### Opis

## RHINOSHIELD Case Compatible with [iPhone 13] | SolidSuit - Shock Absorbent Slim Design Protective Cover with Premium Matte Finish 3.5M / 11ft Drop Protection - Carbon Fiber

Producent: Evolute Labs

Producent: Evolute Labs

✓[OPCJA BEZ STRESU] - Dzięki naszej autorskiej technologii RhinoShield [ODPORNEJ NA UDERZENIA], nie musisz się martwić o stłuczenie cennego telefonu z tylnej szybki. Nasz polimerowy materiał ShockSpread, potwierdzony testami upadku i certyfikatem wojskowym (MIL-STD 810G), absorbuje uderzenie z wysokości co najmniej 3.5m/11 stóp. Wewnętrzna struktura plastra miodu etui zapewnia dodatkową ochronę przed uderzeniami w wysokości 10%.

✓[PROSTE WYKONANIE Z WYKOŃCZENIEM PREMIUM] - Czysty design SolidSuit nawiązuje do oryginalnych kształtów Twojego telefonu, ponieważ trwałe etui nie musi przypominać cegły. SolidSuit Classic posiada matowe wykończenie z poprawioną odpornością na zarysowania. SolidSuit Carbon Fiber zapewnia dobrą przyczepność i piękno włókien węglowych bez zakłóceń sygnału.

- ✓[WORRY-FREE PROTECTION] - With our proprietary RhinoShield [IMPACT RESISTANT] technology, you never have to worry about breaking that valuable glass-backed phone. Proven with multiple drop tests and certified military grade (MIL-STD 810G) - our custom ShockSpread polymer material absorbs impact of at least 3.5m/11 feet. The case's inner honeycomb structure provides an additional 10% defense against knocks.
- ✓[MINIMAL DESIGN WITH PREMIUM FINISH] - SolidSuit's clean design follows the original contours of your phone closely, because a tough case doesn't need to look like a brick. SolidSuit Classic features a matte finish with improved scratch resistance. SolidSuit Carbon Fiber provides good grip and gives you the beauty of carbon fiber without any signal interference.
- ✓[SLIM & USER-FRIENDLY] - The slim (under 3mm/0.12in thin) and simple form slides into your pocket easily. A subtle raised lip protects the screen and camera housing, so you can rest your phone on a flat surface without it getting scratched. The improved buttons are more responsive, with good tactile feedback. A matte, stain resistant coating on the sides makes scuff and ink marks easy to clean.
- ✓[COMPATIBILITY] - Compatible with iPhone 13 and MagSafe charging (slight loss of magnetic function). Precision cutouts for all ports, fits most cables. For better all-round protection, we strongly recommend pairing this product with

the RhinoShield Tempered Glass Protector, just in case the phone falls face-down on a pointed object or highly-uneven surface. MagSafe charging compatible.

- ✓[NEXT GENERATION MATERIAL] - Our ShockSpread polymer is extremely durable and moderately flexible. The case can bend without breaking or permanent loosening especially during installation and removal, unlike traditional polycarbonate or TPU cases. It is also safer for you and your family, as it is BPA/BPS/BPF free AND passes FDA food-grade requirements. This case is recyclable.
