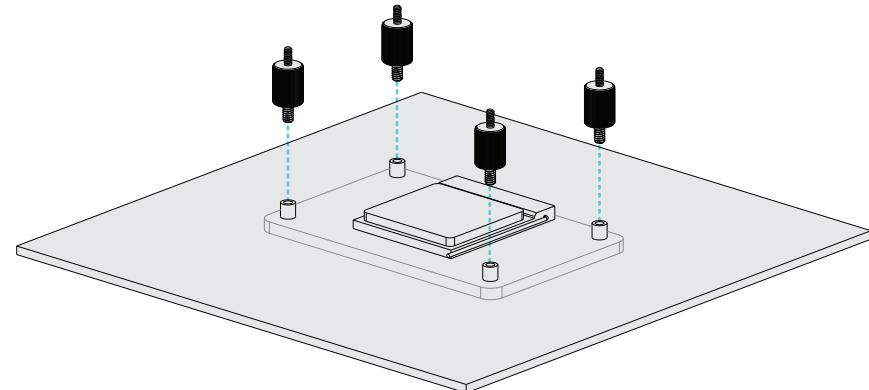

### Étape 1 : Préparer la carte mère

Visser les 4 boulons. Retirer le support d'origine de la carte mère. Conserver la plaque arrière d'origine.

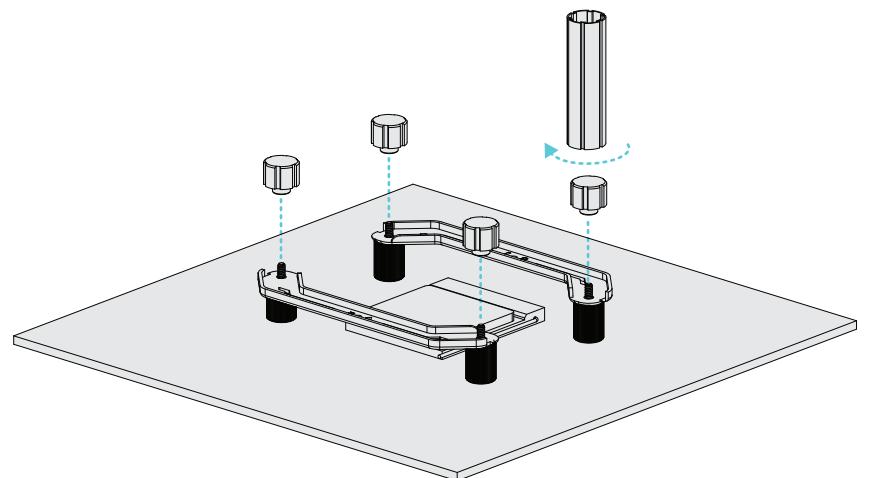

### Étape 2 : Installer les vis

Installer les boulons INTEL/AMD sur la plaque arrière.  
\*La plus grande extrémité de la vis est tournée vers le bas.

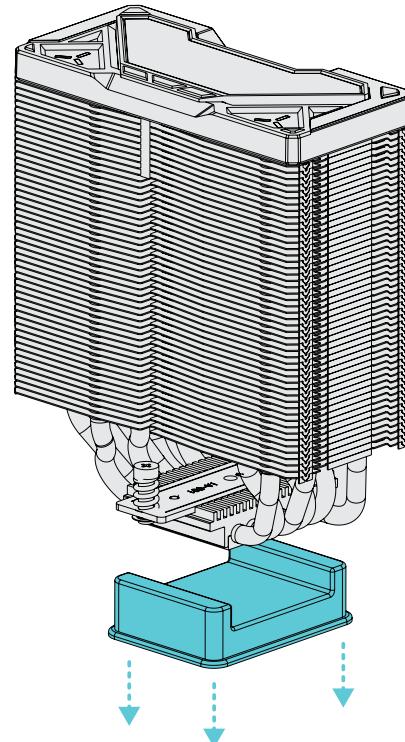

### Étape 3 : Installer les supports

Placer les supports sur les boulons et les serrer avec des écrous à l'aide d'une douille à écrou.

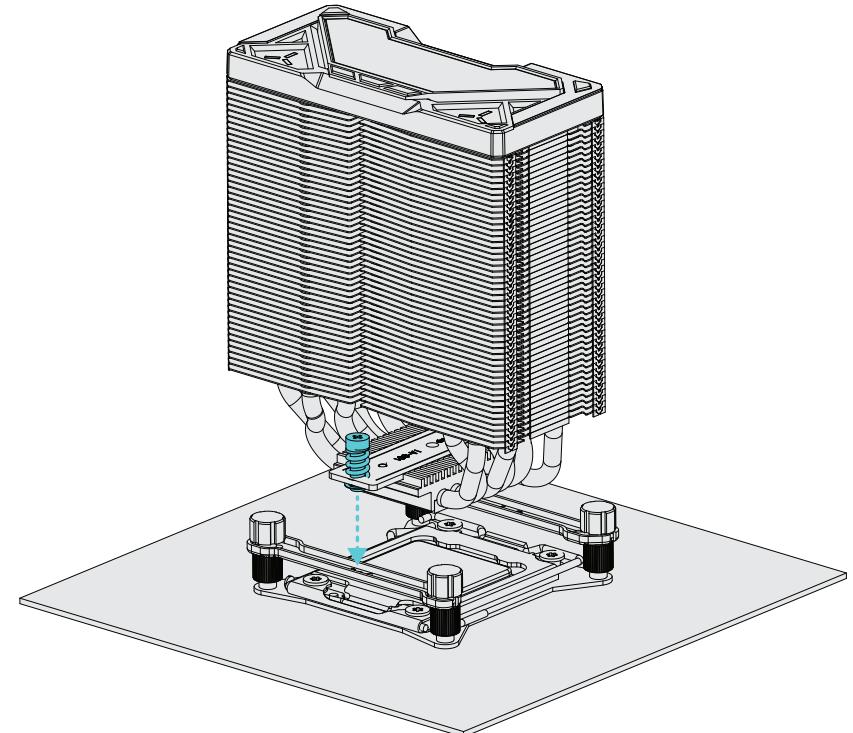

**FR Étape 4 : Retirer le couvercle de protection**

Retirer le film de protection de la plaque froide.

**Étape 5 : Installer le refroidisseur**

Aligner le refroidisseur sur les trous et le visser sur les supports.

\*Soyez prudent. NE touchez PAS la graisse de silicium thermoconductrice pré-appliquée sur le fond.

**Étape 6 : Terminer l'installation**

Veuillez vous référer à la section Installation du ventilateur et du câblage pour l'installation et la connexion des ventilateurs au refroidisseur.

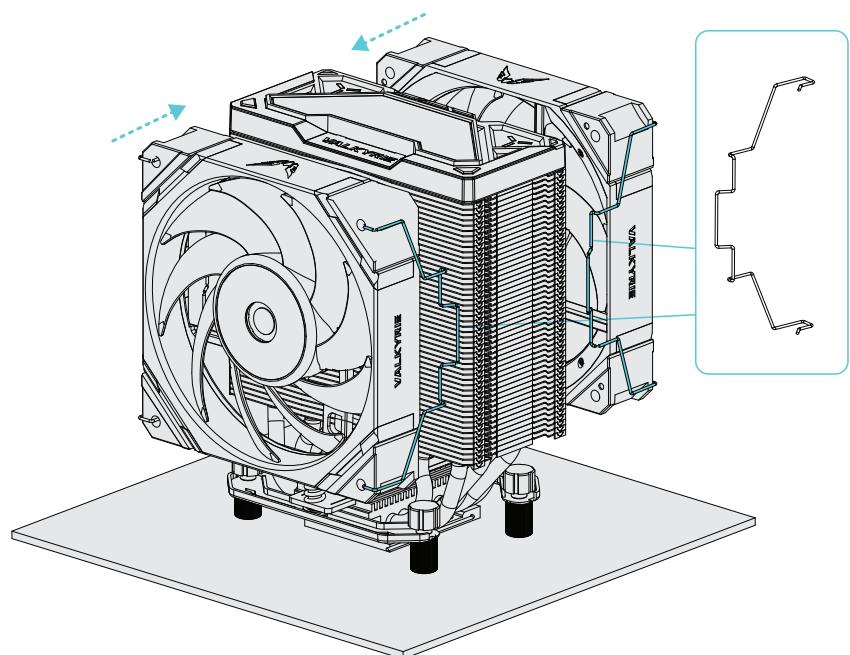

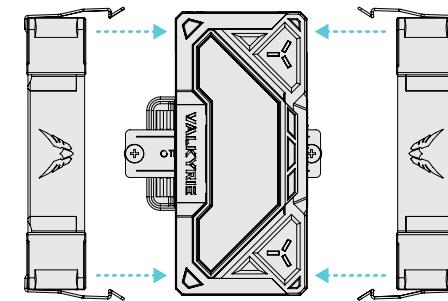

# INSTALLATION DU VENTILATEUR SL125

## Installation du ventilateur SL125

Utiliser les attaches de câble pour fixer le ventilateur au refroidisseur.

\*SL125 est une configuration de ventilateur incurvée vers l'avant/l'arrière. Faites attention à la direction du ventilateur.

\*Le logo du ventilateur (LOGO de l'aile) doit être comme indiqué dans la figure ci-dessous.

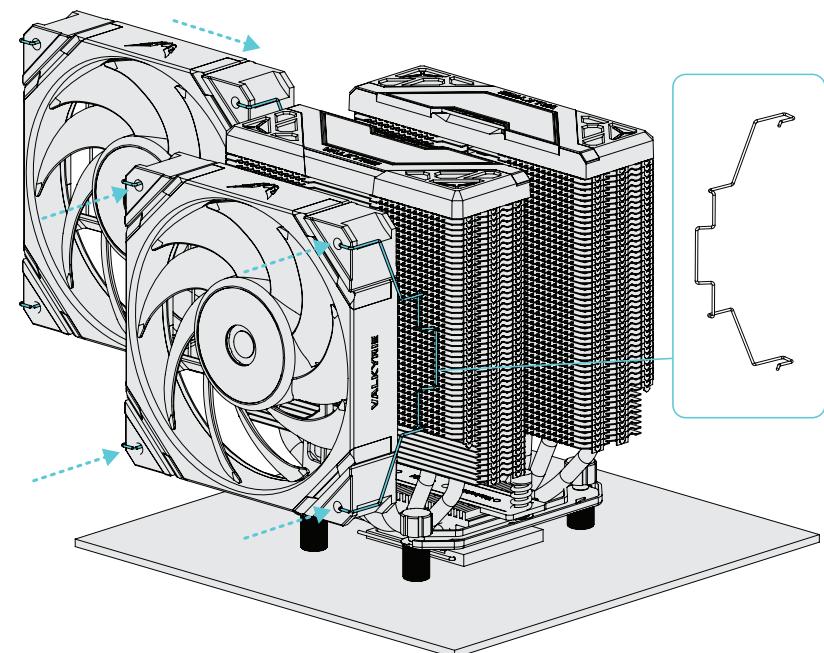

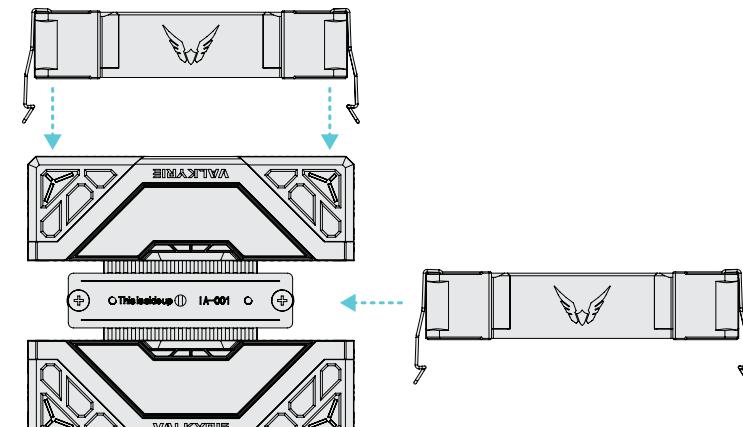

# INSTALLATION DU VENTILATEUR DL125

## Installation du ventilateur DL125

Utiliser les attaches de câble pour fixer le ventilateur au refroidisseur.

\*DL125 est une configuration à deux ventilateurs courbés vers l'avant. Veuillez faire attention à la direction du ventilateur.

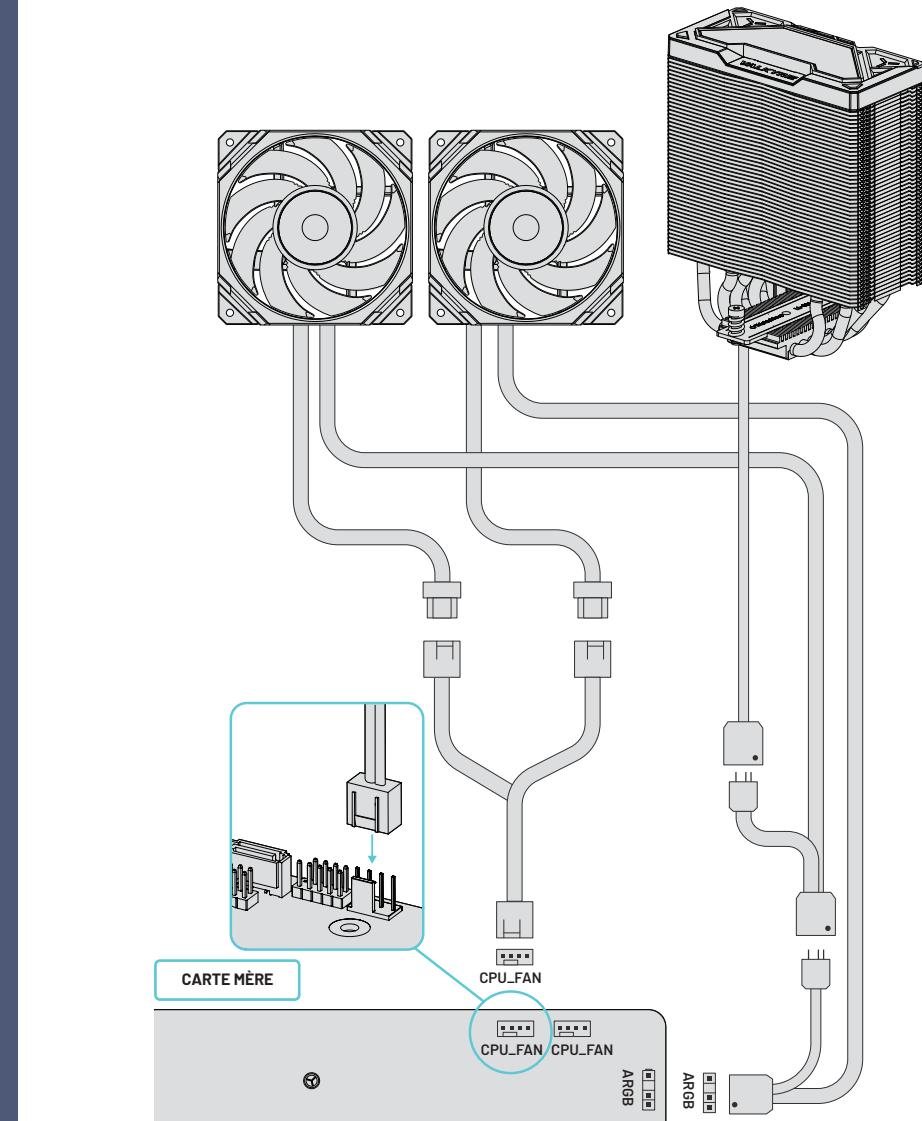

\*Le logo du ventilateur (LOGO de l'aile) doit être comme indiqué dans la figure ci-dessous.

# CÂBLAGE

## Câblage du Ventilateur

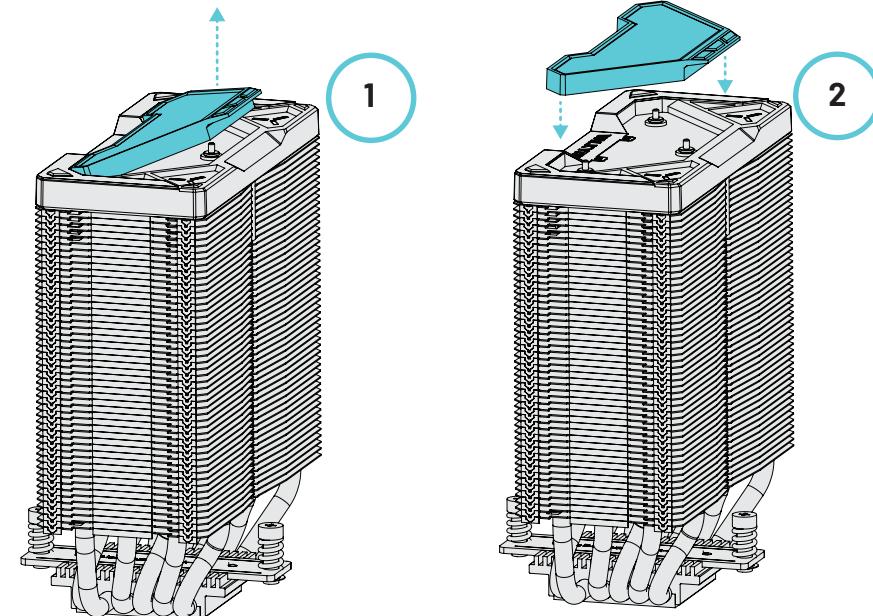

1. Utiliser les câbles pour connecter le câble de ventilateur 4 BROCHES à l'embase CPU\_FAN sur la carte mère.
2. Connecter le connecteur A-RGB des ventilateurs et le corps principal à l'embase A-RGB 5V 3 BROCHES sur la carte mère comme indiqué sur la figure.

## Méthode de remplacement du couvercle supérieur

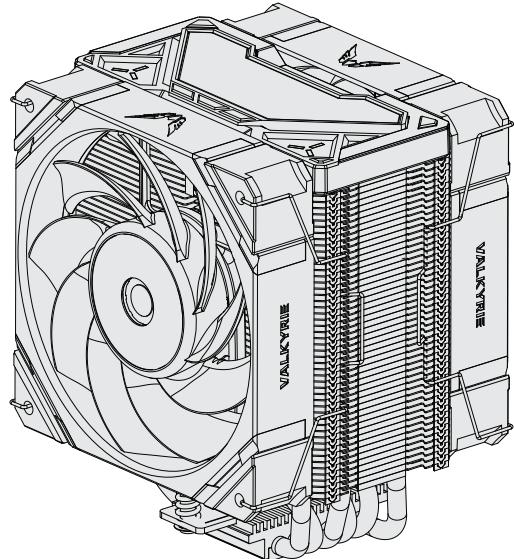

La couverture peut être retirée et remplacée par votre style préféré.  
\*Assurez-vous de commencer par le milieu.

# ►RAFFREDDAMENTO◄ AD ARIA

## Installazione della piattaforma Intel LGA1200/1700

Abbiamo contrassegnato le parti necessarie per l'installazione della piattaforma Intel LGA1200/1700.

1x Piastra posteriore

4x Bulloni per Intel/AMD

4x Bulloni

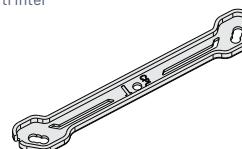

1x Adattatore dadi

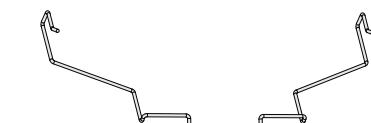

1x Cavo di prolunga

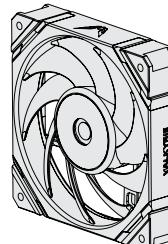

2x Supporti Intel

4x Clip per cavi della ventola

2x Ventole

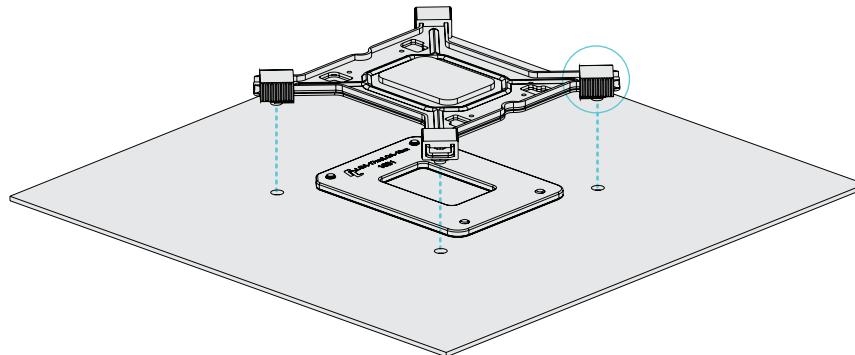

SL125  
1x Ventaglio curvo in avanti  
1x Ventilatore curvo all'indietro

DL125  
2x Ventilatore curvo in avanti

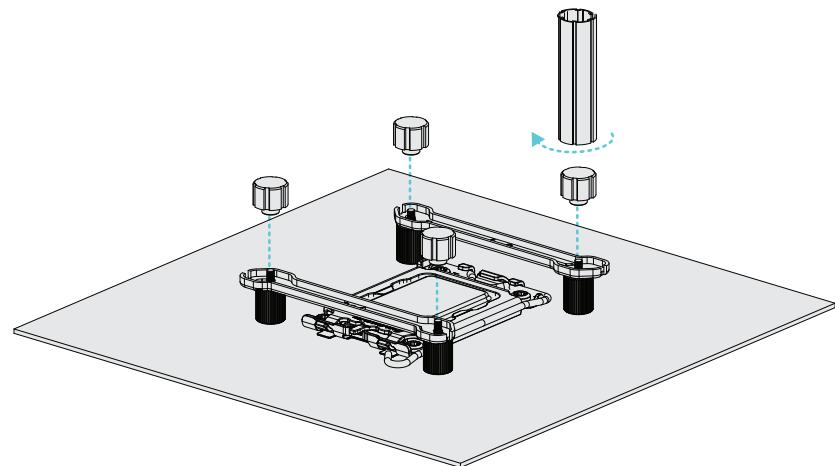

**IT** **Passo 1: Installare i supporti**

1. Allineare la piastra posteriore ai fori corrispondenti della piattaforma.
2. Installare la piastra posteriore sul retro della scheda madre.  
\* Si può far scorrere per regolare l'allineamento con i fori della piattaforma.

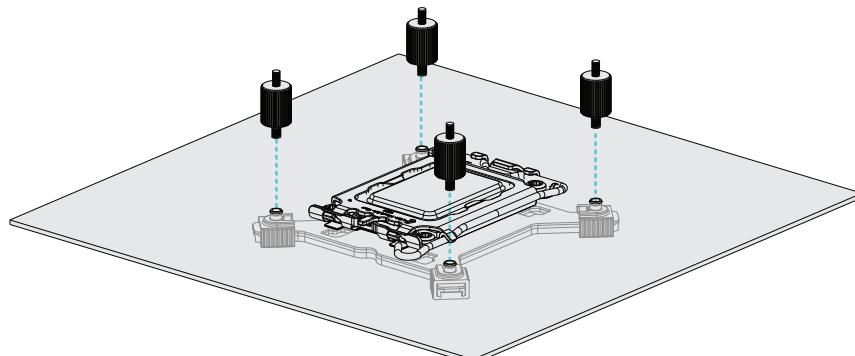

\* Utilizzare la posizione del foro di montaggio interno per il modello 1200 (115X) e la posizione del foro di montaggio esterno per il modello 1700.

**Passo 3: Installare i supporti**

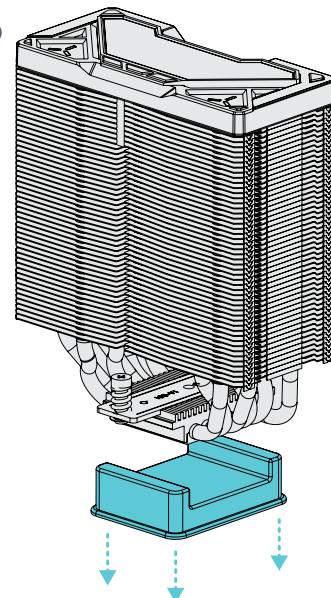

Applicare i supporti sui bulloni e serrarli con i dadi utilizzando un adattatore per dadi.

**Passo 2: Installare le viti**

Installare i bulloni INTEL/AMD sulla piastra posteriore.  
\*L'estremità più grande della vite deve essere rivolta verso il basso.

**Passo 4: Rimuovere il coperchio protettivo**

Rimuovere il coperchio protettivo dalla piastra di raffreddamento.

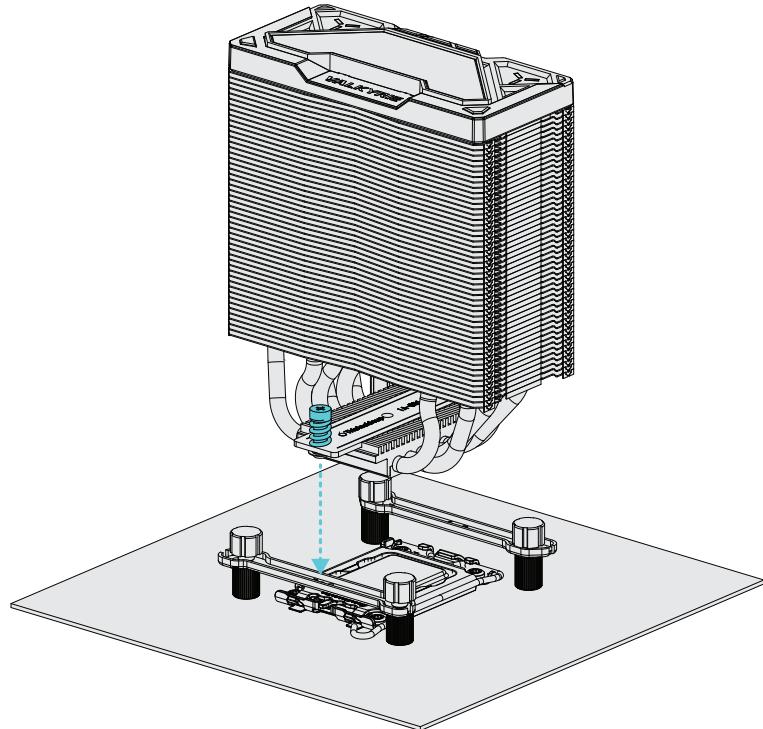

**IT | Passo 5: Installare il raffreddatore**

IT

Allineare il raffreddatore ai fori e avvitarlo ai supporti.

