Opis

LELIT William PL71, prosumer on-demand coffee grinder with Ø 50 mm flat burrs

Producent: LELIT

- **PRODUCT DESCRIPTION:** William is an on-demand coffee grinder with Ø 50 mm flat burrs that brings together excellent performance and a design with a strong personality. The interface and the buttons ensure ease of use and high performances
 - **PRODUCT FEATURES:** Grinding micro-regulation, grinding time setting buttons, button to add coffee or stop grinding while the dose is running, Ø 50 mm flat burrs, brushed stainless steel appliance body, coffee chute and filterholder support with adjustable height and large and removable coffee rest tray
 - **SEATTABLE PARAMETERS:** The grinding time for 1 or 2 coffee doses can be set through the two buttons located on the front of the coffee grinder, to have a constant quantity of ground coffee one after the other
 - **FOR AN AD HOC DOSAGE:** The upper button allows to manually add more coffee or stop the grinding while the dose is running
 - **MAXIMUM STABILITY:** The height-adjustable pin and the fixed linchpin allow to hook the filterholder to the coffee grinder that remains balanced during the grinding, ensuring extreme stability and comfort
 - **CHOSEN MATERIALS:** The height-adjustable coffee chute helps to precisely direct the ground coffee into the filter, the coffee rest tray is easy to remove for an optimal cleaning, firmly anchored to the coffee grinder thanks to the magnetic self-locking mechanism
 - **FOR A PROFESSIONAL BREWING:** The Ø 50 mm flat burrs perform a horizontal grind. Their quick rotation allows the coffee extraction taking advantage of the centrifugal force. The choice of these burrs ensures high grinding precision. The micrometric stepless adjustment is settable via the upper knob, whose granulometry varies from the coarsest value (1) to the finest one (10)
 - **ALWAYS FRESH COFFEE:** The container to collect the coffee beans, the so-called bean hopper, has been developed in its shape and materials. Its smoked coloring protects the beans from potential alterations caused by the light. The closure cap made of stainless steel prevents the air passage and the consequent possibility for the beans to get humid, ensuring the perfect aroma and freshness. The capacity of the bean hopper is 350 g and the external graduated scale allows to control the quantity of coffee inside
 - **MADE IN ITALY:** All LELIT products are entirely designed and made in Italy using professional technology and components