\*Maneggiare con cautela. NON toccare il grasso siliconico termoconduttivo preapplicato sul fondo.

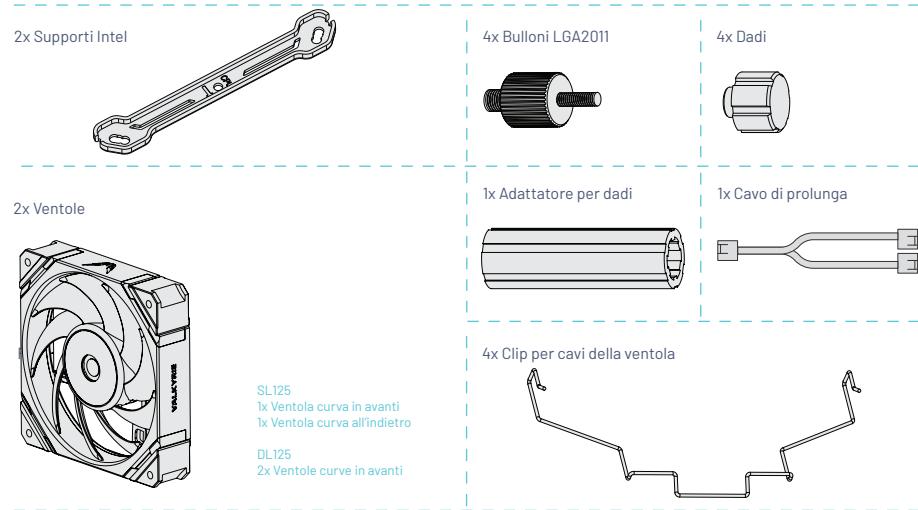

---

**Passo 6: Completare l'installazione**

Per l'installazione e il collegamento delle ventole al raffreddatore, consultare la sezione per l'installazione della ventola e del cablaggio.

# IT Installazione della piattaforma Intel LGA2011/2066

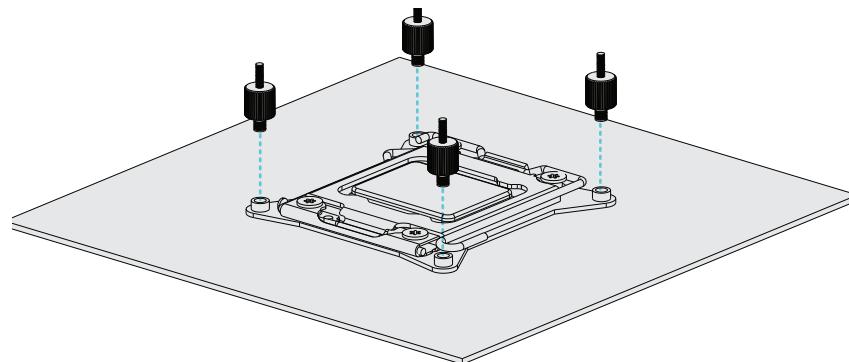

Abbiamo contrassegnato le parti necessarie per l'installazione della piattaforma Intel LGA2011/2066.

## Passo 1: Installare le viti

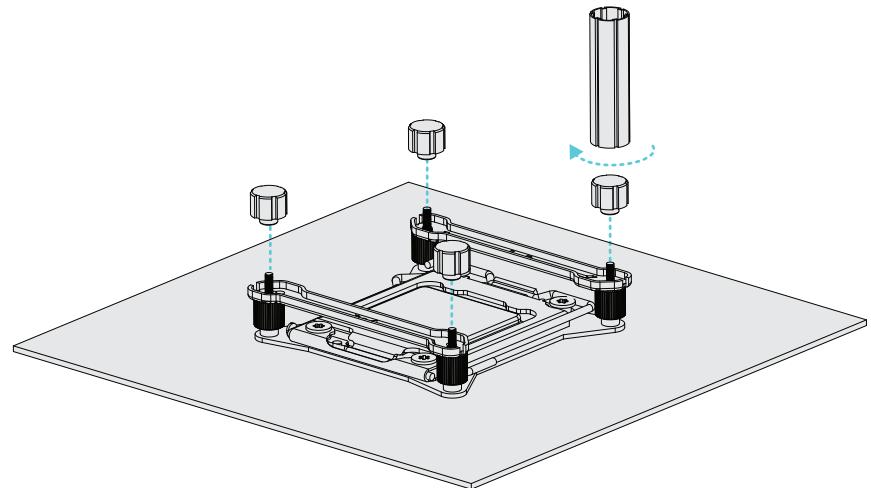

Installare i bulloni Intel LGA2011 sulla scheda madre.

\*Assicurarsi che l'estremità più grande della vite sia rivolta verso il basso.

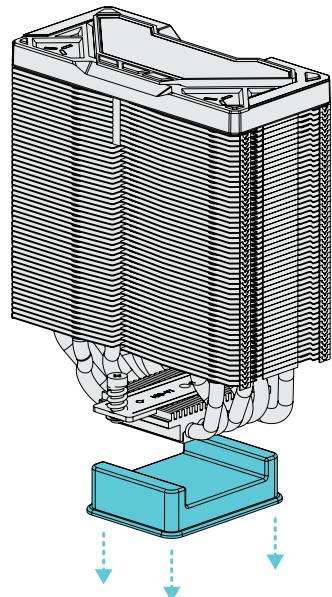

## Passo 2: Installare i supporti

Applicare i supporti sui bulloni e serrarli con i dadi utilizzando un adattatore per dadi.

## Passo 3: Rimuovere il coperchio protettivo

Rimuovere il coperchio protettivo dalla piastra di raffreddamento.

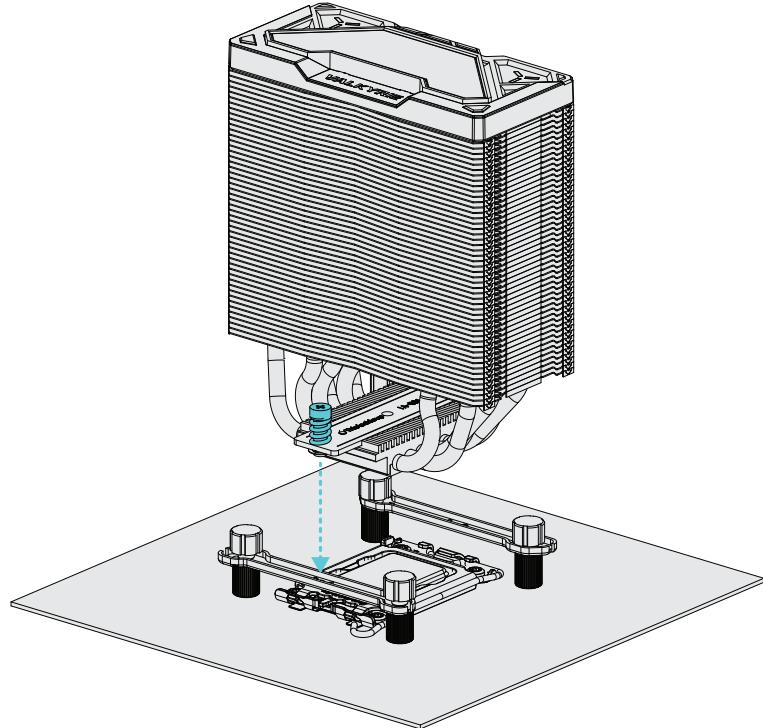

**IT | Passo 5: Installare il raffreddatore**

IT

Allineare il raffreddatore ai fori e avvitarlo ai supporti.

\*Maneggiare con cautela. NON toccare il grasso siliconico termoconduttivo preapplicato sul fondo.

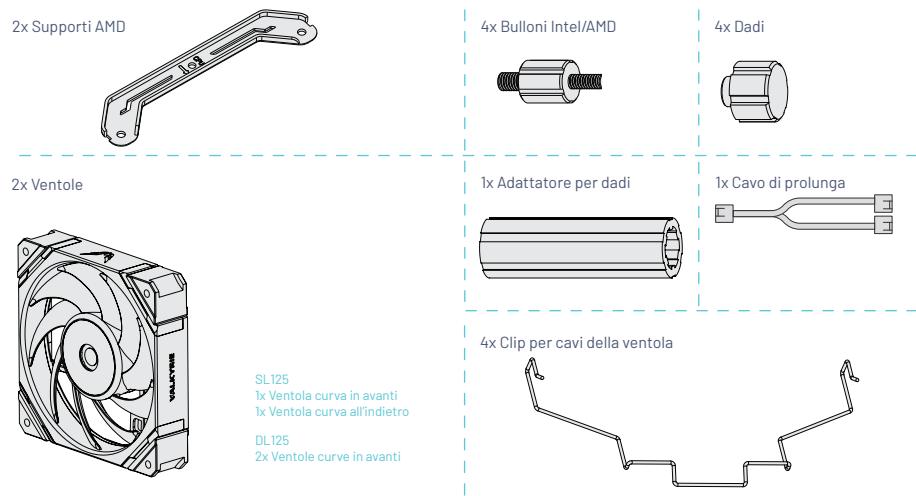

**Passo 6: Completare l'installazione**

Per l'installazione e il collegamento delle ventole al raffreddatore, consultare la sezione per l'installazione della ventola e del cablaggio.

# IT Installazione di AMD AM4/AM5

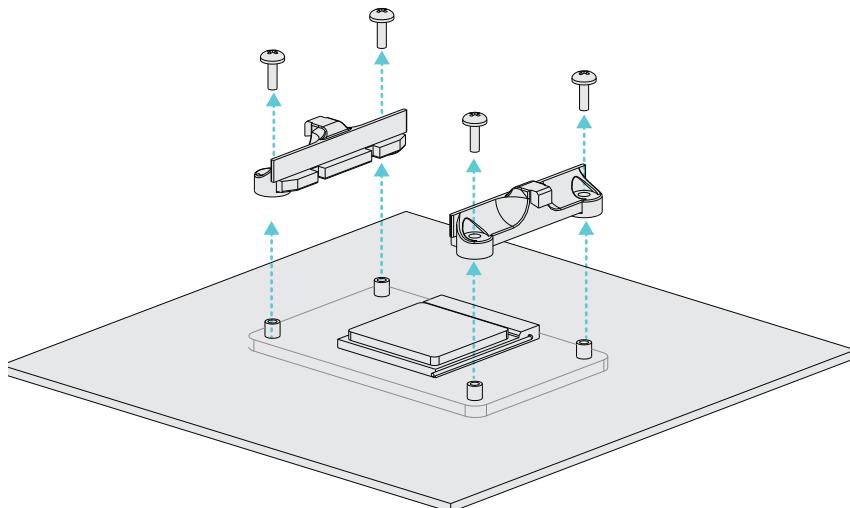

IT

Abbiamo contrassegnato le parti necessarie per l'installazione della piattaforma AMD/AM4.

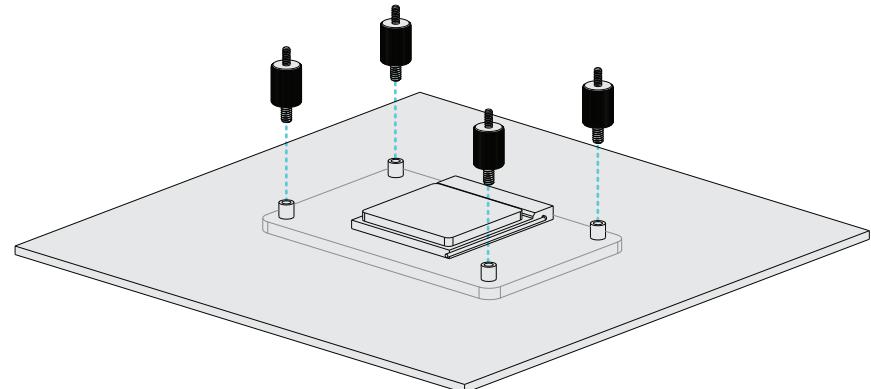

## Passo 1: Preparare la scheda madre

Svitare i 4 bulloni. Rimuovere il supporto originale sulla scheda madre. Conservare la piastra posteriore originale.

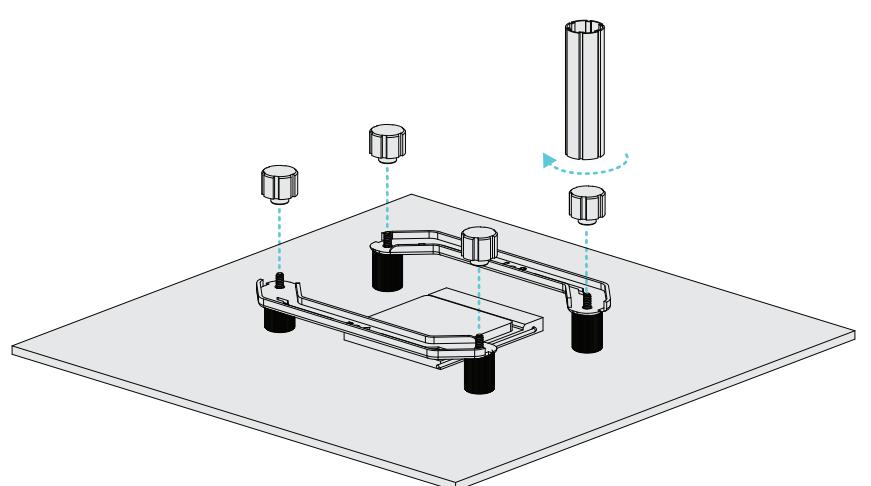

## Passo 2: Installare le viti

Installare i bulloni INTEL/AMD sulla piastra posteriore.  
\*L'estremità più grande della vite deve essere rivolta verso il basso.

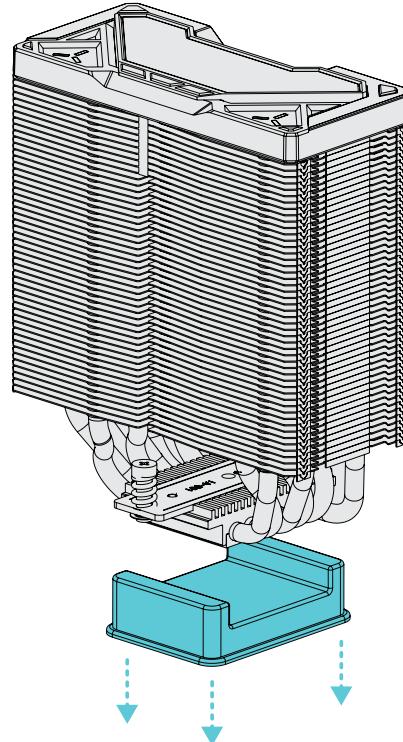

## Passo 3: Installare i supporti

Applicare i supporti sui bulloni e serrarli con i dadi utilizzando un adattatore per dadi.

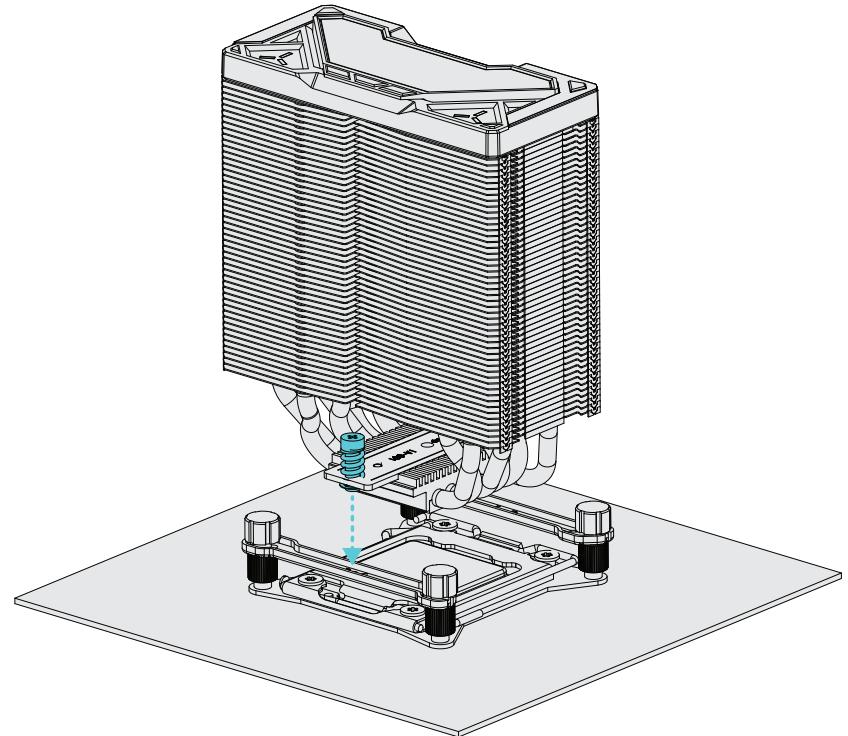

**IT | Passo 4: Rimuovere il coperchio protettivo**

Rimuovere il coperchio protettivo dalla piastra di raffreddamento.

**Passo 5: Installare il raffreddatore**

Allineare il raffreddatore ai fori e avvitarlo ai supporti.

\*Maneggiare con cautela. NON toccare il grasso siliconico termoconduttivo preapplicato sul fondo.

**Passo 6: Completare l'installazione**

Per l'installazione e il collegamento delle ventole al raffreddatore, consultare la sezione Installazione della ventola e del cablaggio.

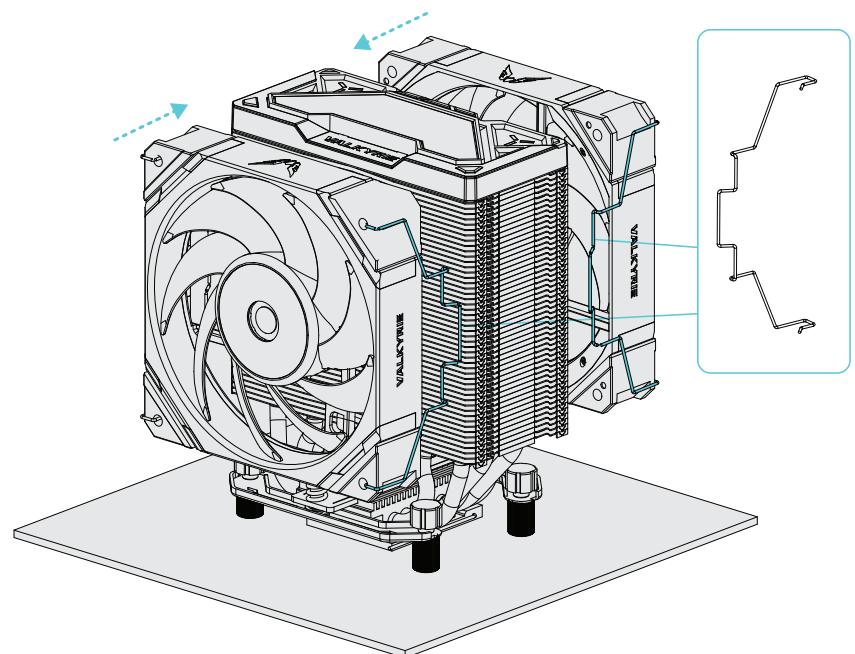

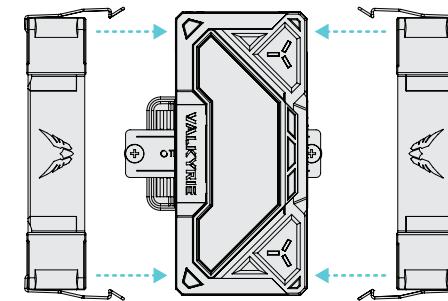

# INSTALLAZIONE VENTOLA SL125

## Installazione ventola SL125

Utilizzare i fermacavi per fissare la ventola al raffreddatore.

\*SL125 è una configurazione della ventola curva avanti/indietro. Prestare attenzione alla direzione della ventola.

\*Il logo della ventola (LOGO dell'ala) deve essere come mostrato nella figura seguente.

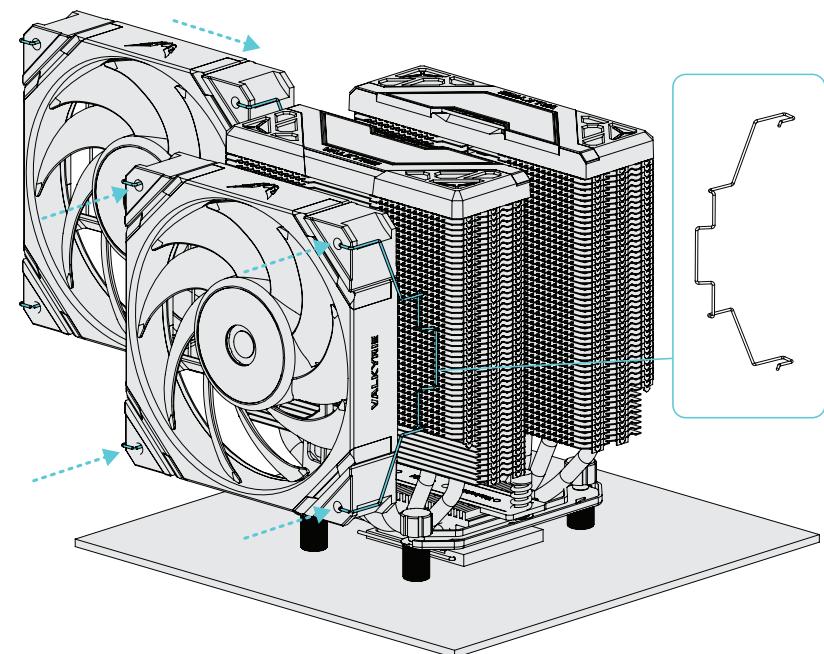

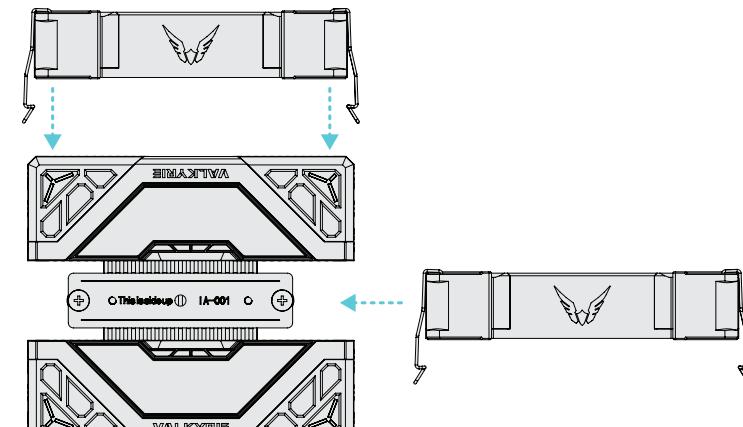

# INSTALLAZIONE VENTOLA DL125

## Installazione ventola DL125

Utilizzare i fermacavi per fissare la ventola al raffreddatore.

\*DL125 è una configurazione con doppia ventola curva in avanti. Prestare attenzione alla direzione della ventola.

\*Il logo della ventola (LOGO dell'ala) deve essere come mostrato nella figura seguente.

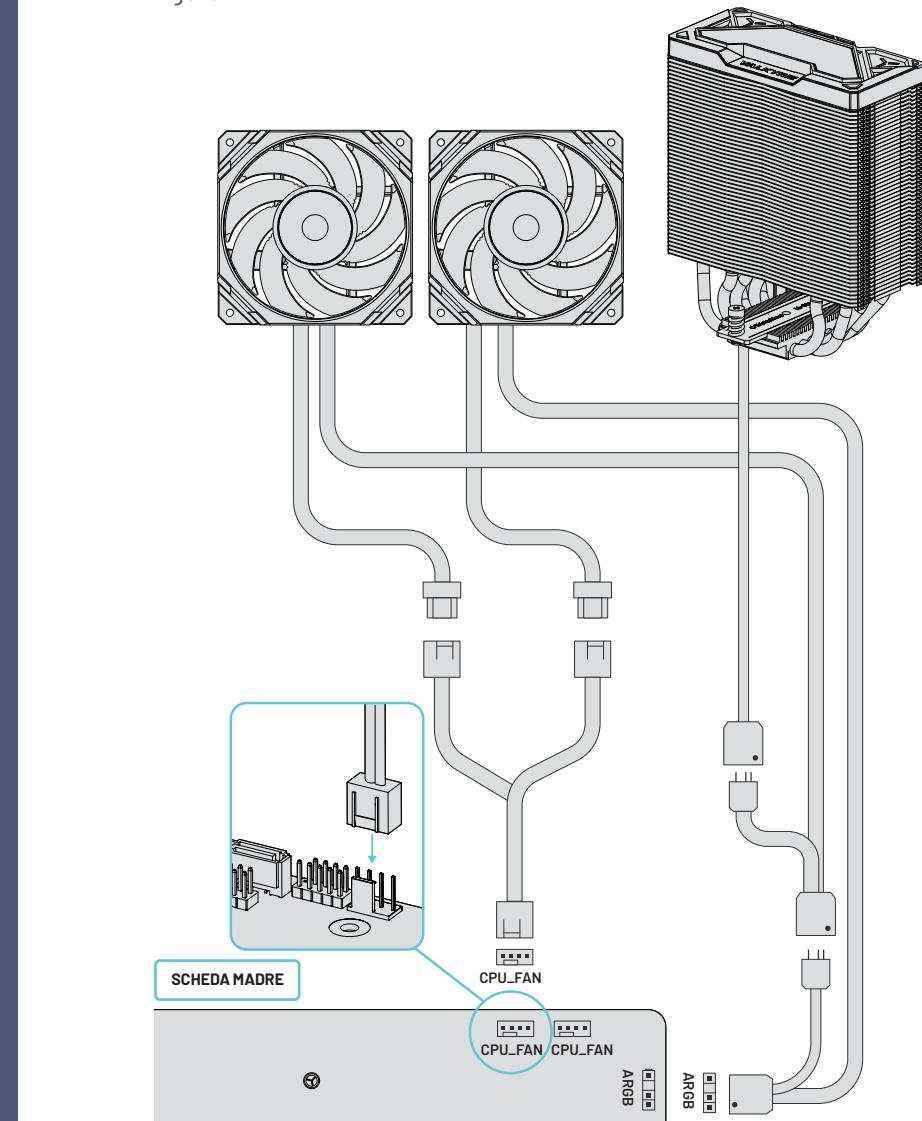

# CABLAGGIO

## Cablaggio della ventola

1. Utilizzare i cavi per collegare il cavo della ventola a 4 poli al terminale CPU\_FAN della scheda madre.

2. Collegare il connettore A-RGB delle ventole e del corpo principale al terminale A-RGB a 3 poli da 5 V della scheda madre, come mostrato nella figura.

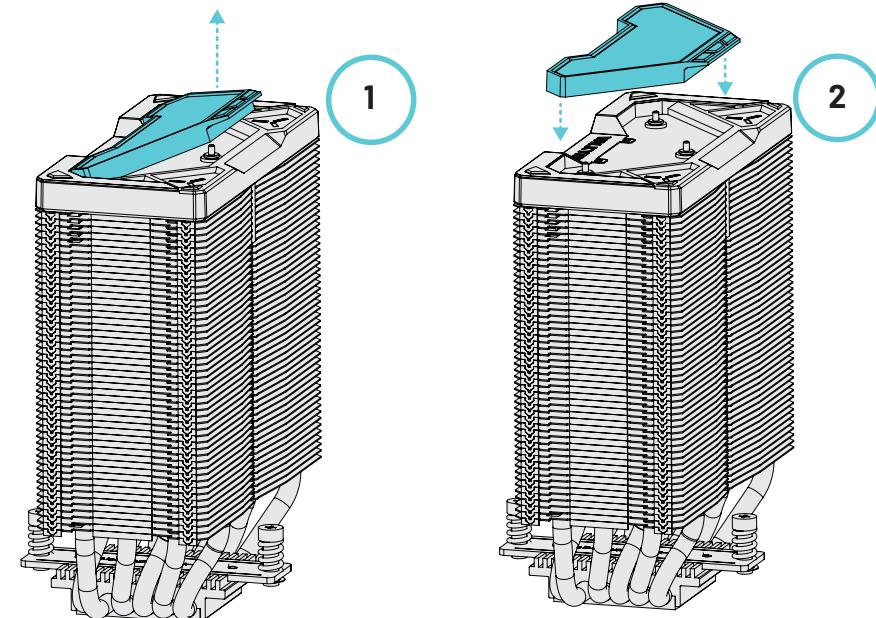

## Metodo di sostituzione del coperchio superiore

Il coperchio può essere rimosso e sostituito a seconda delle vostre preferenze.

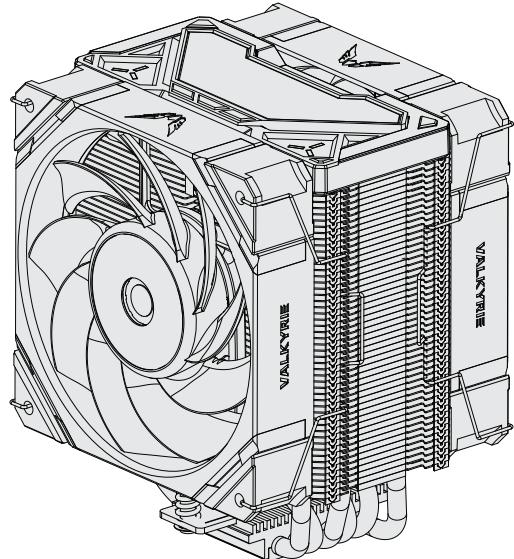

\*Assicuratevi di iniziare dal centro.

# SUGGERIMENTI

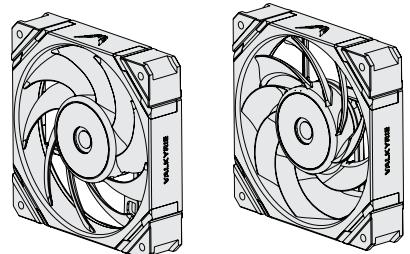

## ES Lista de piezas SL125

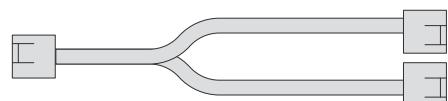

1x Unidad de refrigeración

# REFRIGERACIÓN POR AIRE

## Instalación de Intel LGA1200/1700

Hemos marcado para usted las piezas necesarias para instalar la plataforma LGA1200/1700.

1x Placa posterior Intel

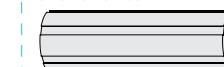

4x Tornillos Intel/AMD

4x Tuerca

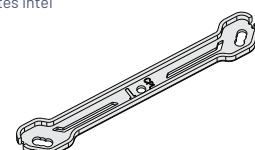

1x Cabezal de llave dinamométrica

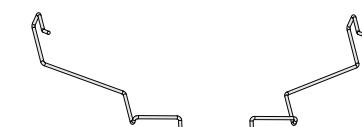

1x Extension Cord

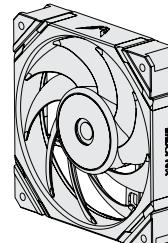

2x Soportes Intel

4x Cordon de extensión

2x Ventilador

SL125  
1x Ventilador curvado hacia delante  
1x Ventilador curvo hacia atrás

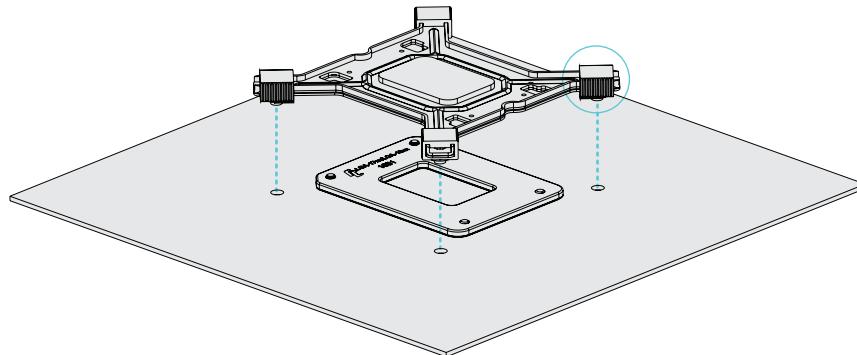

DL125  
2x Ventilador curvado hacia delante

**ES** **Paso 1: instale el soporte**

1. Alinee la placa posterior con los orificios de la plataforma correspondientes.
2. Instale la placa posterior en la parte posterior de la placa base.

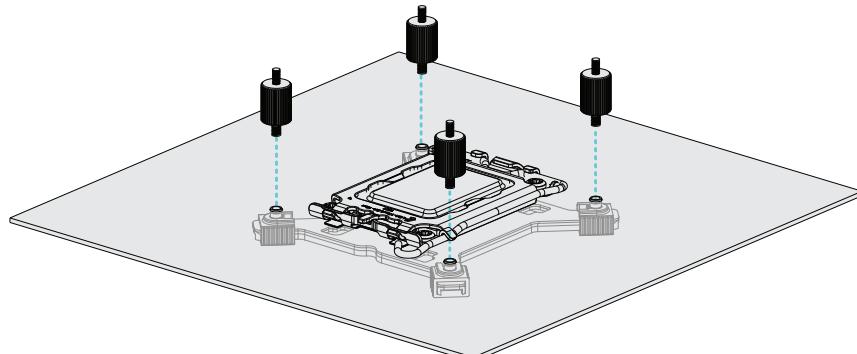

\* Puede deslizarla para alinearla con los orificios correspondientes de la plataforma.

\* Utilice la posición del orificio de montaje interior para 1200 (115X) y la posición del orificio de montaje exterior para 1700.

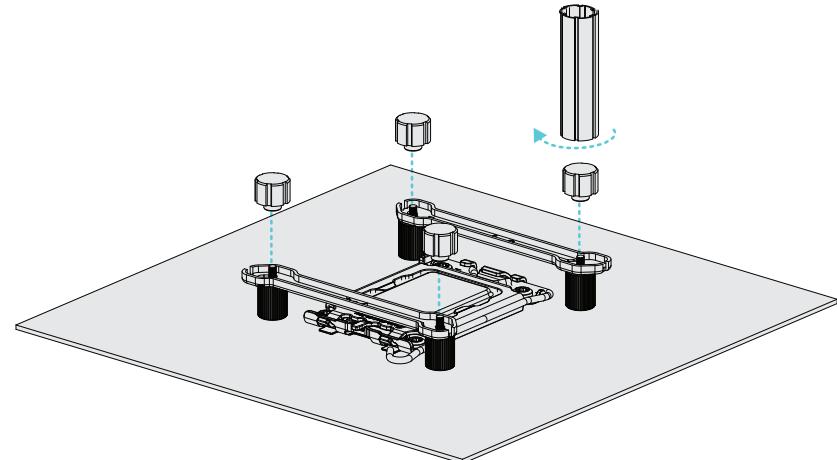

**Paso 2: introduzca los tornillos**

Instale los tornillos INTEL/AMD en la placa posterior.

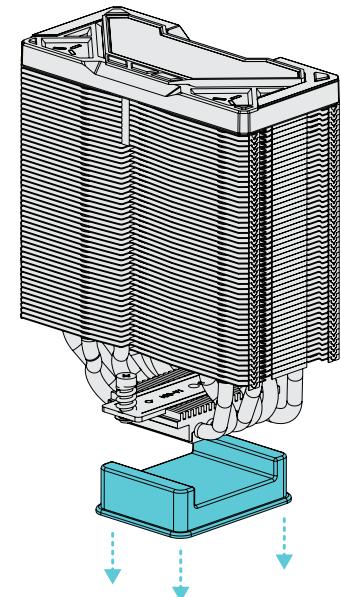

\*El extremo más largo del tornillo mira hacia abajo.

**ES** **Paso 3: instale los soportes**

Coloque los soportes en los tornillos y apriételos con tuercas usando una llave dinamométrica.

**Paso 4: retire la cubierta protectora**

Retire la cubierta protectora de la placa fría.

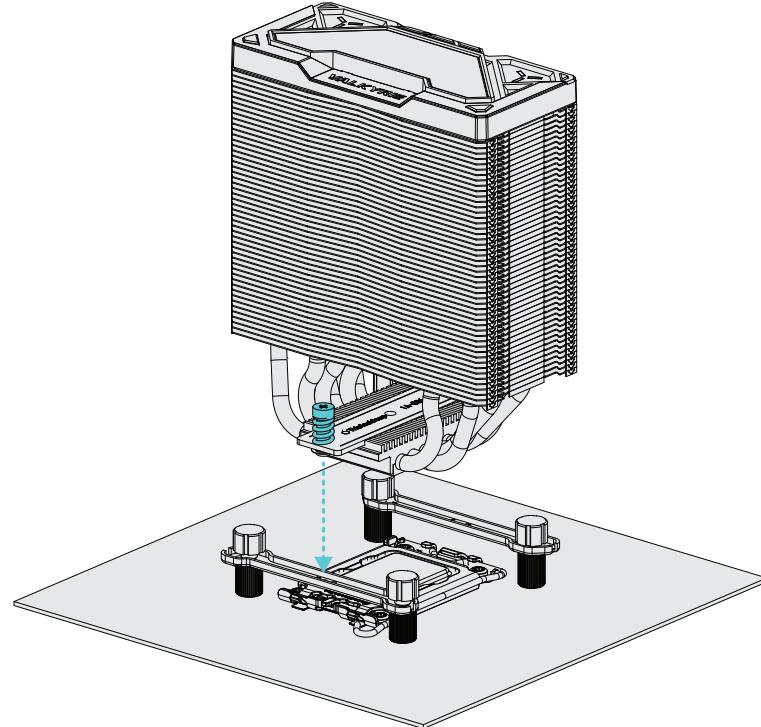

**ES | Paso 5: instale el refrigerador**

ES

Alinee el refrigerador con los orificios y atorníllelo a los soportes.

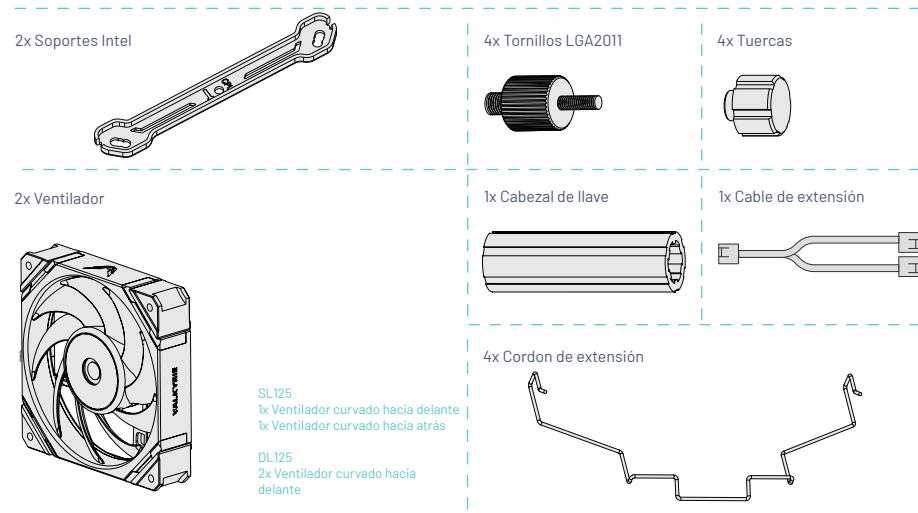

\*Trabaje con precaución. NO toque la grasa de silicona termoconductora que aplicó previamente en la parte inferior.

**Paso 6: instalación finalizada**

Consulte los puntos Instalación del ventilador y cableado para instalar y conectar los ventiladores al refrigerador.

# ES Instalación de Intel LGA2011/2066

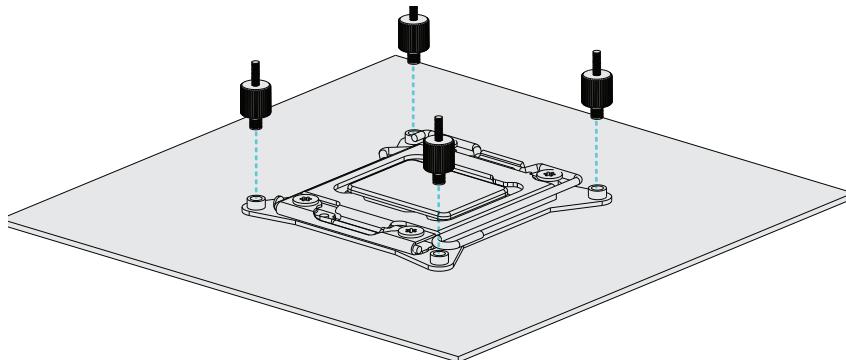

Hemos marcado para usted las piezas necesarias para instalar la plataforma LGA2011/2066.

## Paso 1: introduzca los tornillos

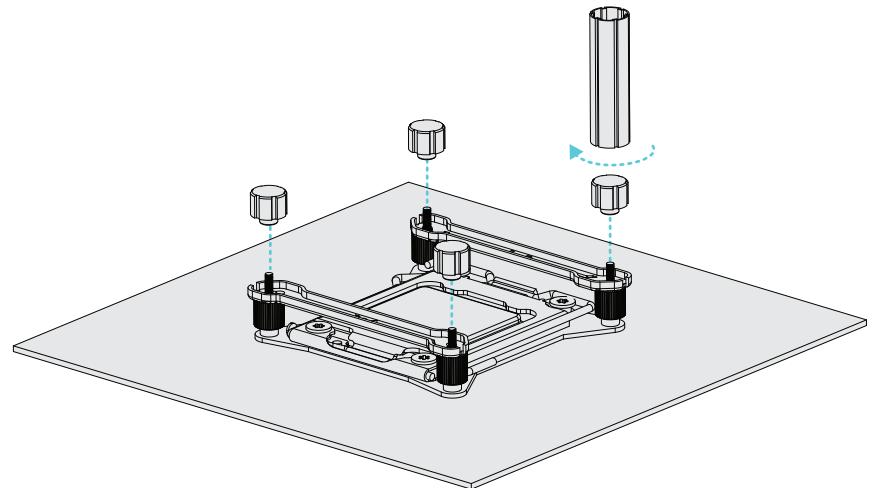

Instale los tornillos Intel LGA2011 en la placa base.

\*Asegúrese de que el extremo más largo del tornillo mira hacia abajo.

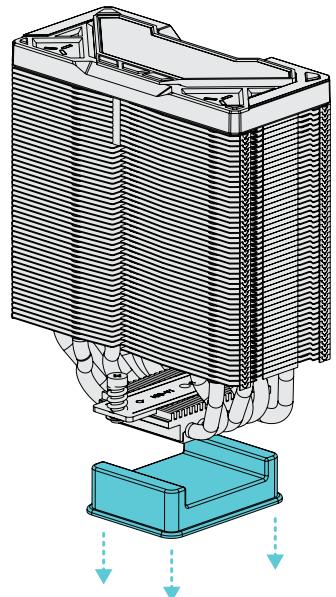

## Paso 2: instale los soportes

Coloque los soportes en los tornillos y apriételos con tuercas usando una llave dinamométrica.

## Paso 3: retire la cubierta protectora

Retire la cubierta protectora de la placa fría.

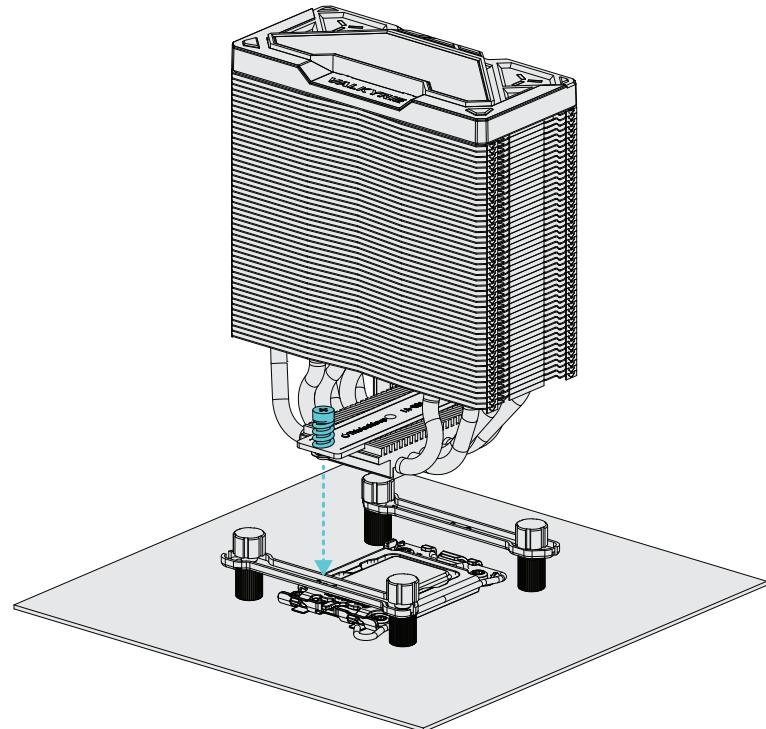

**ES | Paso 5: instale el refrigerador**

ES

Alinee el refrigerador con los orificios y atornílelo a los soportes.

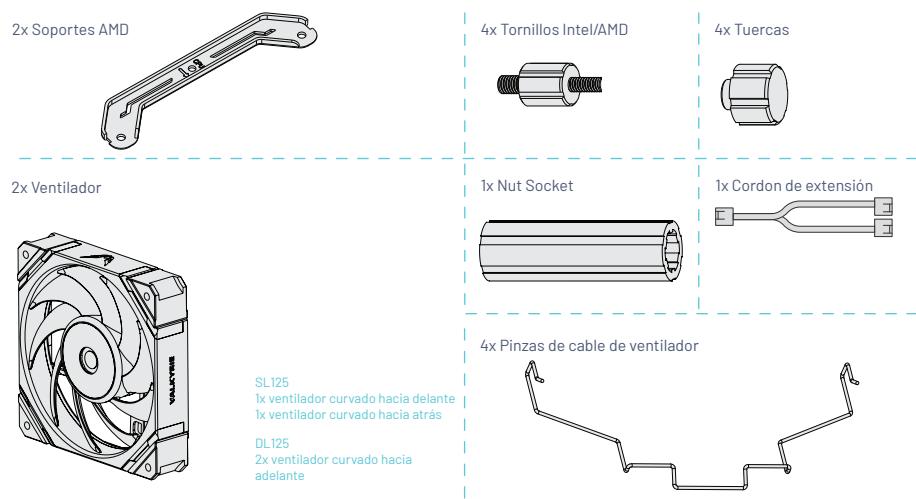

\*Trabaje con precaución. NO toque la grasa de silicona termoconductora que aplicó previamente en la parte inferior.

**Paso 6: instalación finalizada**

Consulte los puntos Instalación del ventilador y cableado para instalar y conectar los ventiladores al refrigerador.

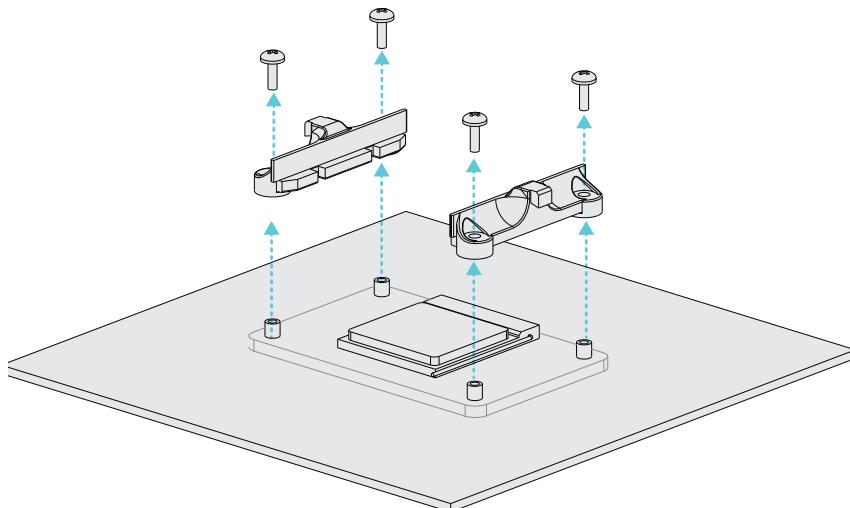

## ES Instalación de AMD AM4/AM5

Hemos marcado para usted las piezas necesarias para instalar la plataforma AMD/AM4.

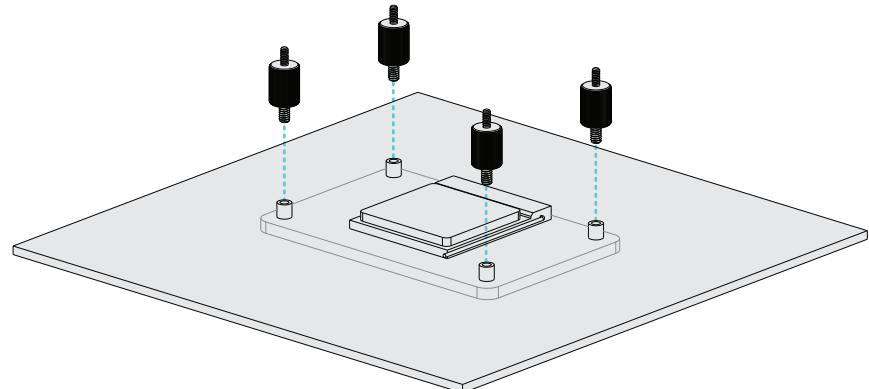

### Paso 1: prepare la placa base

Atornille los 4 tornillos. Retire el soporte original de la placa base. Guarde la placa posterior original.

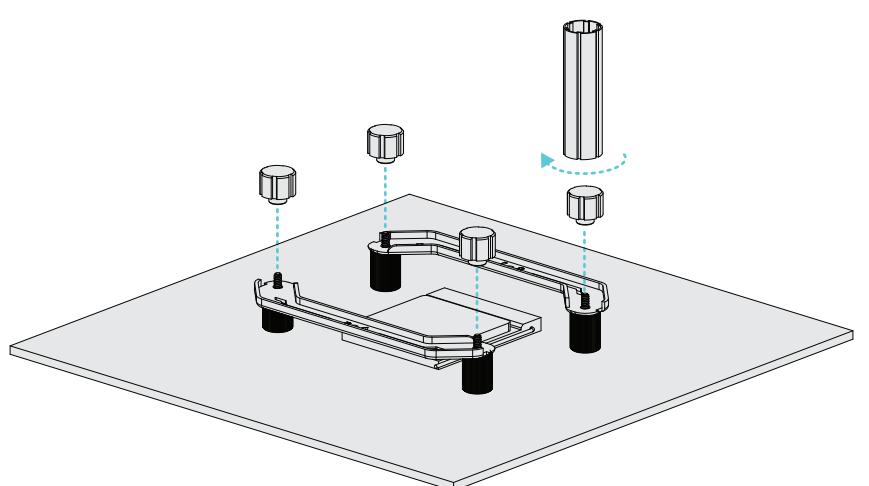

### Paso 2: introduzca los tornillos

Instale los tornillos INTEL/AMD en la placa posterior.  
\*El extremo más largo del tornillo mira hacia abajo.

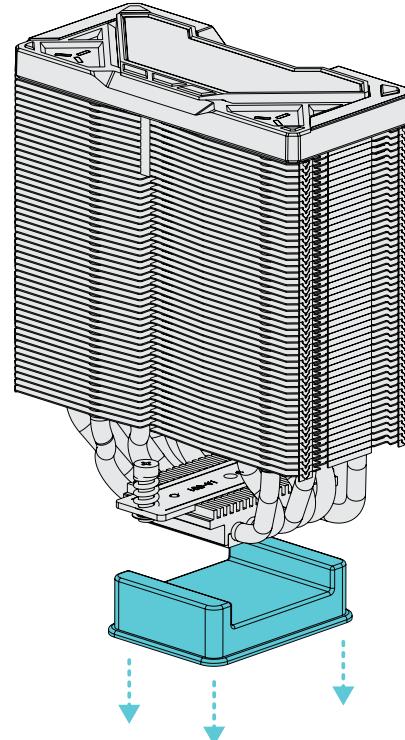

### Paso 3: instale los soportes

Coloque los soportes en los tornillos y apriételos con tuercas usando una llave dinamométrica.

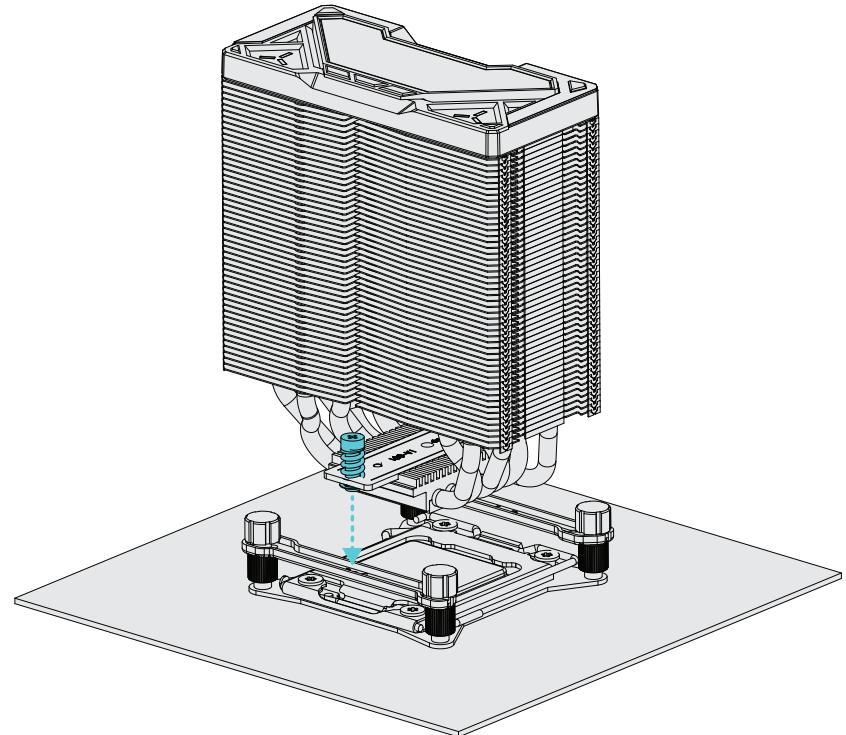

**ES** **Paso 4: retire la cubierta protectora**

Retire la cubierta protectora de la placa fría.

**Paso 5: instale el refrigerador**

Alinee el refrigerador con los orificios y atorníllelo a los soportes.

\*Trabaje con precaución. NO toque la grasa de silicona termoconductora que aplicó previamente en la parte inferior.

**Paso 6: Completar la instalación**

Consulte la sección Instalación del ventilador y cableado para instalar y conectar los ventiladores al refrigerador.

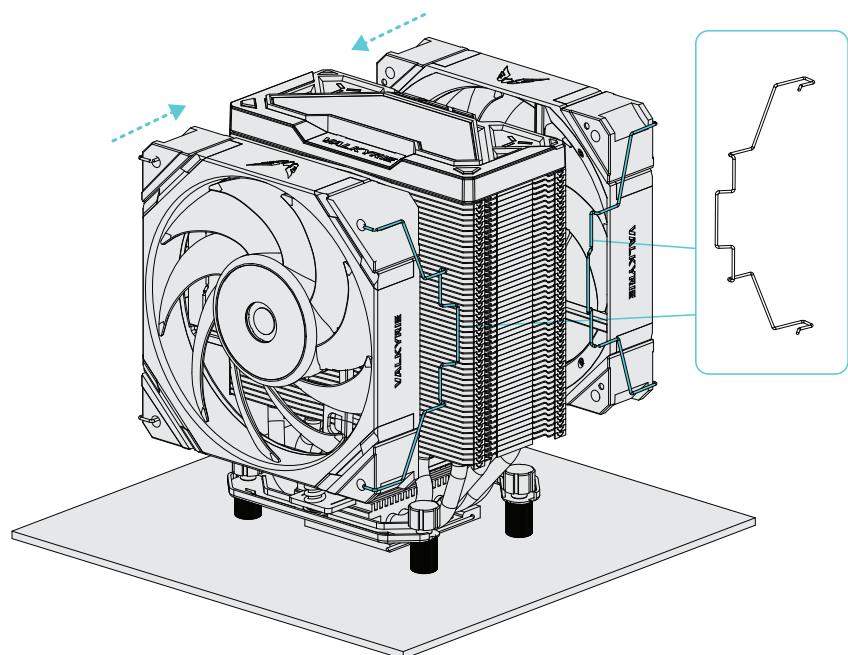

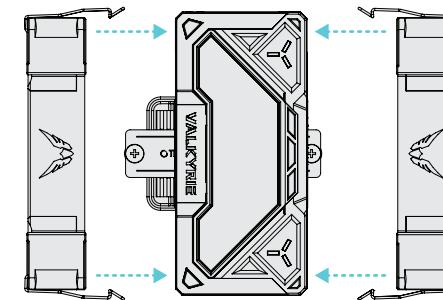

# INSTALACIÓN DE VENTILADOR SL125

## Instalación de ventilador SL125

Utilice las pinzas de cable para fijar el ventilador al refrigerador.

\*SL125 tiene una configuración de ventilador curvado hacia adelante/hacia atrás. Por favor, preste atención a la dirección del ventilador.

\*El logotipo del ventilador (LOGO del ala) debe quedar como se muestra en la figura a continuación.

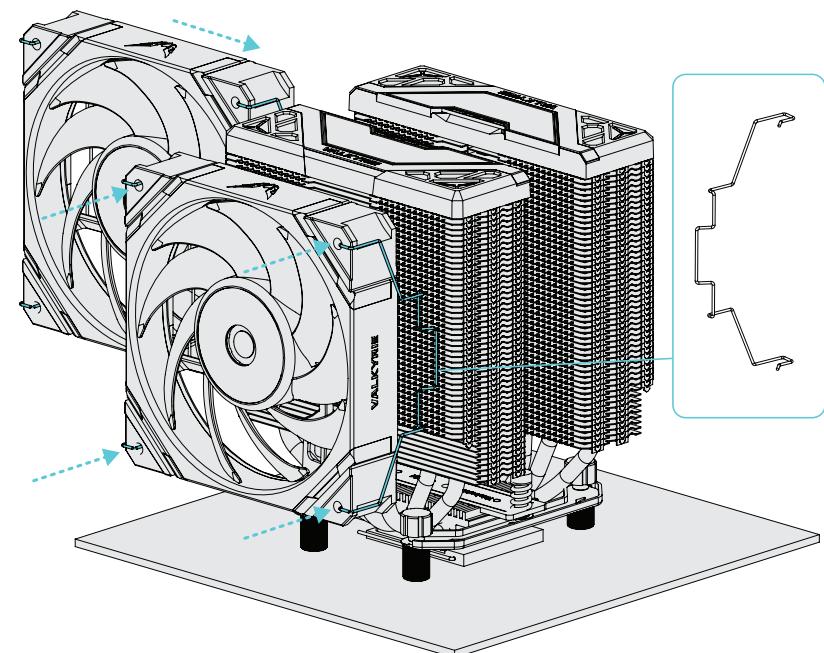

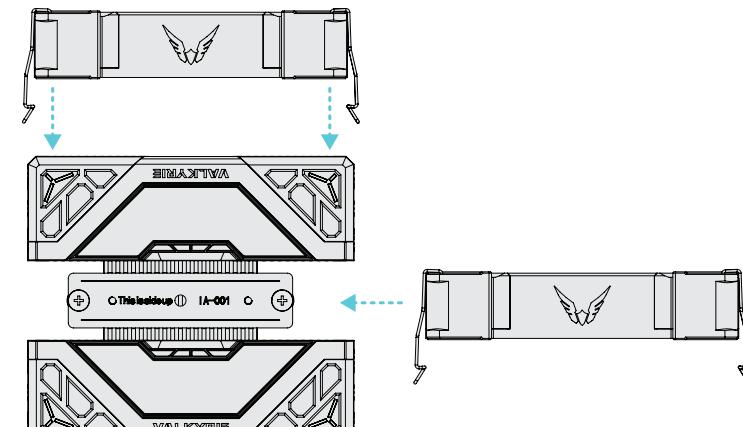

# INSTALACIÓN DE VENTILADOR SL125

## Instalación de ventilador DL125

Utilice las pinzas de cable para fijar el ventilador al refrigerador.

\*DL125 es una configuración de doble ventilador curvado hacia delante. Por favor, preste atención a la dirección del ventilador.

\*El logotipo del ventilador (LOGO del ala) debe quedar como se muestra en la figura a continuación.

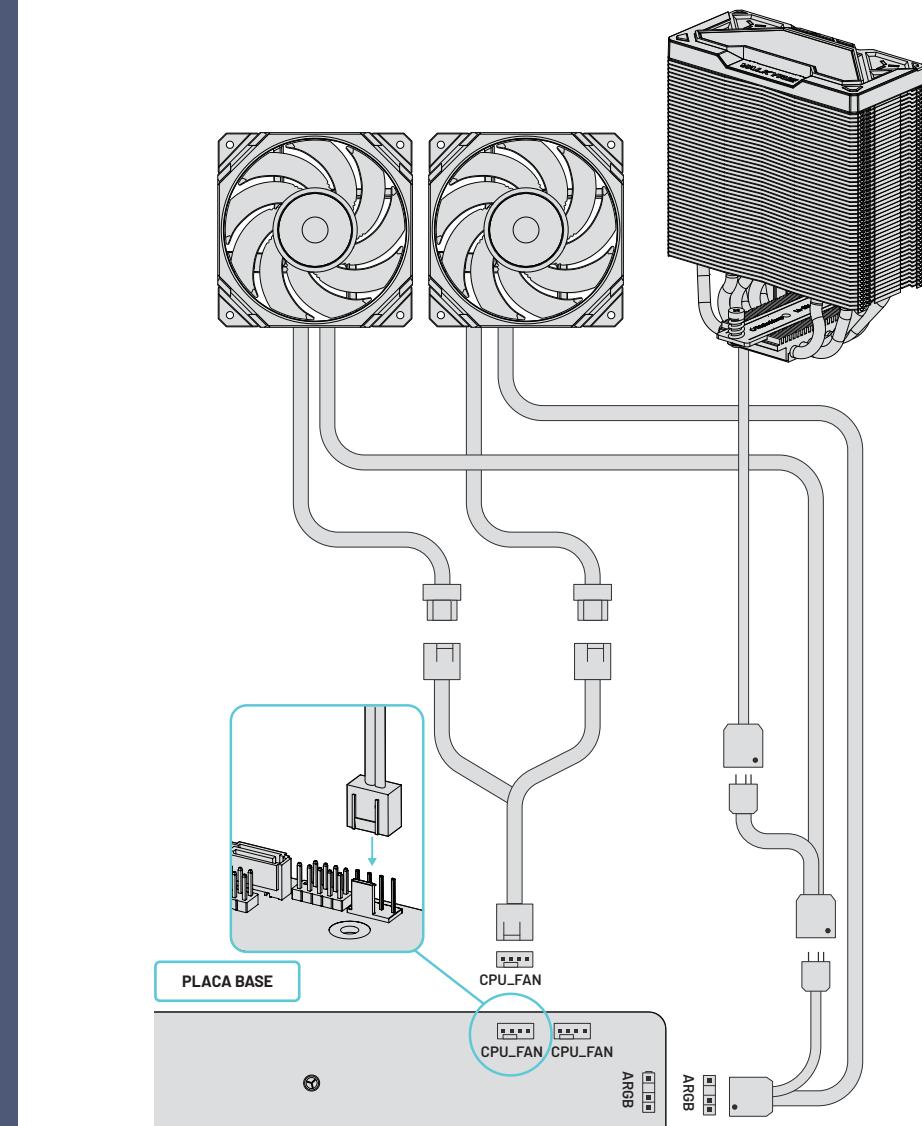

# CABLEADO

## Cableado del ventilador

1. Utilice los cables para conectar el cable del ventilador de 4PIN al cabezal CPU\_FAN de la placa base.

2. Conecte el conector A-RGB de los ventiladores y el cuerpo principal al cabezal A-RGB de 5 V y 3 PINES en la placa base como se muestra en la figura.

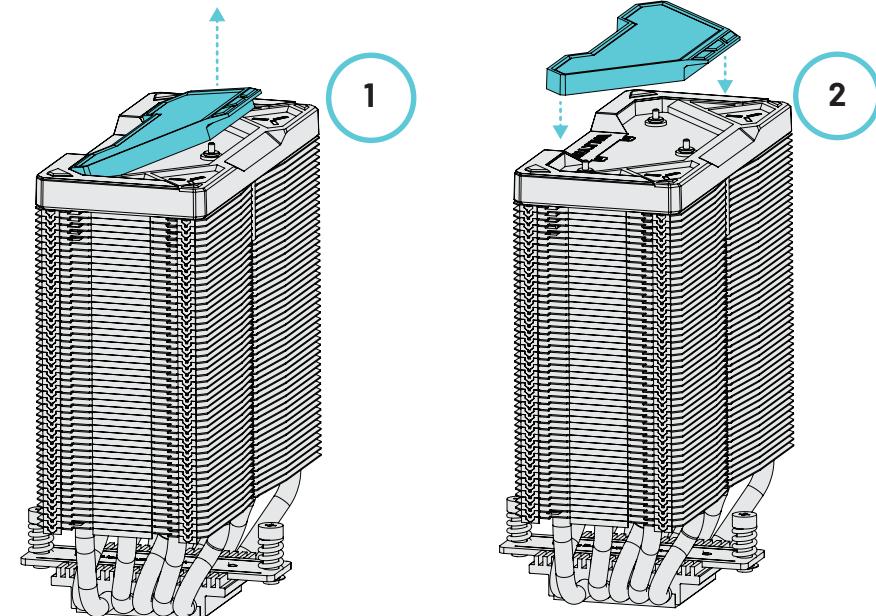

## Método de sustitución de la cubierta superior

Puede quitar la cubierta y reemplazarla por otra de su preferencia.

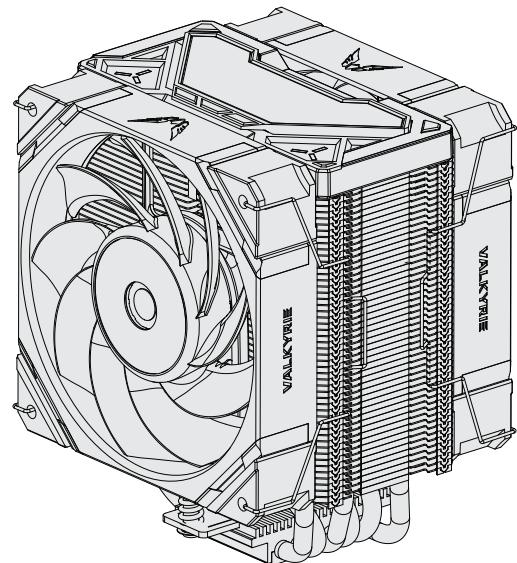

\*Asegúrese de empezar por el medio.

# CONSEJOS

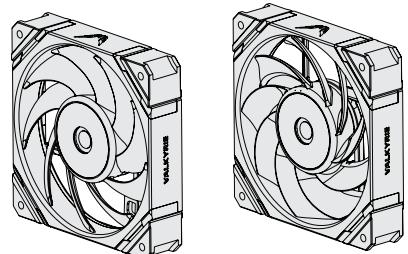

# PT | Lista de peças SL125

# REFRIGERAÇÃO DEAR

## Instalação Intel LGA1200/1700

Marcámos para si as peças necessárias para instalar a plataforma Intel LGA1200/1700.

1x Placa traseira Intel

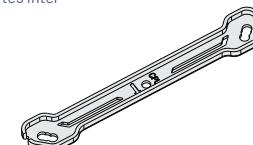

4x Parafusos Intel/AMD

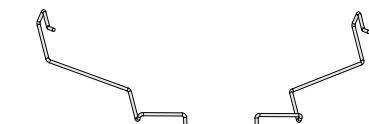

4x Nozes

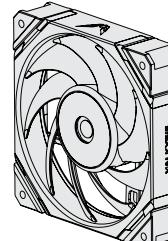

2x Suportes Intel

4x Clipes de cabo do ventilador

2x Ventilador

SL125  
1x Ventilador Curvo para a Frente  
1x Dan Curvado para trás

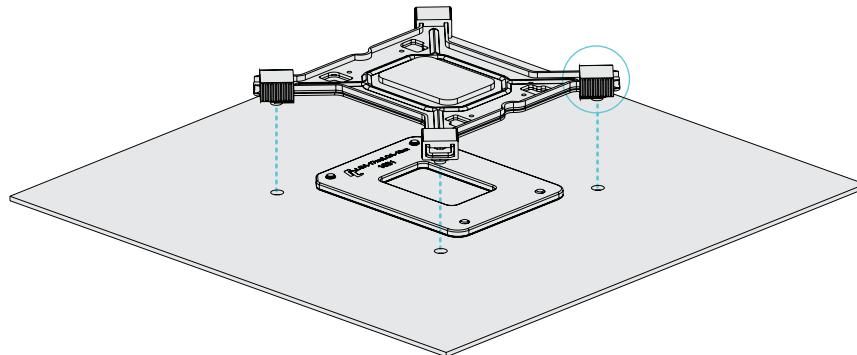

DL125  
2x Ventilador Curvo para a Frente

## Passo 1: Instale o suporte

1. Aline a placa traseira com os orifícios correspondentes da plataforma.
2. Instale a placa traseira na parte traseira da placa-mãe.

\* Poderá deslizar para ajustar o alinhamento com os orifícios.

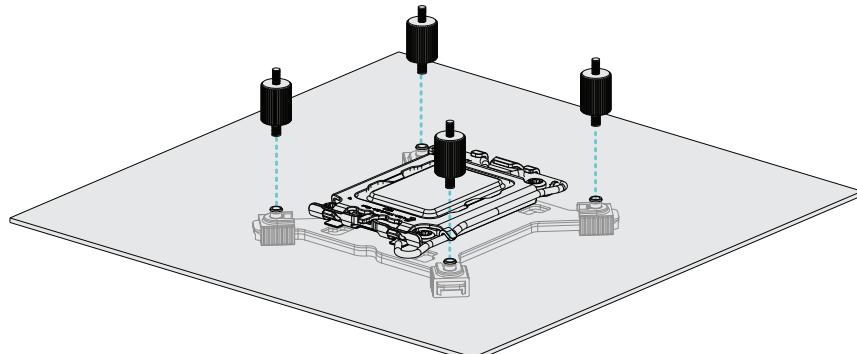

\* Utilize a posição do orifício de montagem interno para 1200 (115X) e a posição do orifício de montagem externo para 1700.

## Passo 2: Instalar os Parafusos

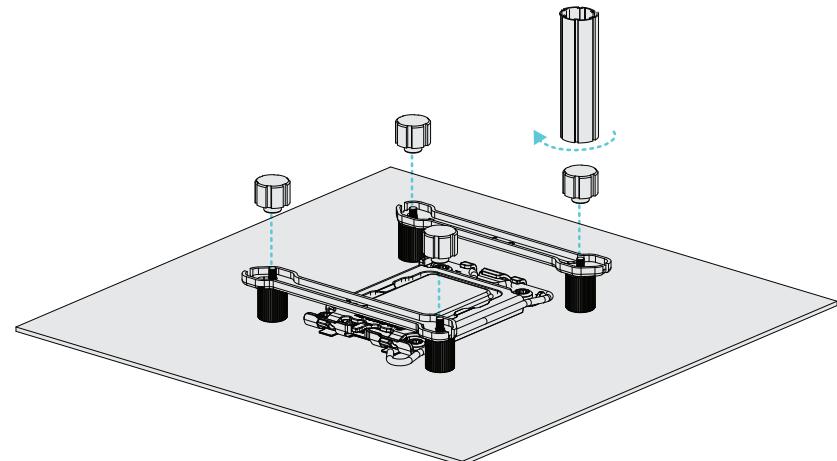

Instale os parafusos INTEL/AMD na placa traseira.

\*A extremidade maior do parafuso fica voltada para baixo.

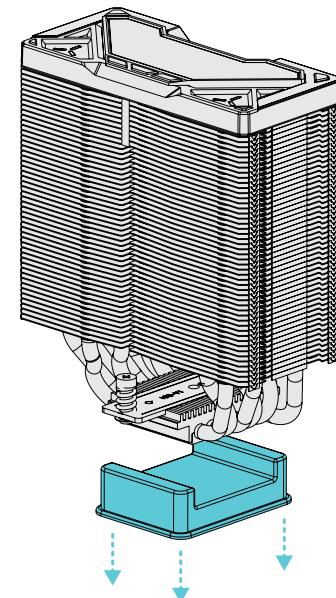

## Passo 3: Instalar os suportes

Coloque os suportes nos parafusos e aperte-os com porcas utilizando um soquete de porca.

## Passo 4: Retire a tampa protetora

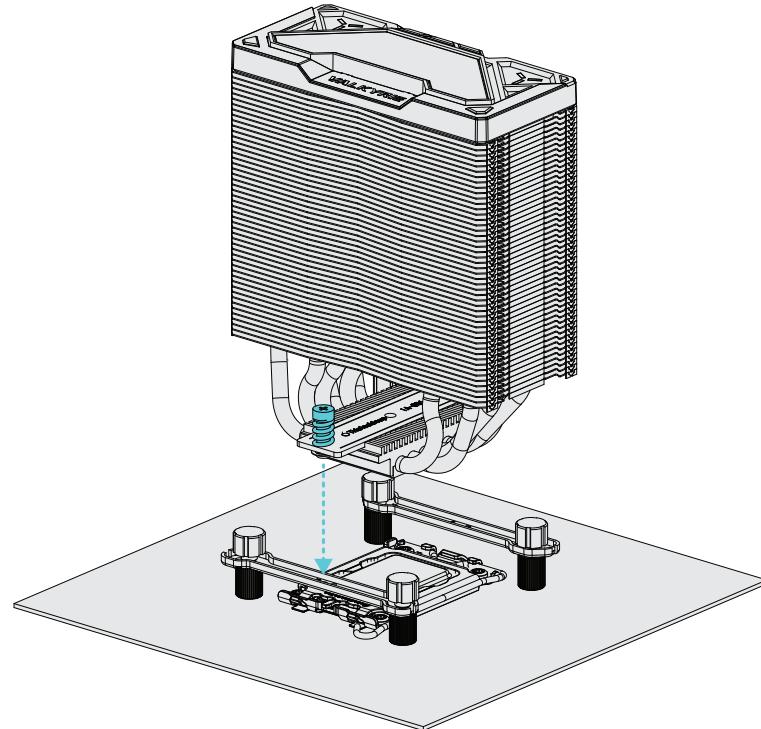

Retire a tampa protetora da placa fria.

**PT** Passo 5: Instalar o refrigerador**PT**

Alinhe o refrigerador aos orifícios e apafuse-o nos suportes.

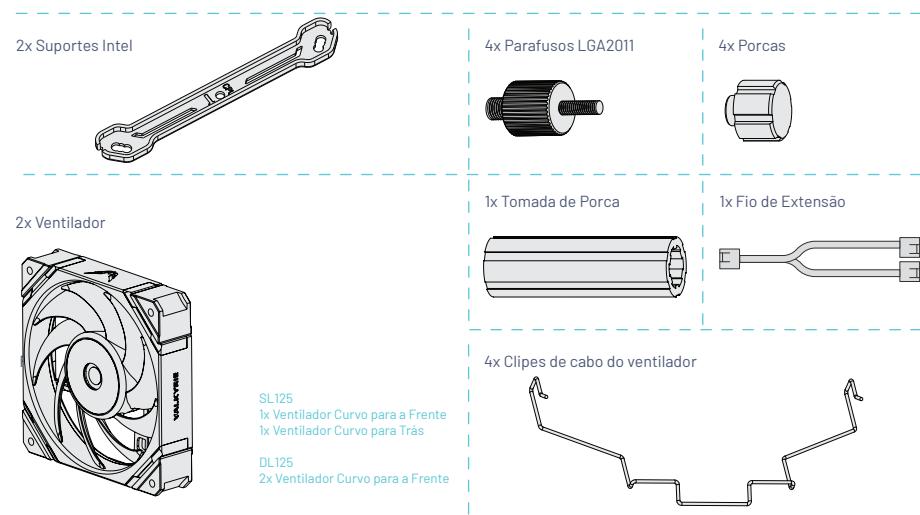

\*Tenha cuidado. NÃO toque na graxa de silicone termicamente condutora pré-aplicada na parte inferior.

**Passo 6: Concluir a instalação**

Consulte a instalação do ventilador e da fiação para instalar e conectar os ventiladores ao resfriador.

# PT Instalação Intel LGA2011/2066

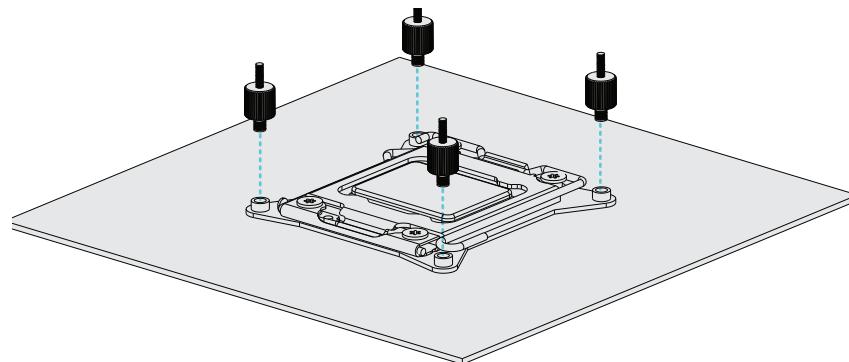

Marcámos para si as peças necessárias para instalar a plataforma Intel LGA2011/2066.

## Passo 1: Instalar os parafusos

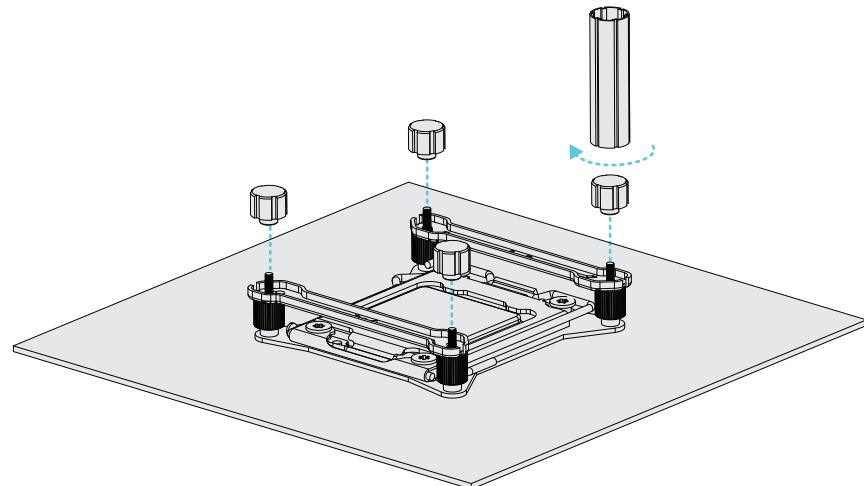

Instale os parafusos Intel LGA2011 na placa-mãe.

\*A extremidade maior do parafuso fica voltada para baixo.

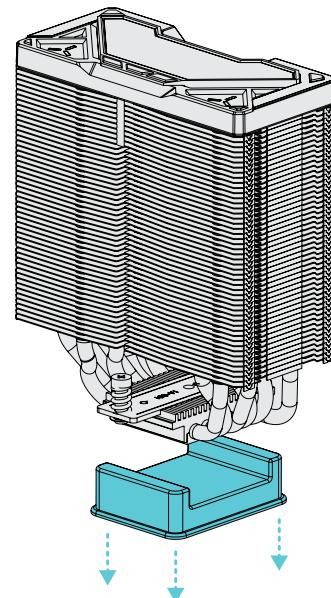

## Passo 2: Instale os suportes

Coloque os suportes nos parafusos e aperte-os com porcas utilizando um soquete de porca.

## Passo 3: Retirar a tampa protetora

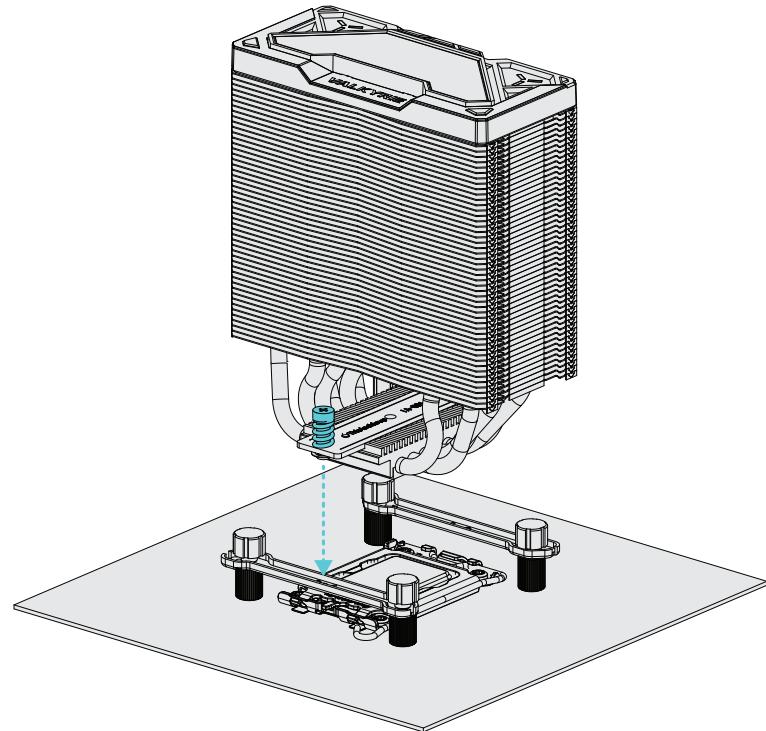

Retire a tampa protetora da placa fria.

**PT** Passo 5: Instalar o refrigerador**PT**

Alinhe o refrigerador aos orifícios e apafuse-o nos suportes.

\*Tenha cuidado. NÃO toque na graxa de silicone termicamente condutora pré-aplicada na parte inferior.

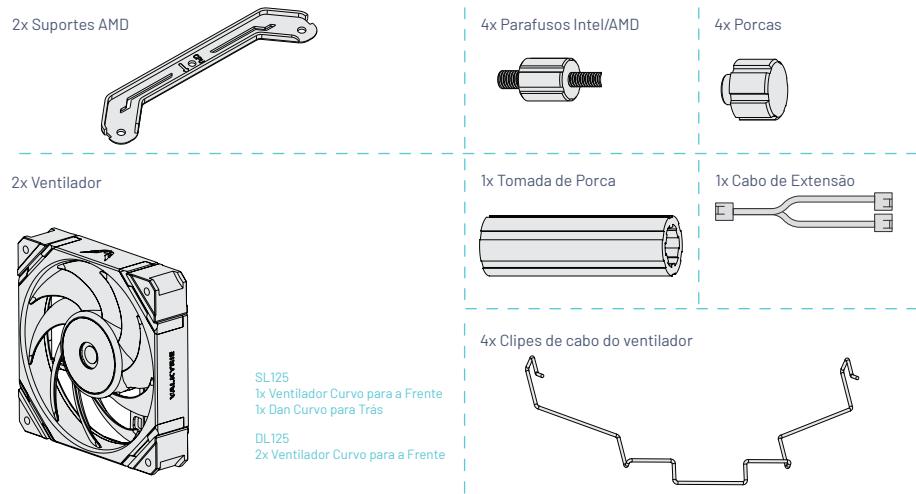

**Passo 6: Concluir a instalação**

Consulte a instalação do ventilador e da fiação para instalar e conectar os ventiladores ao resfriador.

# PT Instalação AMD AM4/AM5

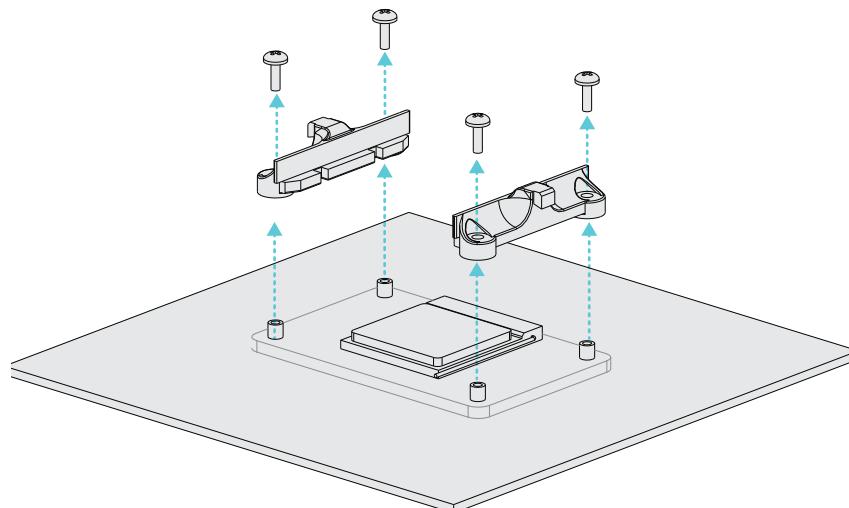

PT

Marcámos para si as peças necessárias para instalar a plataforma AMD/AM4.

## Passo 1: Preparar a placa-mãe

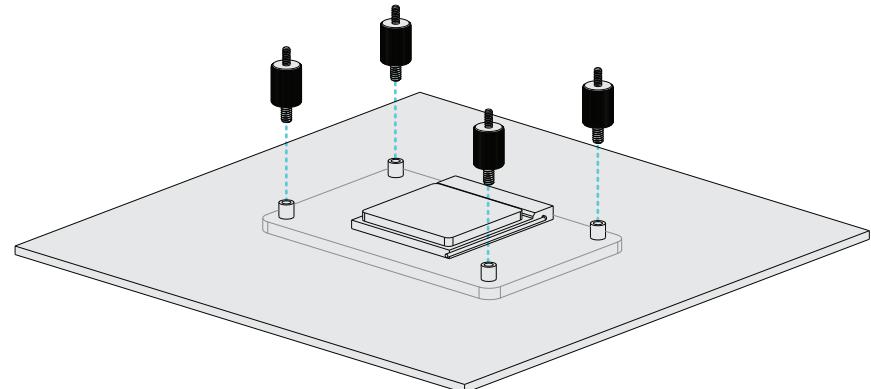

Desaperte os quatro parafusos. Remova o suporte original na placa-mãe. Mantenha a placa traseira original.

## Passo 2: Instalar os Parafusos

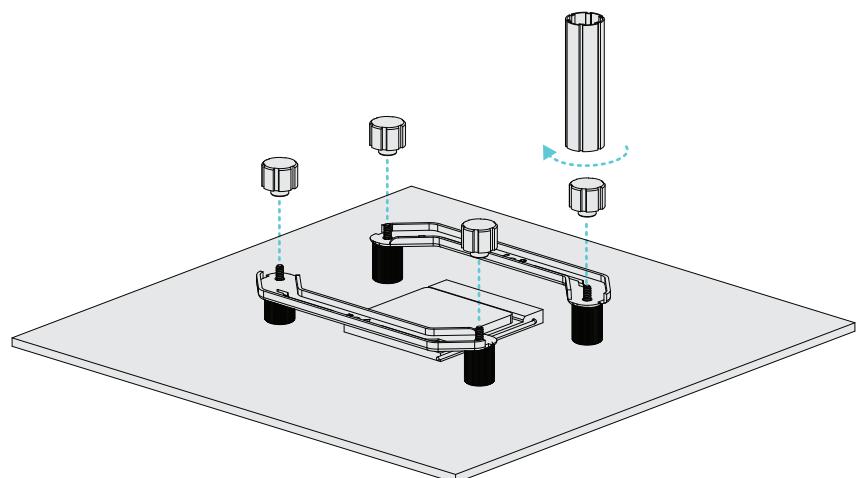

Instale os parafusos INTEL/AMD na placa traseira.

\*A extremidade maior do parafuso fica voltada para baixo.

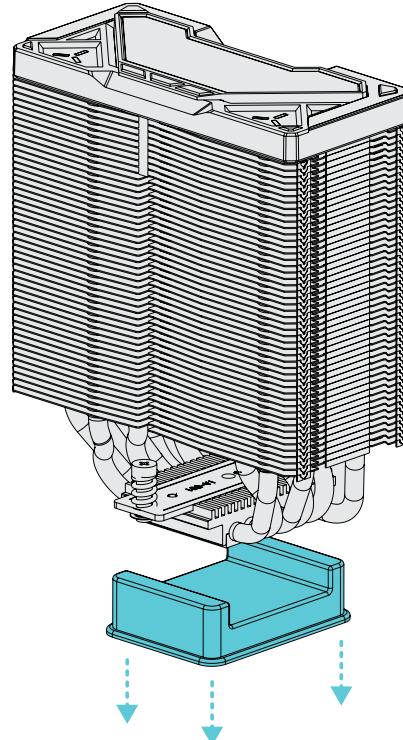

## Passo 3: Instalar os suportes

Coloque os suportes nos parafusos e aperte-os com porcas utilizando um soquete de porca.

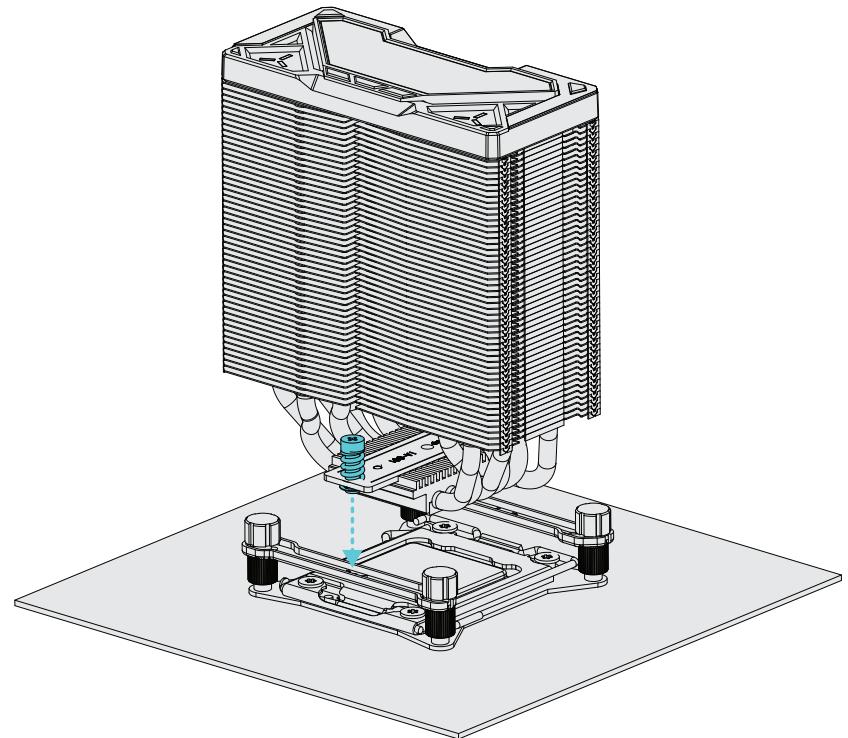

**PT Passo 4: Retire a tampa protetora**

Retire a tampa protetora da placa fria.

**Passo 5: Instalar o refrigerador**

Alinhe o refrigerador aos orifícios e apafuse-o nos suportes.

\*Tenha cuidado. NÃO toque na graxa de silicone termicamente condutora pré-aplicada na parte inferior.

**Passo 6: Instalação completa**

Por favor, consulte o ventilador e a cablagem de instalação para instalar e ligar os ventiladores ao refrigerador.

# INSTALAÇÃO SL125 FAN

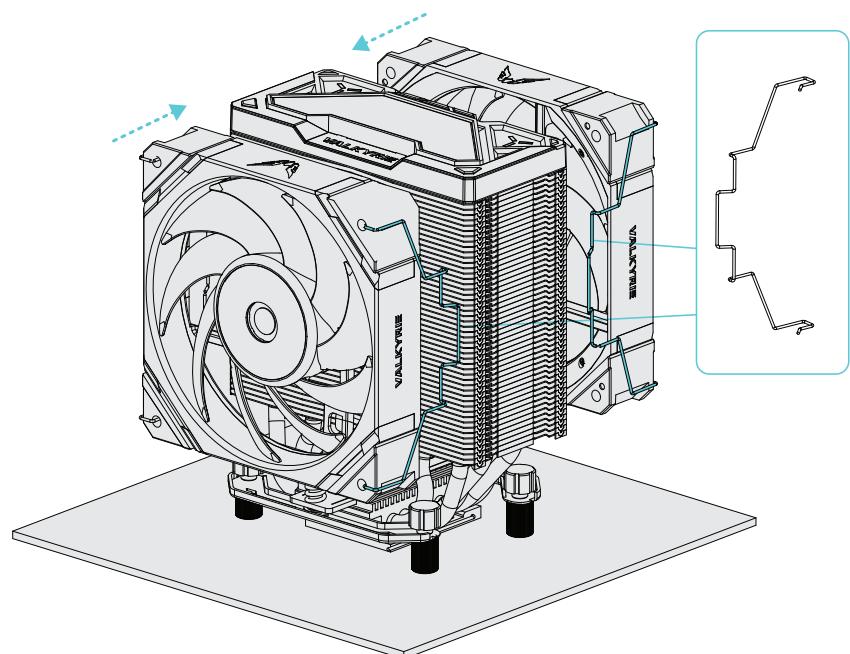

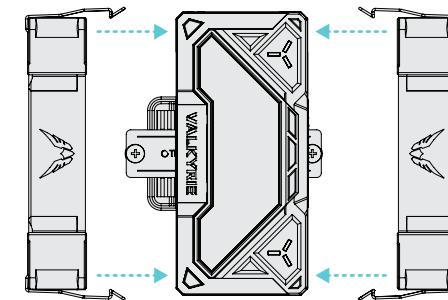

## Instalação do ventilador SL125

Use os grampos de cabo para prender o ventilador ao resfriador.

\*SL125 é uma configuração de ventilador curvo para a frente/para trás. Tenha atenção à direção do ventilador.

\*O logótipo do ventilador (LOGÓTIPO DA asa) deve ser como mostrado na figura abaixo.

# INSTALAÇÃO DL125 FAN

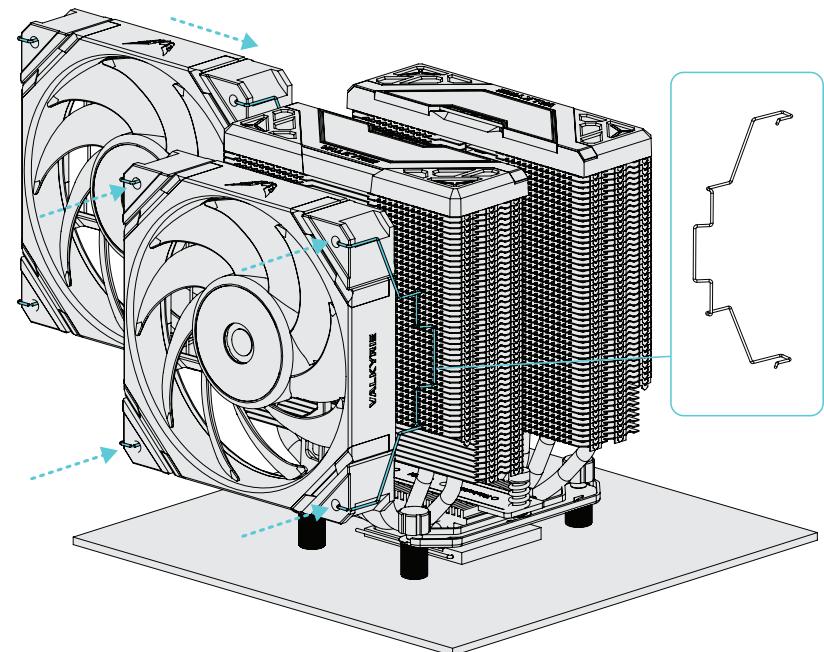

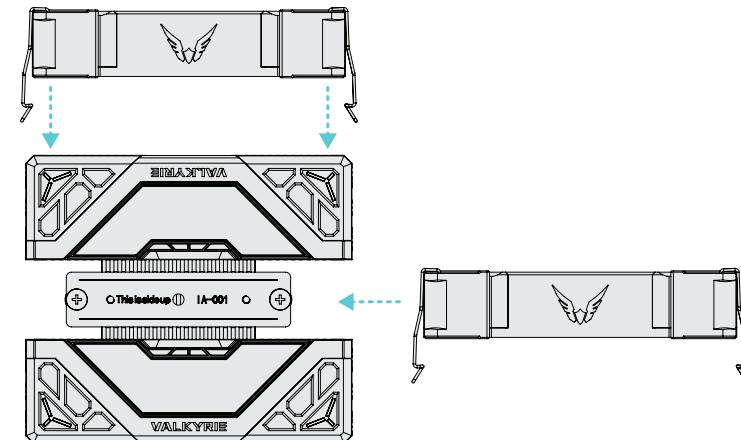

## Instalação do ventilador DL125

Use os grampos de cabo para prender o ventilador ao resfriador.

\*DL125 é um ventilador com dupla curva para a frente. Por favor, prestar atenção à direcção do ventilador.

\*O logótipo do ventilador (LOGÓTIPO DA asa) deve ser como mostrado na figura abaixo.

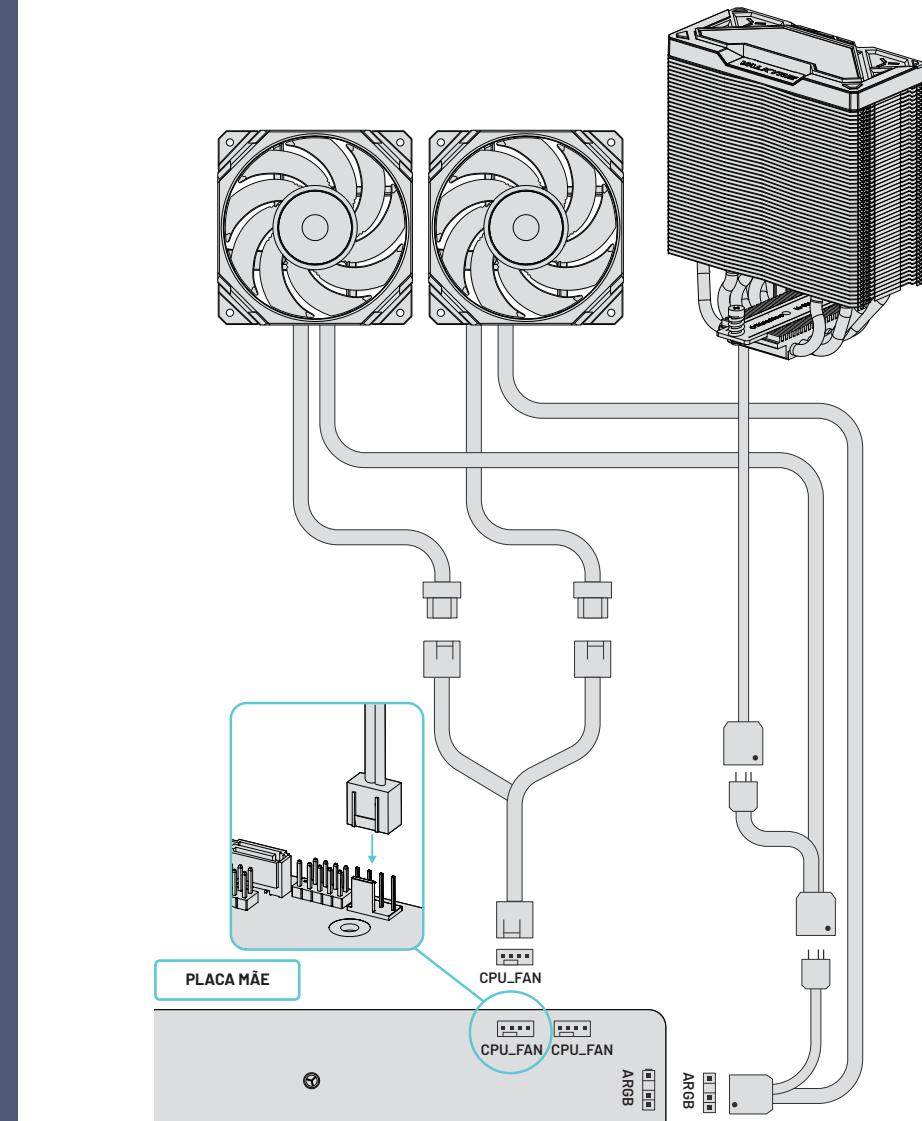

# FIAÇÃO

## Fiação do Ventilador

1. Use os cabos para conectar o cabo do ventilador de 4 PINOS ao cabeçalho CPU\_FAN na placa-mãe.

2. Conecte o conector A-RGB dos ventiladores e do corpo principal ao cabeçalho A-RGB de 5V 3 PINOS na placa-mãe, conforme mostrado na figura.

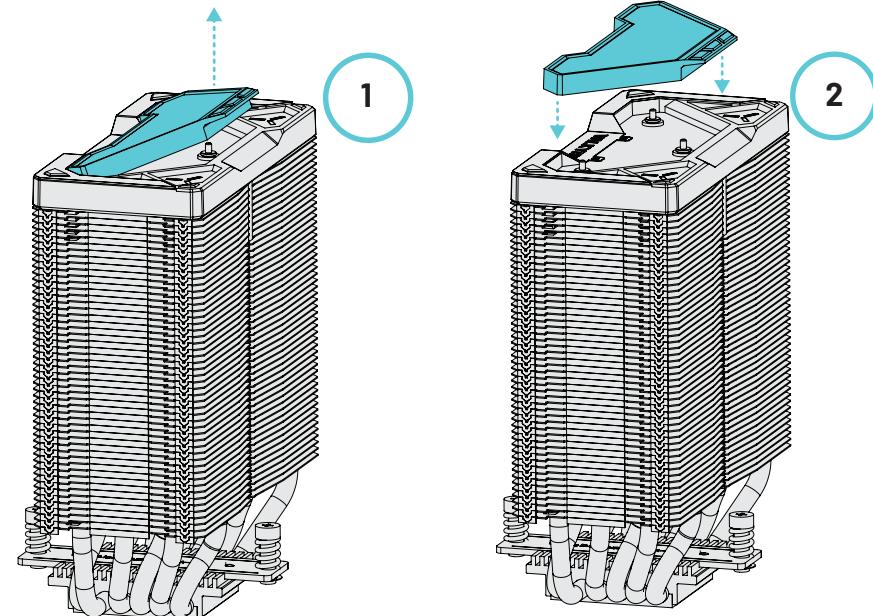

## Método de substituição da tampa superior

A capa pode ser removida e substituída pelo seu estilo favorito.

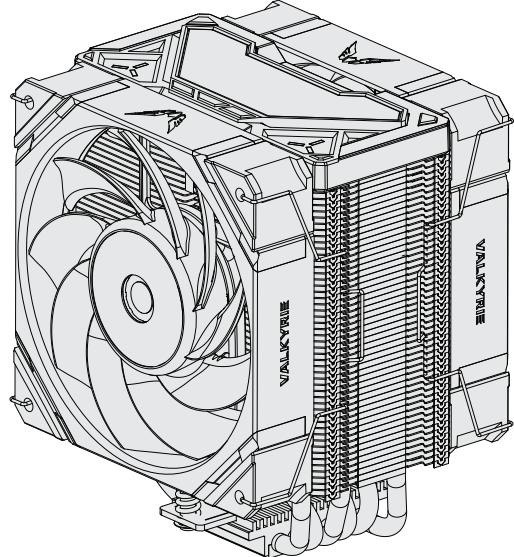

\*Certifique-se de começar pelo meio.

# ► LUCHTKOELING ◀

## Montage Intel LGA1200/1700

We hebben voor u de onderdelen gemarkeerd die nodig zijn voor het monteren van het Intel LGA1200/1700-platform.

1x Intel-achterplaat

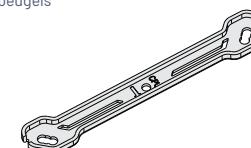

4x Intel / AMD-bouten

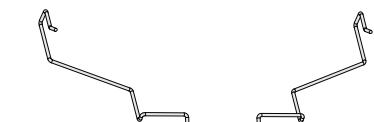

4x Noten

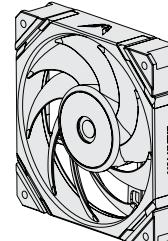

2x Intel-beugels

4x Ventilatorkabelklemmen

2x Ventilator

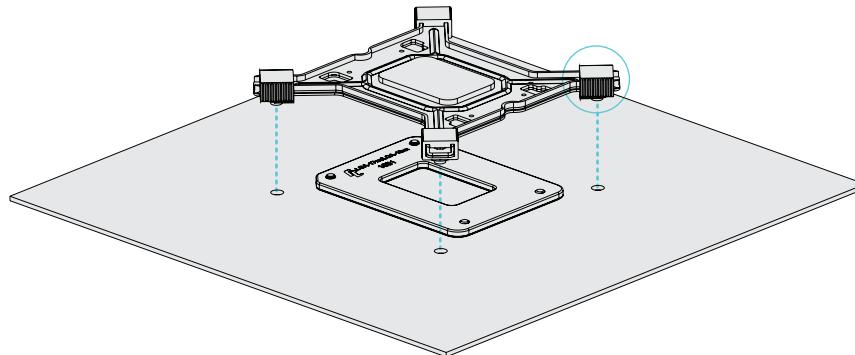

SL125  
1x Naar voren gebogen ventilator  
1x Achterwaarts gebogen ventilator

DL125  
2x Naar voren gebogen ventilator

## NL | Stap 1: Beugel monteren

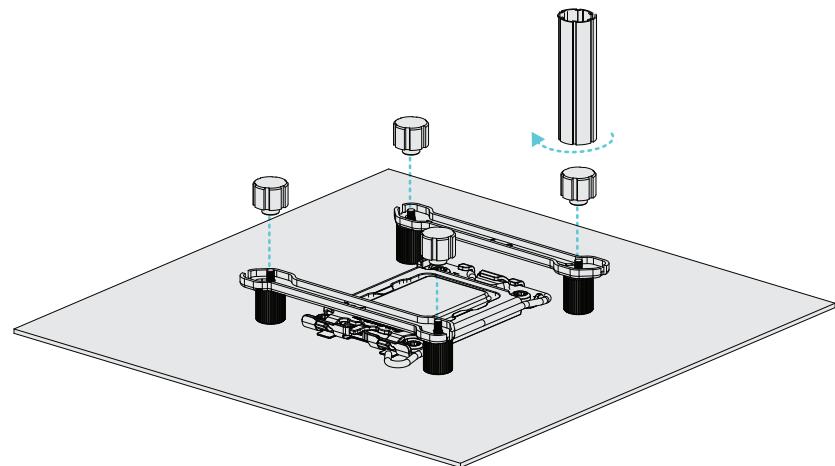

1. Lijn de achterplaat uit met de bijbehorende platformgaten.
  2. Monteer de achterplaat op de achterkant van het moederbord.
- \*U kunt schuiven om aan te passen voor uitlijning met de overeenkomstige platformgaten.

\* Gebruik de binnenste montagegatpositie voor 1200 (115X) en de buitenste montagegatpositie voor 1700.

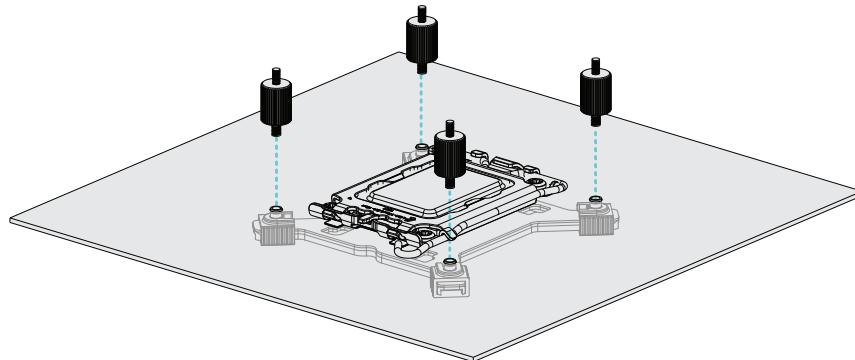

## NL | Stap 3: Beugels monteren

- Plaats de beugels op de bouten en draai ze vast met moeren met behulp van een ratel.

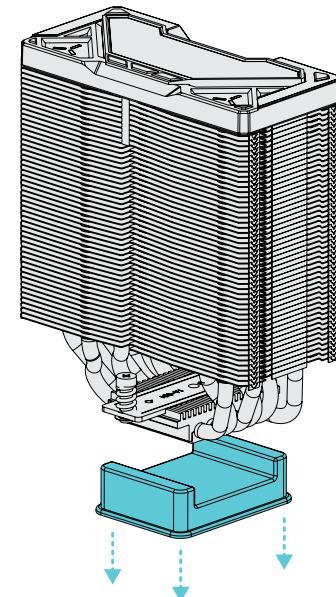

## Stap 2: Schroeven monteren

- Installeer INTEL/AMD-bouten op de achterplaat.  
\*Het grotere uiteinde van de schroef is naar beneden gericht.

## Stap 4: Verwijder de beschermkap

- Verwijder de beschermkap van de koelplaat.

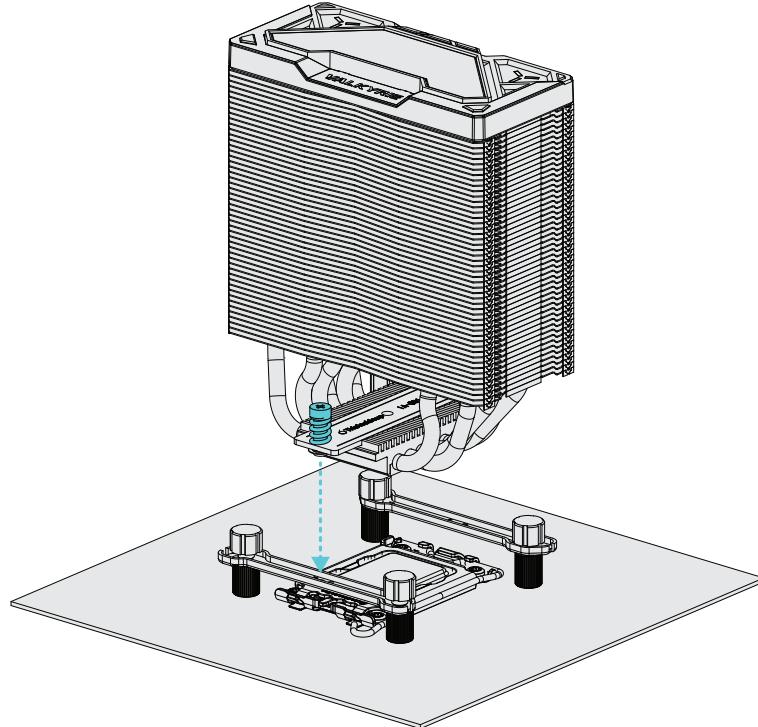

**NL | Stap 5: Monteer de koeler**

NL

Lijn de koeler uit op de gaten en schroef deze op de beugels.

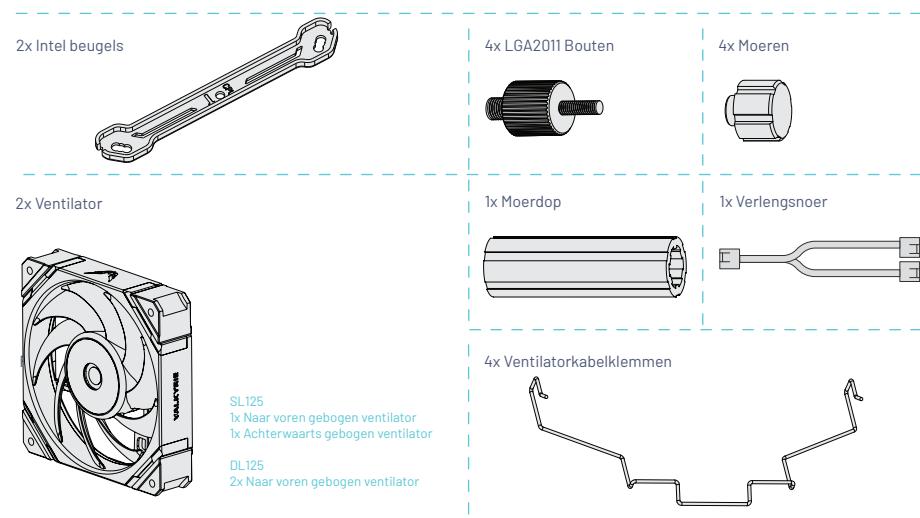

\*Wees voorzichtig. Raak het thermisch geleidende siliconenvet NIET aan dat vooraf op de bodem is aangebracht.

**Stap 6: Montage afronden**

Raadpleeg Ventilator monteren en bedrading voor het monteren en aansluiten van ventilatoren op de koeler.

## NL Montage Intel LGA2011/2066

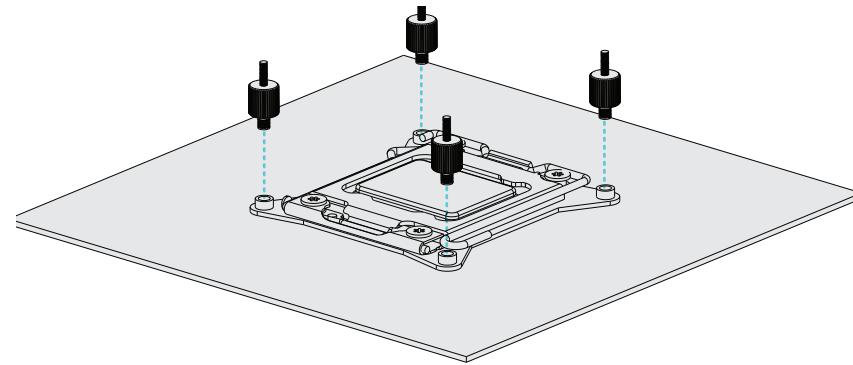

We hebben voor u de onderdelen gemarkeerd die nodig zijn voor het installeren van het Intel LGA2011/2066-platform.

### Stap 1: Schroeven monteren

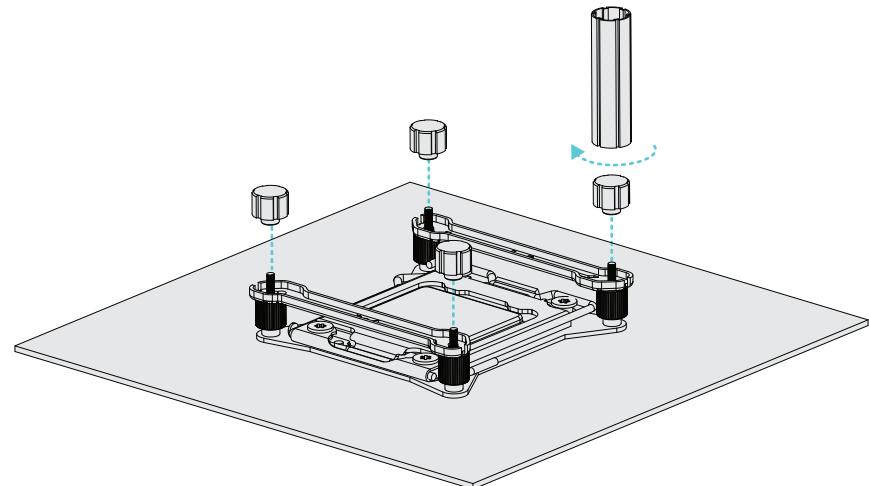

Monteer Intel LGA2011-bouten op het moederbord.

\*Zorg ervoor dat het grotere uiteinde van de schroef naar beneden is gericht.

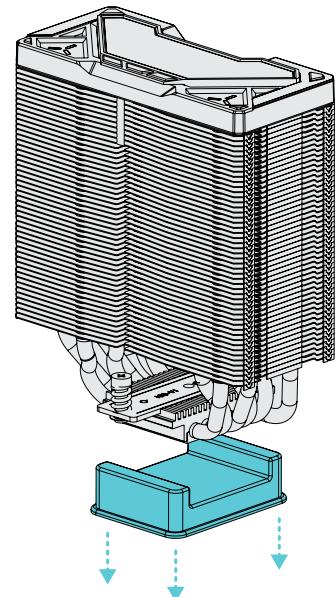

### Stap 2: Installeer beugels

Plaats de beugels op de bouten en draai ze vast met moeren met behulp van een ratel.

### Stap 3: Verwijder de beschermkap

Verwijder de beschermkap van de koelplaat.

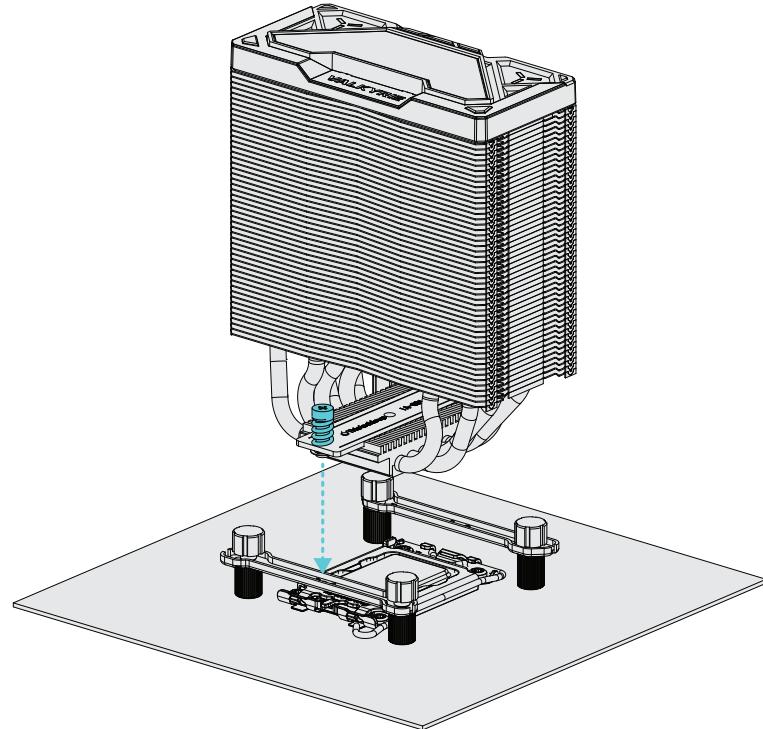

**NL | Stap 5: Monteer de koeler**

NL

Lijn de koeler uit op de gaten en schroef deze op de beugels.

\*Wees voorzichtig. Raak het thermisch geleidende siliconenvet NIET aan dat vooraf op de bodem is aangebracht.

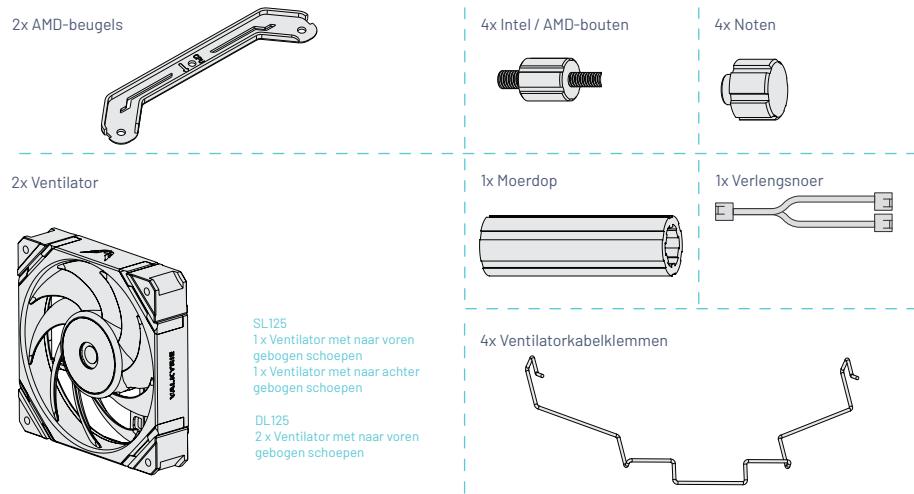

---

**Stap 6: Montage afronden**

Raadpleeg Ventilator monteren en bedrading voor het monteren en aansluiten van ventilatoren op de koeler.

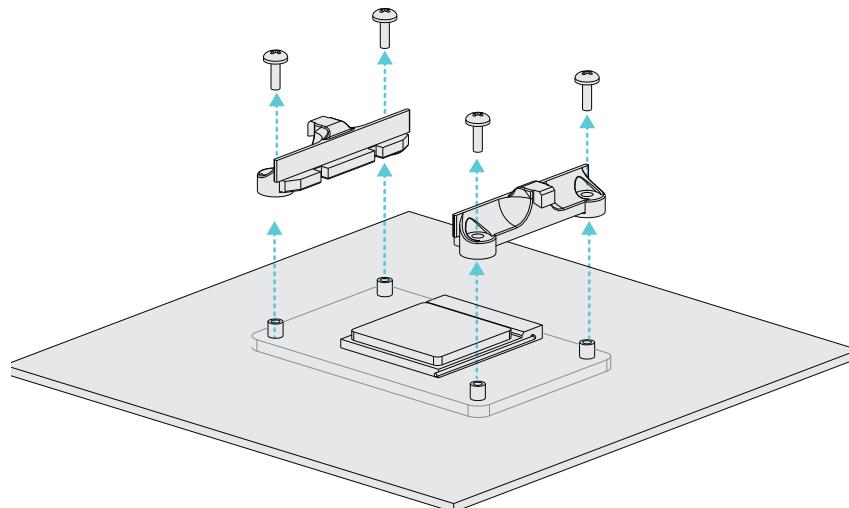

# NL Montage AMD AM4/AM5

We hebben de onderdelen gemarkerd die nodig zijn voor het installeren van het AMD/AM4-platform voor u.

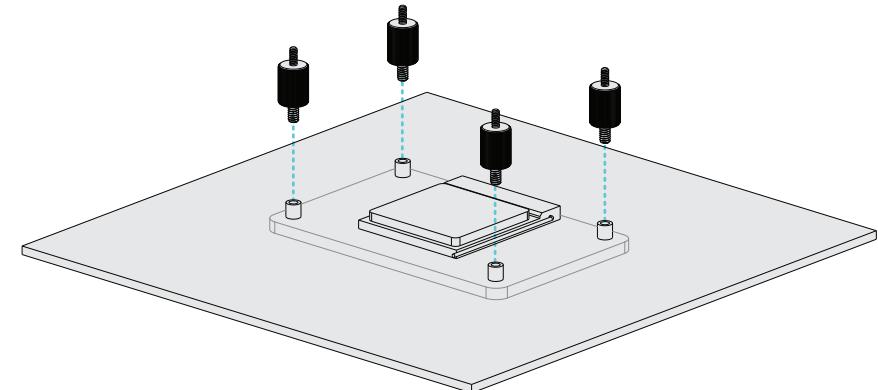

## Stap 1: Het moederbord voorbereiden

Draai de 4 bouten eruit. Verwijder de originele beugel op het moederbord. Bewaar de originele achterplaat.

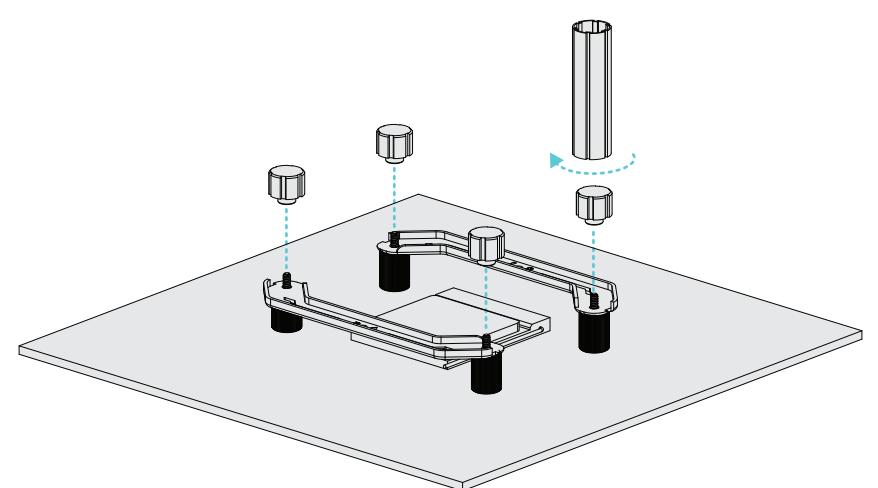

## Stap 2: Schroeven monteren

Installeer INTEL/AMD-bouten op de achterplaat.  
\*Het grotere uiteinde van de schroef is naar beneden gericht.

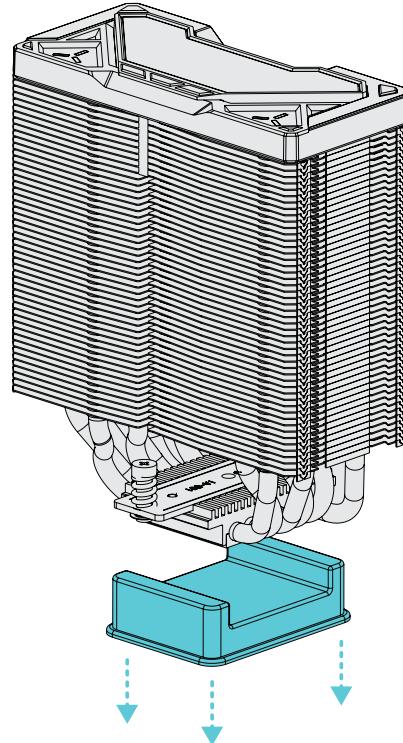

## Stap 3: Beugels monteren

Plaats de beugels op de bouten en draai ze vast met moeren met behulp van een ratel.

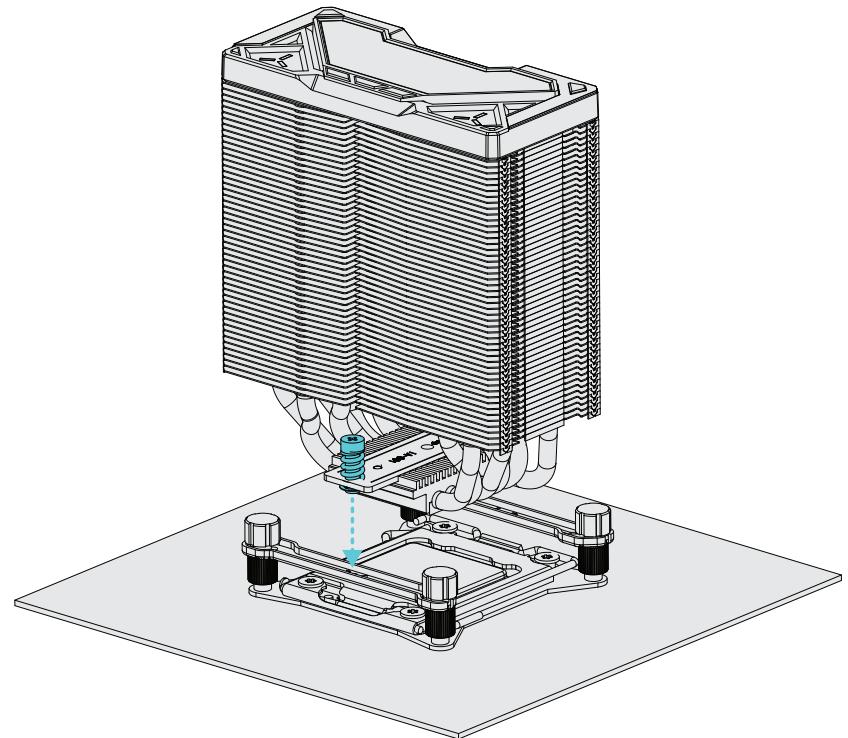

**NL | Stap 4: Verwijder de beschermkap**

Verwijder de beschermkap van de koelplaat.

**NL | Stap 5: Monteer de koeler**

Lijn de koeler uit op de gaten en schroef deze op de beugels.

\*Wees voorzichtig. Raak het thermisch geleidende siliconenvet NIET aan dat vooraf op de bodem is aangebracht.

**Stap 6: Volledige installatie**

Raadpleeg Ventilator installeren en bedrading voor het installeren en aansluiten van ventilatoren op de koeler.

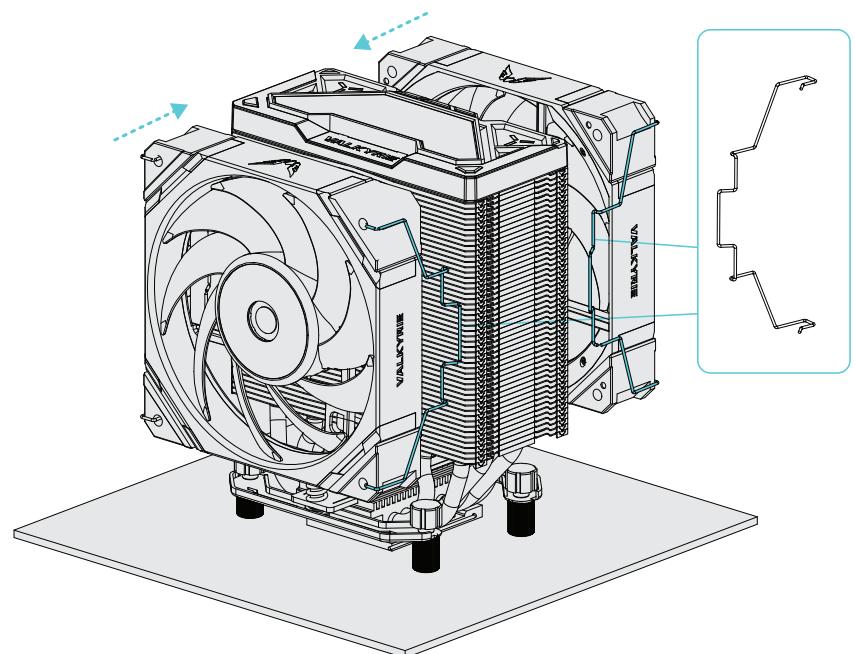

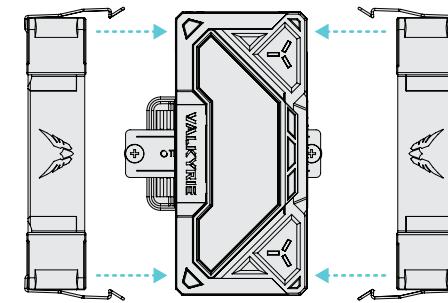

# SL125 FAN MONTEREN

## Montage SL125 ventilator

Gebruik de kabelklemmen om de ventilator aan de koeler te bevestigen.

\*SL125 is een ventilatorinstelling met naar voor/achter gebogen schoepen. Let op de richting van de ventilator.

\*Het ventilatorlogo (wing LOGO) moet zijn zoals weergegeven in de onderstaande afbeelding.

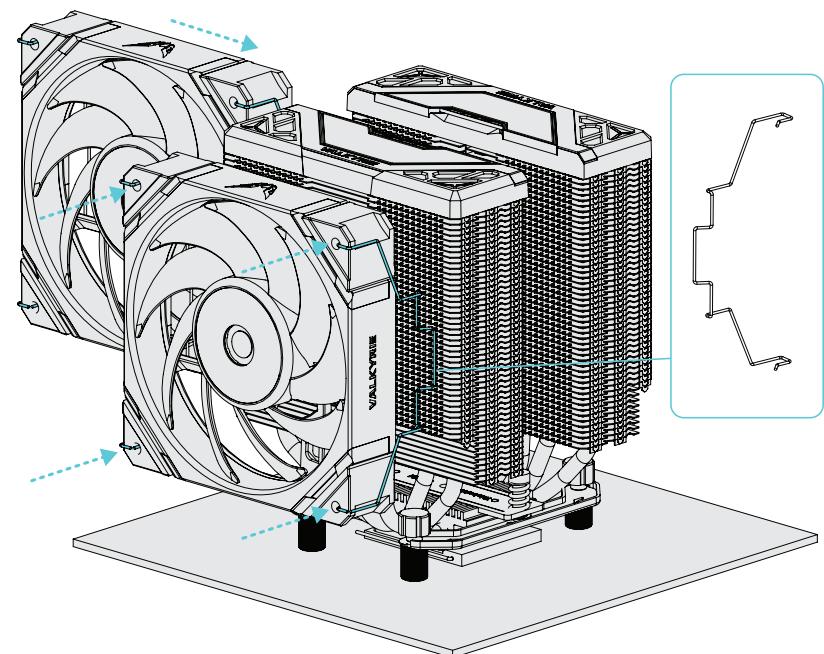

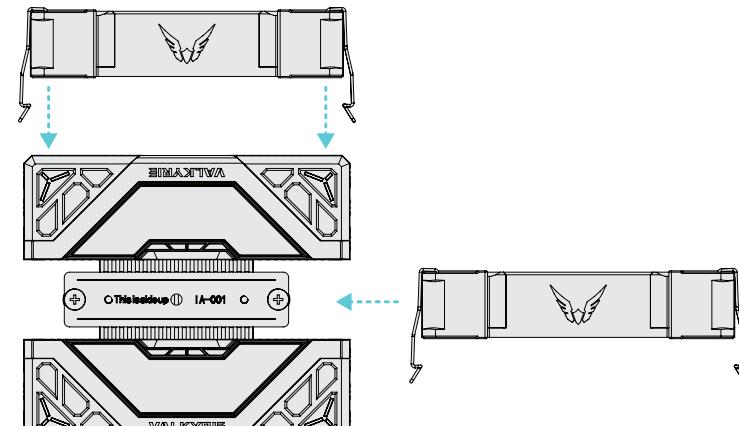

# DL125 FAN MONTEREN

## Montage ventilator DL125

Gebruik de kabelklemmen om de ventilator aan de koeler te bevestigen.

\*DL125 is een dubbele voorwaarts gebogen ventilatoropstelling. Let op de richting van de ventilator.

\*Het ventilatorlogo (wing LOGO) moet zijn zoals weergegeven in de onderstaande afbeelding.

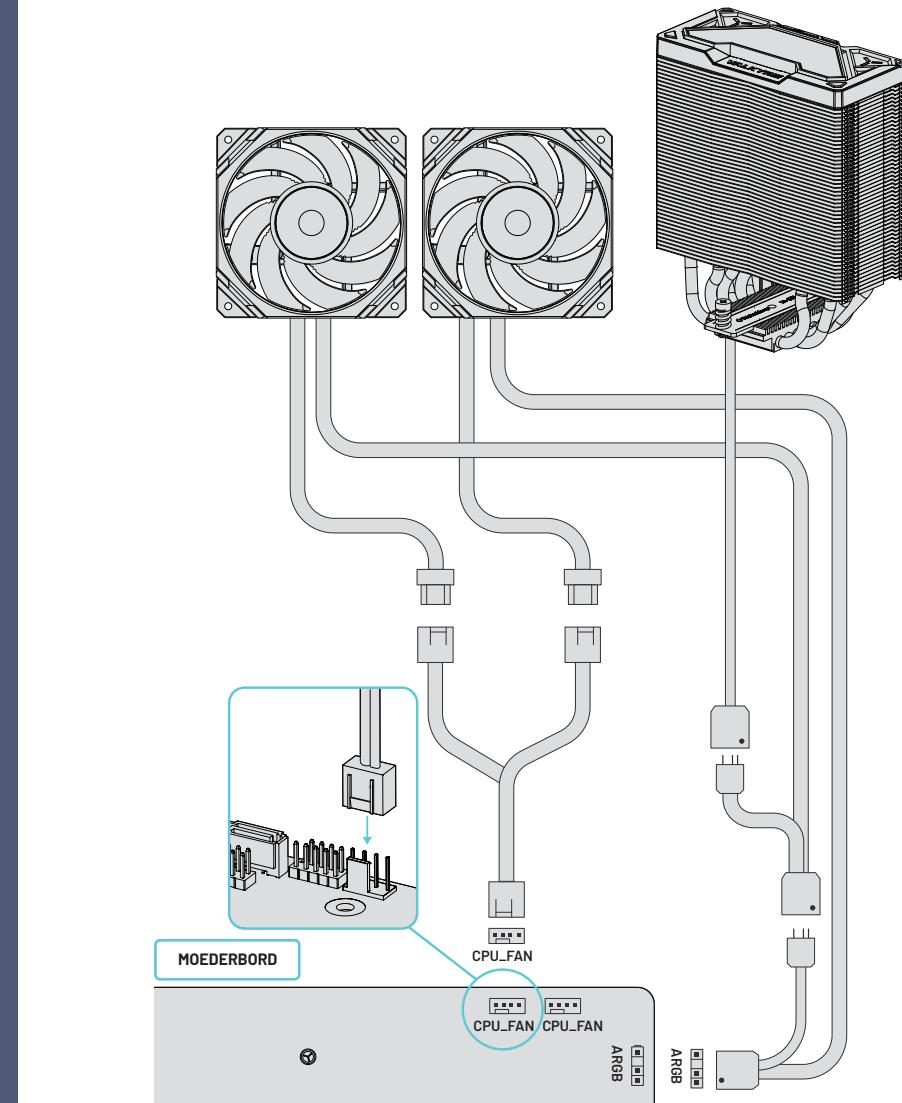

# BEDRADING

## Bedrading van de ventilator

1. Gebruik de kabels om de 4-PINS ventilatorkabel aan te sluiten op de CPU\_FAN header op het moederbord.

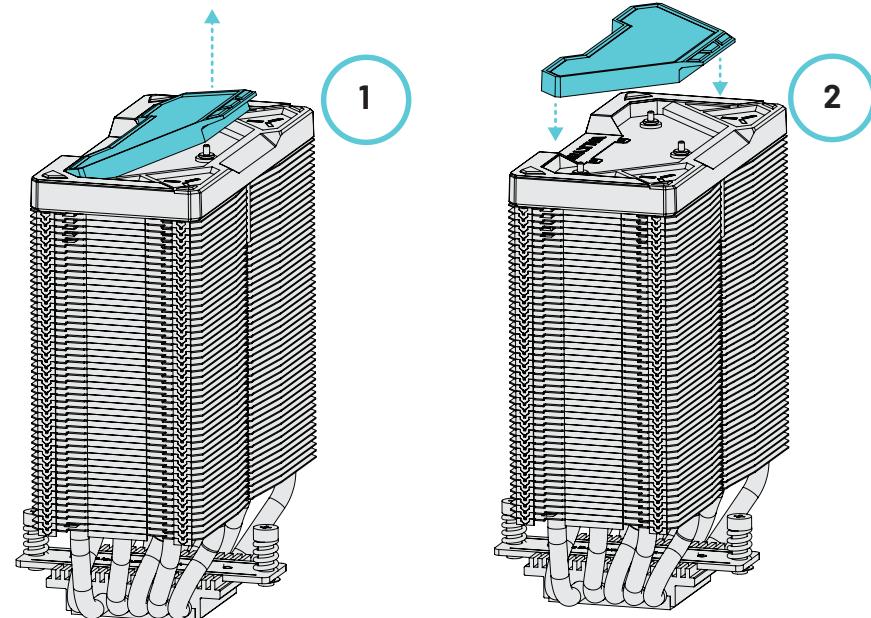

2. Sluit de A-RGB-connector van de ventilatoren en het hoofdgedeelte aan op de 5V 3-PINS A-RGB-header op het moederbord, zoals weergegeven in de afbeelding.

## Methode voor het vervangen van de bovenkap

De hoes kan worden verwijderd en vervangen door uw favoriete stijl.  
\*Zorg ervoor dat u vanuit het midden begint.

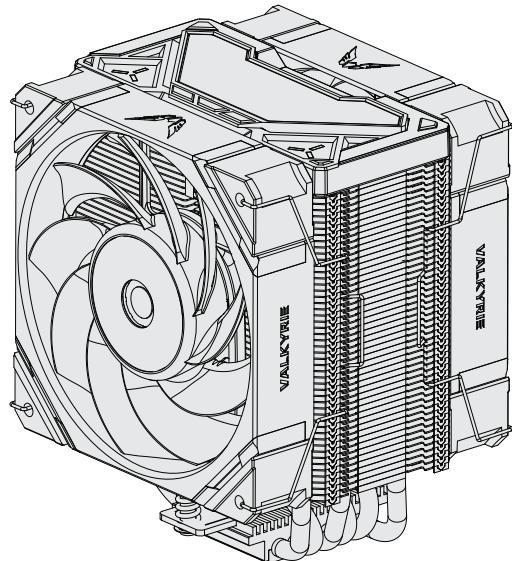

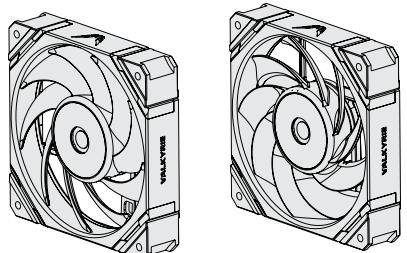

### TIPS

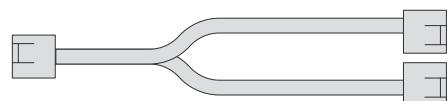

# RUS Перечень деталей SL125

RUS

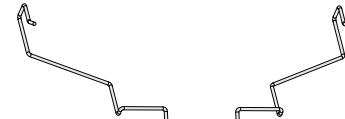

1x блок воздушного охлаждения

1x вентилятор с загнутыми вперед лопастями  
1x вентилятор с загнутыми назад лопастями

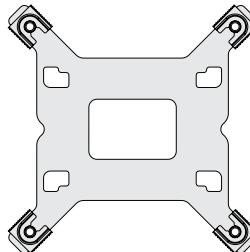

1x удлинительный кабель

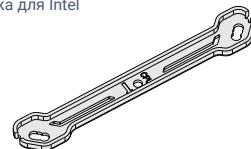

4x зажима для кабелей вентиляторов

# ВОЗДУШНОЕ ОХЛАЖДЕНИЕ

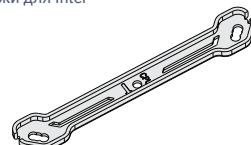

## Монтаж для Intel LGA1200/1700

Ниже указаны детали, необходимые для монтажа платформы для Intel LGA1200/1700.

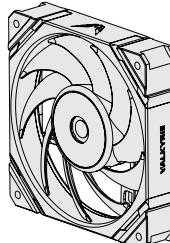

1x опорная плата для Intel

2x Крепежи для Intel

2x вентилятора

SL125  
1x Изогнутый вперед  
вентилятор  
1x вентилятор, изогнутый  
назад

DL125  
2x изогнутый вперед  
вентилятор

4x винта для Intel / AMD

4x гайки

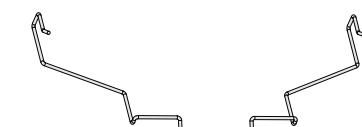

1x гнездо с резьбой

1x удлинительный кабель

4x зажима для кабелей вентиляторов

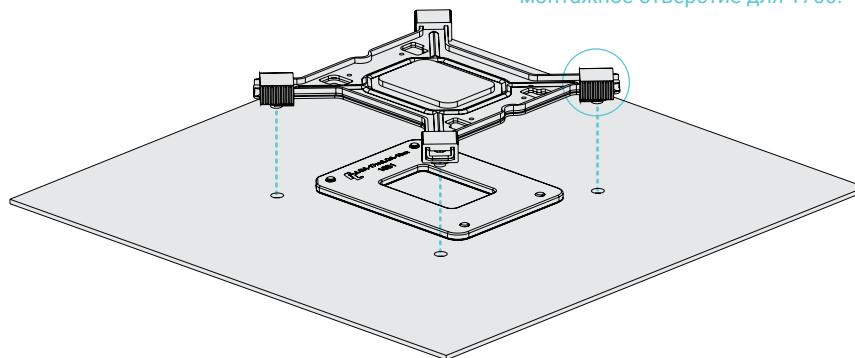

**RUS Шаг 1: Установите крепеж**

1.Совместите опорную плиту с соответствующими отверстиями на платформе.

2.Установите опорную плиту на тыльную часть материнской платы.

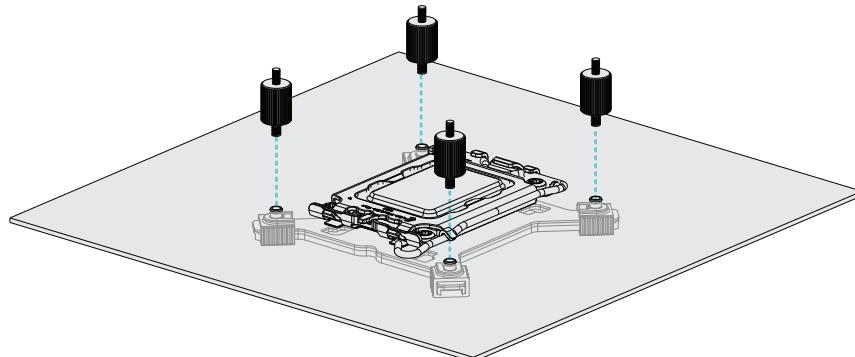

\* Вы можете перемещать опорную плиту, чтобы разместить ее вровень с соответствующими отверстиями на платформе.

\* Используйте внутреннее монтажное отверстие для 1200 (115X) и внешнее монтажное отверстие для 1700.

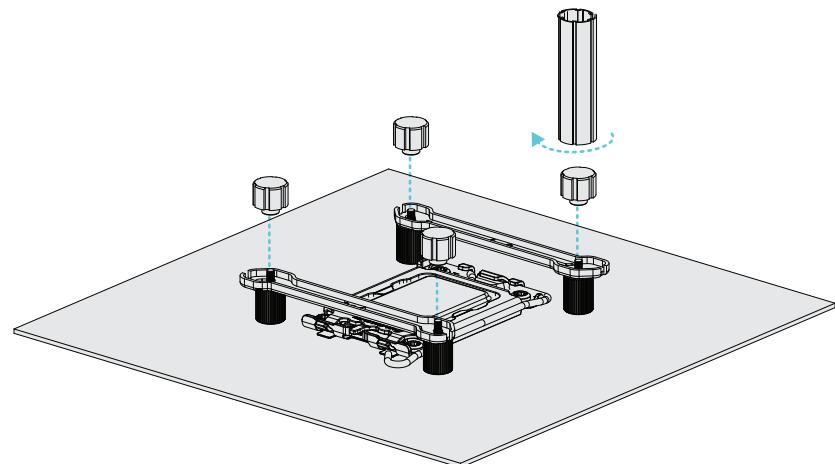

**Шаг 2: Установите винты**

Установите винты для INTEL/AMD на опорную плиту.

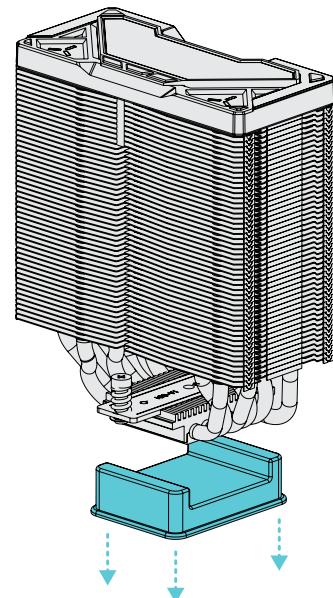

\*Больший конец винта должен быть обращен вниз.

**Шаг 3: Установите крепежи**

Наденьте крепежи на винты и затяните их гайками с помощью гнезда с резьбой.

**Шаг 4: Снимите защитную крышку**

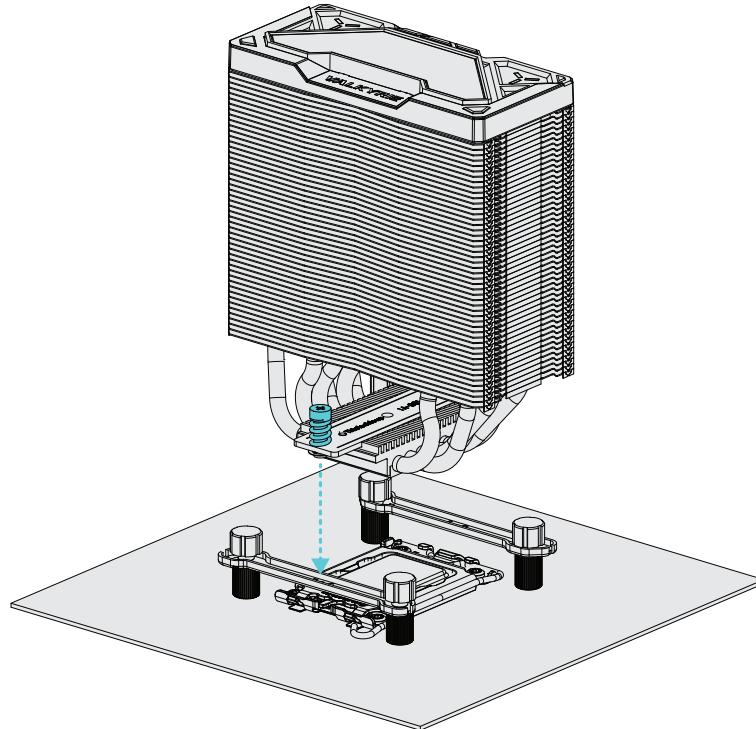

Отклейте с охлаждающей плиты защитную наклейку.

**RUS Шаг 5: Установите систему воздушного охлаждения**

Совместите систему воздушного охлаждения с отверстиями и прикрутите ее к крепежам.

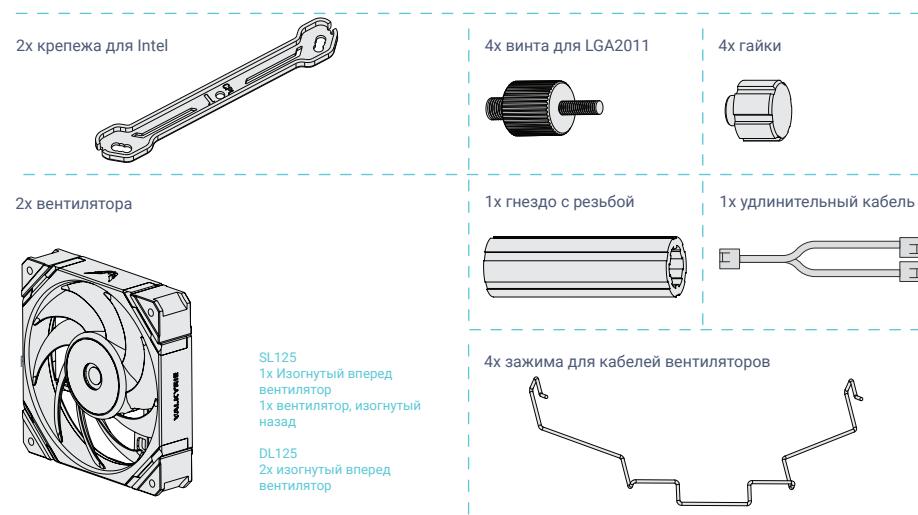

\*Соблюдайте осторожность. НЕ касайтесь теплопроводящей, предварительно нанесенной, силиконовой смазки.

**Шаг 6: Завершите монтаж**

Пожалуйста, обратитесь к разделу «Установка вентилятора и проводки» для установки и подключения вентиляторов к системе воздушного охлаждения.

# Инсталляция для Intel LGA2011/2066

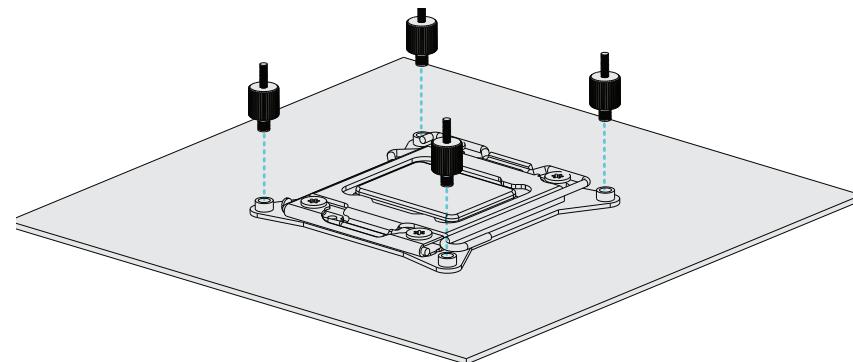

Ниже указаны детали, необходимые для монтажа платформы Intel LGA2011/2066.

## Шаг 1: Установите винты

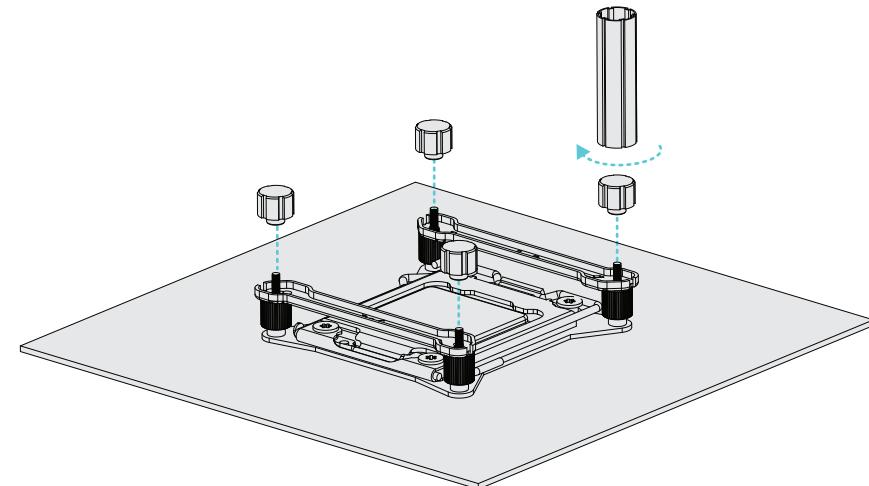

Установите винты для Intel LGA2011 на материнскую плату.

\*Убедитесь, что больший конец винта обращен вниз.

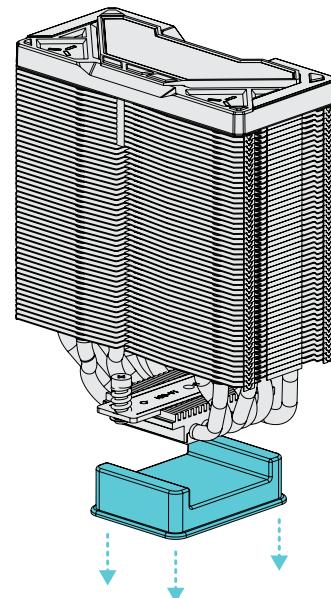

## Шаг 2: Установите крепежи

Наденьте крепежи на винты и затяните их гайками с помощью гнезда с резьбой.

## Шаг 3: Снимите защитную крышку

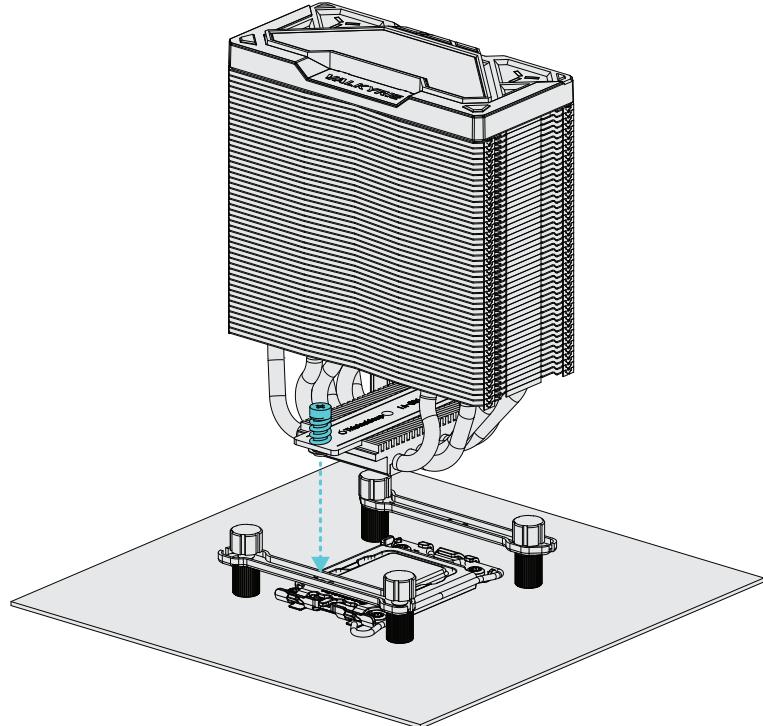

Отклейте с охлаждающей плиты защитную наклейку.

**RUS Шаг 5: Установите систему воздушного охлаждения**

Совместите систему воздушного охлаждения с отверстиями и прикрутите ее к крепежам.

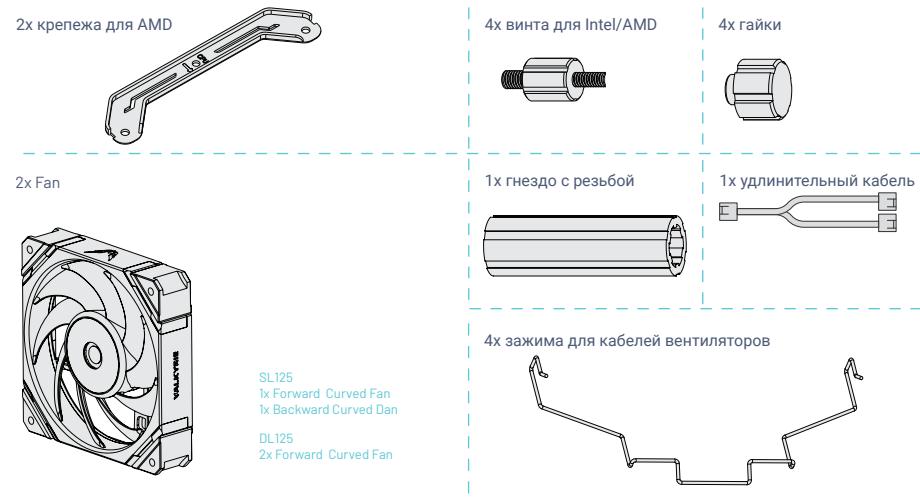

\*Соблюдайте осторожность. НЕ касайтесь теплопроводящей, предварительно нанесенной, силиконовой смазки.

**Шаг 6: Завершите монтаж**

Пожалуйста, обратитесь к разделу «Установка вентилятора и проводки» для установки и подключения вентиляторов к системе воздушного охлаждения.

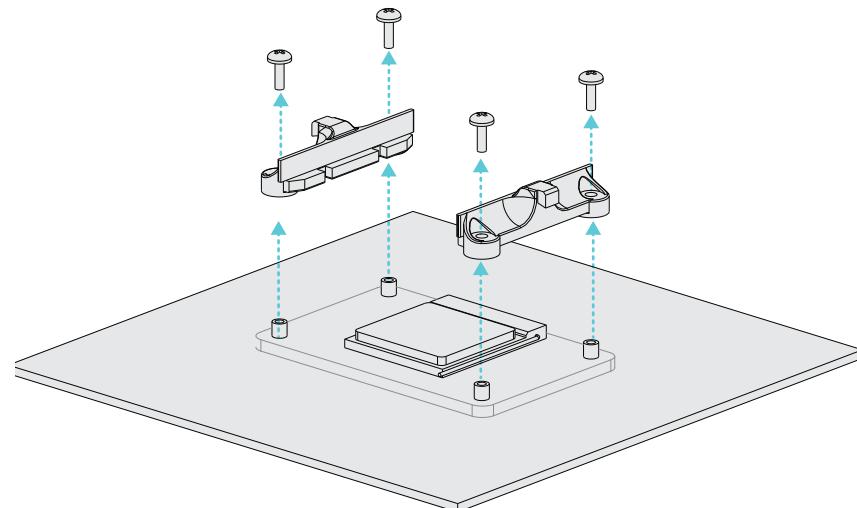

## RUS Монтаж для AMD AM4/AM5

Ниже указаны детали, необходимые для монтажа для платформы AMD/AM4.

### Шаг 1: Подготовьте материнскую плату

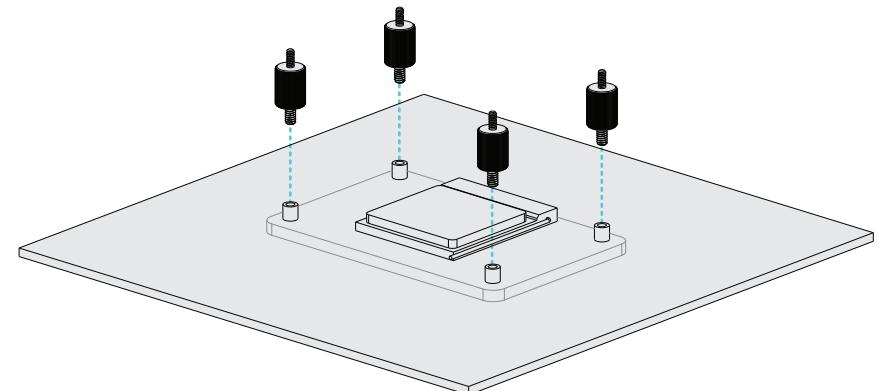

Выкрутите 4 винта. Снимите оригинальный крепеж с материнской платы. Сохраните оригинальную опорную плиту.

### Шаг 3: Установите крепежи

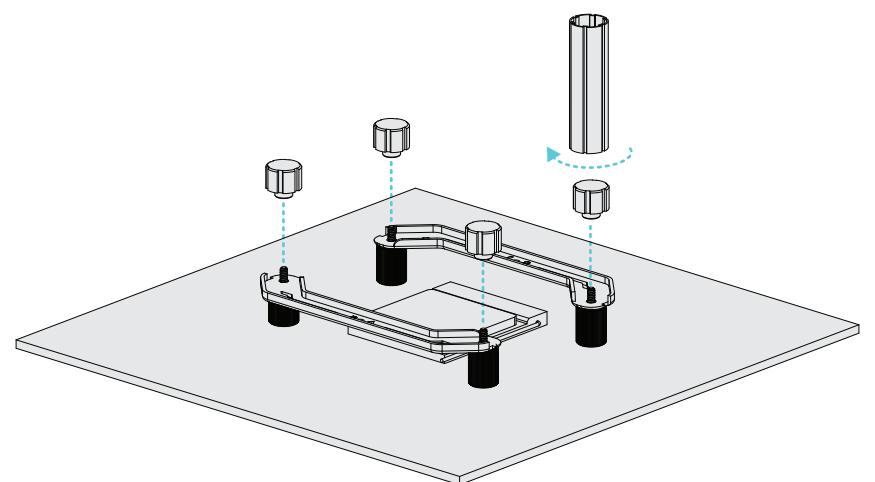

Наденьте крепежи на винты и затяните их гайками с помощью гнезда с резьбой.

\* Большой конец винта направлен вниз.

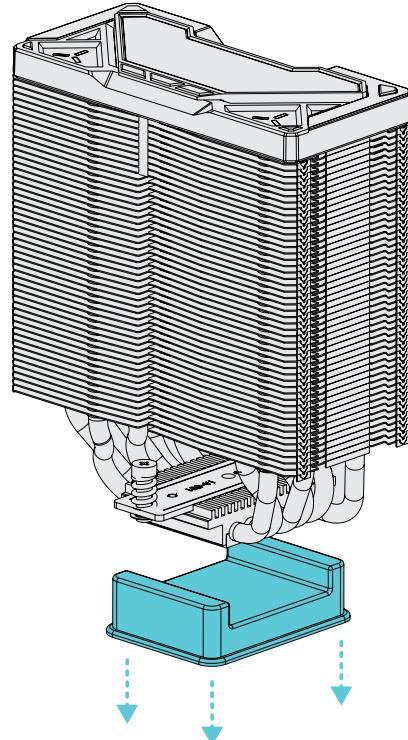

### Шаг 3: Установите кронштейны

Наденьте кронштейны на болты и затяните их гайками с помощью торцевой головки.

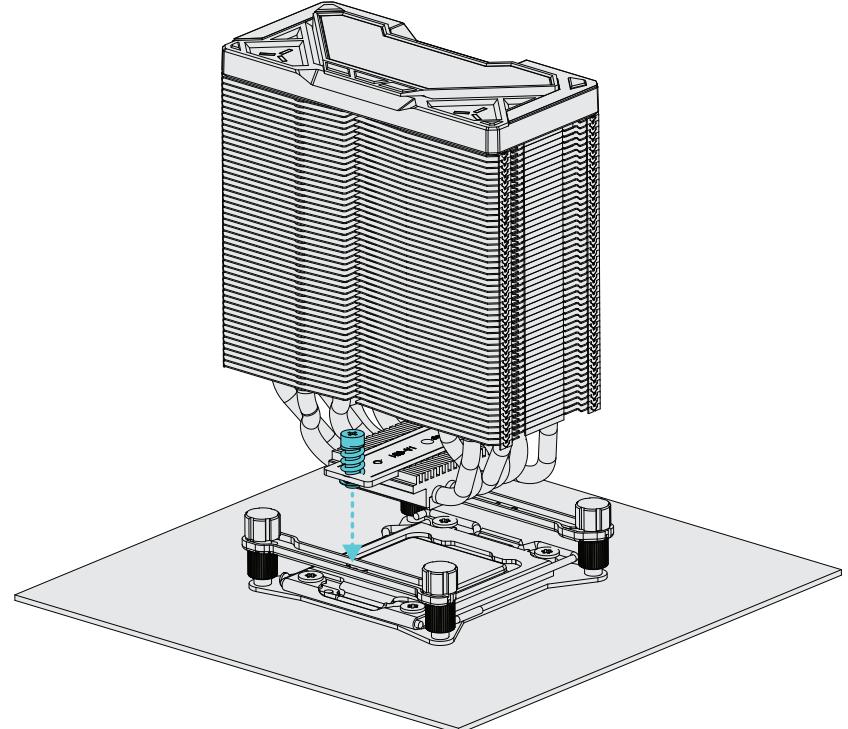

**RUS Шаг 4: Снимите защитную крышку**

Отклейте с охлаждающей плиты защитную наклейку.

**Шаг 5: Установите систему воздушного охлаждения**

Совместите систему воздушного охлаждения с отверстиями и прикрутите ее к крепежам.

\*Соблюдайте осторожность. Не касайтесь теплопроводящей, предварительно нанесенной, силиконовой смазки.

**Шаг 6: Завершите монтаж**

Пожалуйста, обратитесь к разделу «Установка вентилятора и проводки» для установки и подключения вентиляторов к системе воздушного охлаждения.

# УСТАНОВКА ВЕНТИЛЯТОРА SL 125

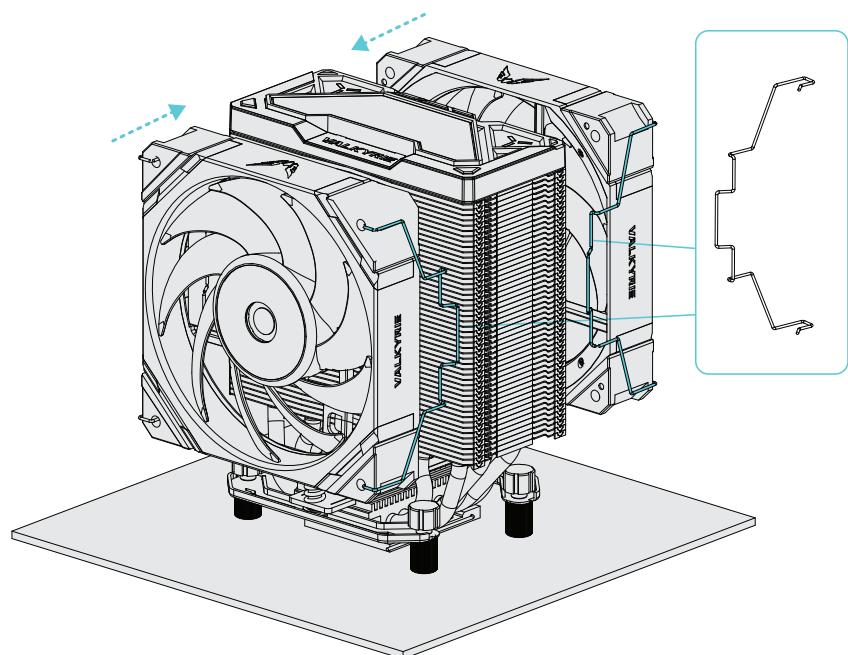

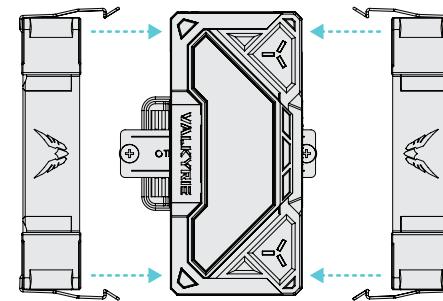

## Установка вентилятора SL125

С помощью кабельных зажимов закрепите вентилятор на системе воздушного охлаждения.

\*SL1255 — это установка с вентиляторами с изогнутыми вперед и назад лопастями.  
Пожалуйста, обратите внимание на направление лопастей.

\*Логотип вентилятора (крыло) должен быть виден так, как отображено на рисунке ниже.

# УСТАНОВКА ВЕНТИЛЯТОРА DL 125

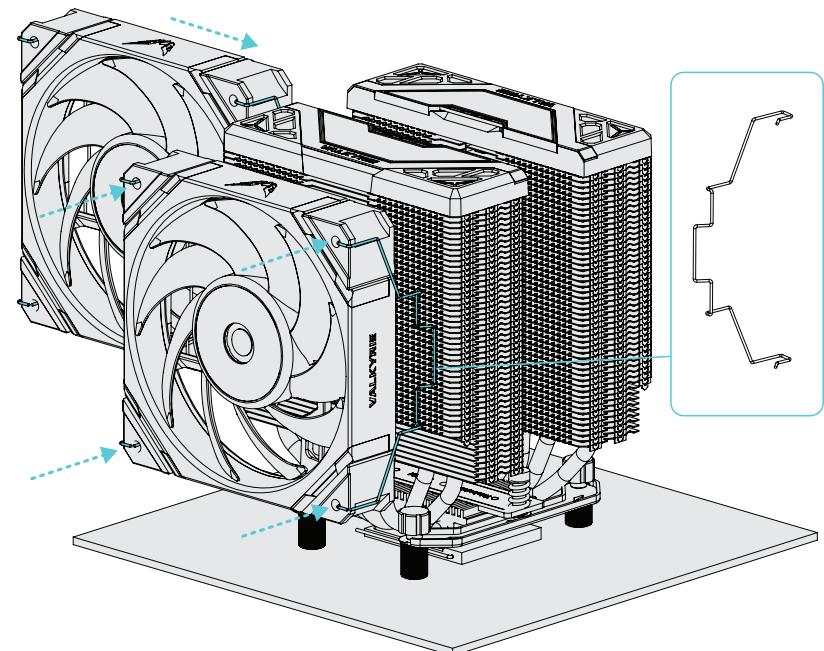

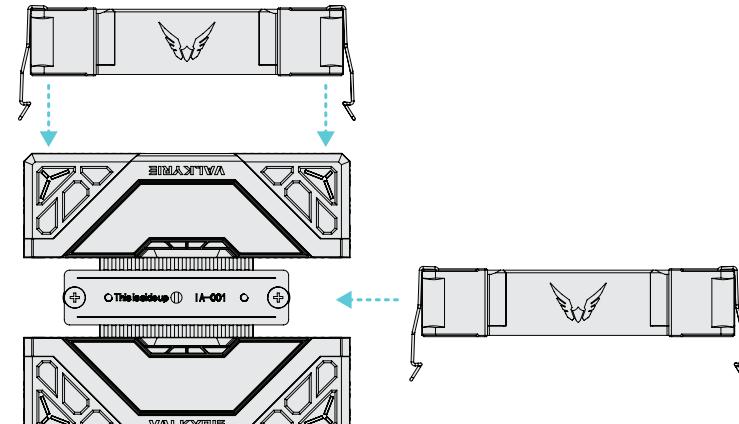

## Установка вентилятора DL125

С помощью кабельных зажимов закрепите вентилятор на системе воздушного охлаждения.

\*DL125 - это установка с двумя изогнутыми вперед вентиляторами. Пожалуйста, обратите внимание на направление вентилятора.

\*Логотип вентилятора (wing LOGO) должен быть таким, как показано на рисунке ниже.

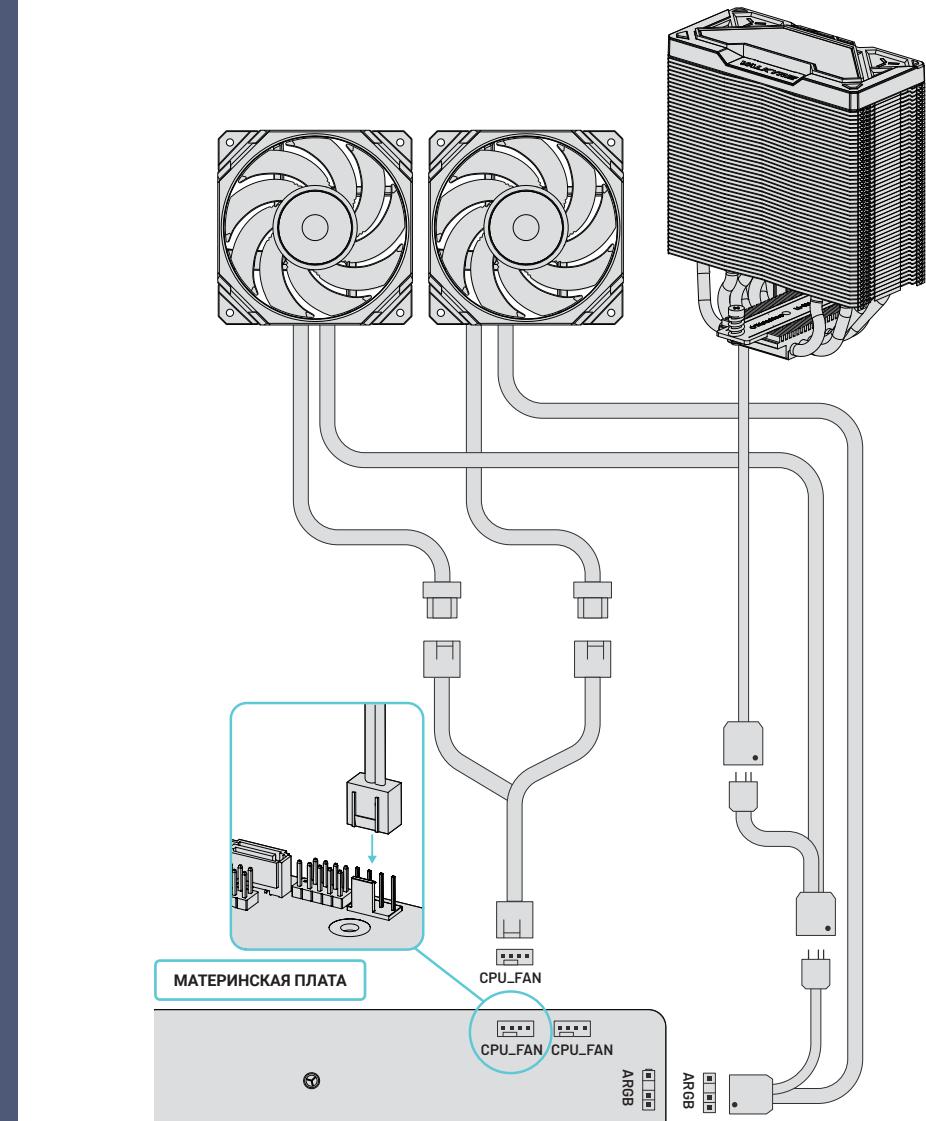

# ► ЭЛЕКТРОПРОВОДКА ◀

## Электропроводка вентилятора

1. С помощью кабелей подключите кабель вентилятора 4PIN к разъему CPU\_FAN на материнской плате.

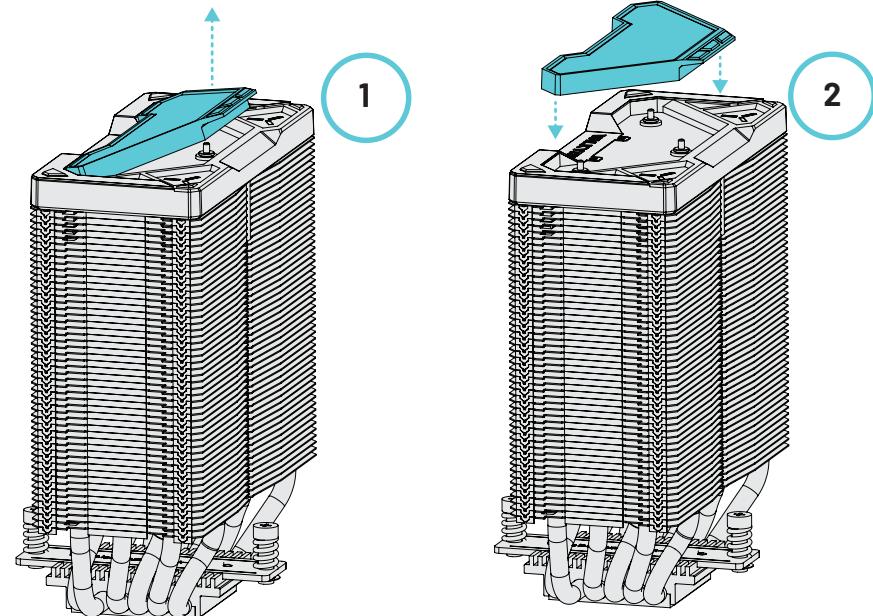

2. Подключите разъем A-RGB вентиляторов и основного корпуса к разъему 5V 3PIN A-RGB на материнской плате, как отображено на рисунке.

## Замена верхней крышки

Крышка может быть снята и заменена на ту, что нравится вам больше.  
\*Убедитесь, что начинаете с середины.
